Proceedings

OF THE

Government of His Highness the Maharaja of Mysore

FEBRUARY 1914

BANGALORE:
PRINTED AT THE GOVERNMENT PRESS.
1914

CONTENTS FOR FEBRUARY 1914.

PART I, IN EXTENSO.

I. REVENUE.

PAGES

SECTION 1—LAND REVENUE.

No. R. 6041-50—L. R. 152-11-3, dated 5th—

Directing that the practice of fixing temporary water rate in exceptional cases strictly in accordance with the Revenue Commissioner's circular, be continued 1

No. R. 6133-42—L. R. 213-13-2, dated 7th—

Directing that particulars regarding survey extent and assessment of the Inam villages whose title-deeds are dated prior to the 12th October 1872 be omitted both in the quit-rent registers and the final title-deeds ... 2

No. R. 6458-66—L. R. 398-12-4, dated 16th—

Directing that parties be allowed to appear by legal practitioners in certain revenue proceedings ... ... 3—5

No. R. 5931-40—L. R. 281-13-9, dated 3rd—

Directing that officials in the Taluk Offices who have not put in three years' approved service, etc., should not draw more than the maximum pay of their appointments under the whole scale and that officials who have put in three years' approved service and been drawing the maximum pay of the old scale for not less than one year be given one increment under the new scale with effect from 1st January 1914 6

No. R. 6058-6107—L. R. 430-13-1, dated 6th—

Laying down outlines of a Village Improvement Scheme and prescribing a form of village statistics to be submitted annually to Government ... 7—9

No. R. 6193-6—L. R. 223-12-5, dated 11th—

Passing orders on certain points connected with the development of the latent resources of the tract commanded by the Sulekere tank in the Channagiri Taluk ... ... 10—13

SECTION 2—LAND SURVEY.—*Nil.*

SECTION 3—AGRICULTURE.

No. R. 6032-40—Agri. 26-13-6, dated 5th—

Recording Revenue Commissioner's review on the statement of cattle mortality in the State during the quarter ending 30th September 1913 ... 1—3

No. R. 6695-743—Agri. 107-12-13, dated 24th—

Sanctioning the reorganization of the Department of Agriculture in Mysore .. 4—33

SECTION 4—FORESTS.

No. R. 6024-6—Ft. 19-13-4, dated 5th—

Sanctioning certain further concessions to the Mahratta Kunbi families settling in the Sagar Taluk... 1

No. R. 6211-22—Ft. 139-13-1, dated 11th—

Ordering the deputation of Mr. G. Krishnamurthi Naidu, Assistant Conservator of Forests, and Mr. H. S. Narayana Rao, Probationary Assistant Conservator, for carrying out a survey of the forest resources of the State and for investigating the means necessary for the development of forest industries 2

PAGES

No. R. 6652-63—Ft. 90-12-6, dated 24th—
Approving the settlement of the Kaniyanpur Block II in the Gundlupet Taluk 3—15

SECTION 5—REVENUE MISCELLANEOUS.—*Nil.*

II. FINANCIAL.

SECTION 1—GENERAL FINANCE.

No. Fl. 3490-538—G. F. 588-11-5, dated 7th—
Consolidating the rules explaining the conditions and circumstances under which advances are given for building or purchasing houses... .. 1—2

No. Fl. 3589-98—G. F. 76-13-3, dated 12th—
Reviewing the Report on the working of the Savings Banks in Mysore during the year 1912-13 3

No. Fl. 3746—G. F. 54-13-7, dated 16th—
Passing orders on the proposals of the Comptroller for making certain arrangements regarding the distribution of work of his office among the gazetted and clerical staff and rearrangement of salaries of staff, etc. ... ... 4—5

PART I.

Proceedings of the Government of His Highness the Maharaja of Mysore, Land Revenue, dated 5th February 1914.

READ—

Letter No. R. 315—L. R. 152-11-1, dated the 13th July 1911, to the Revenue Commissioner in Mysore, calling for a report as to how the practice said to be prevailing in the Tumkur District of allowing the use of Government water for purposes of irrigation for temporary periods originated and whether such practice prevails in the other districts also and if it is authorized.

2. Letter No. 1679, dated the 9th August 1913, from the Revenue Commissioner in Mysore, stating that the practice prevails not only in the Tumkur District but also in some other * districts though there is no definite information as to how it originated, that as there is nothing in the Land Revenue Code, or the rules framed thereunder, prohibiting the use of Government water for temporary periods the practice is not only legal but expedient, and that similar practice obtains in the Presidencies of Bombay and Madras.

* Mysore, Chitaldrug, Kolar

No. R. 6041-50—L. R. 152-11-3, DATED BANGALORE, 5TH FEBRUARY 1914.

ORDER THEREON.—By Government Notification No. 7051—R. F. 45-96, dated the 2nd February 1897, a rule was added to the Land Revenue Rules of 1890 authorising the entertainment of applications for the use of Government water for one year only but it was subsequently abrogated by Government Order No. R. 9646—P. F. 45-96, dated the 1st May 1897, as it was calculated to afford scope for surreptitious use of Government water. The existing Rules 32 and 34 of the Land Revenue Rules cannot be taken to apply to the use of Government water for temporary periods.

2. It is, however, considered by the Revenue Commissioner to be advantageous both to Government and to the raiyats to sanction applications for the use of Government water for one year only in years of plentiful rainfall when tanks generally receive a greater supply than is required for the irrigation of the existing atchkat. He has also issued a Circular No. 12934-12941, dated the 17th May 1912, authorizing the levy of temporary water rate for one year only in years of plentiful rainfall, and directing that no permanent addition to the atchkat of a tank should be made except after mature consideration by the Deputy Commissioner and for very good reason.

3. The Superintendent of Revenue Survey, who was unofficially consulted, is of opinion that there would be no violation of principle in fixing temporary water rate for one year only by the Deputy Commissioners in years of plentiful rainfall.

4. In the circumstances the Government are pleased to accept the concurrent opinions of the Revenue Commissioner and the Superintendent of Revenue Survey and direct that the practice of fixing temporary water rate in exceptional cases, strictly in accordance with the instructions contained in the Revenue Commissioner's circular, be continued.

K. R. SRINIVASIENGAR.

Proceedings of the Government of His Highness the Maharaja of Mysore, Land Revenue, dated 7th February 1914.

READ—

Letter No. 17, dated the 22nd July 1913, from the Superintendent of Inam Settlements in Mysore, suggesting that particulars regarding survey extent and assessment of the Inam villages whose title-deeds are dated prior to the 12th October 1872 may be ordered to be omitted both in the quit-rent registers and the final title-deeds.

No. R. 6133-42—L. R. 213-13-2, DATED BANGALORE, 7TH FEBRUARY 1914.

ORDER THEREON.—The Superintendent of Inam Settlements reports that about 200 Inam villages whose quit-rent should not, under standing orders, be revised on the basis of survey valuation, were nevertheless surveyed before the receipt of Government Order No. 2401-10—Circular 62, dated the 6th July 1888, and particulars as to their survey extent and assessment have been entered in the quite rent registers. He represents that the entry of the acreage and assessment in the quite rent registers in these cases, is apt to mislead and has actually misled the Revenue authorities into calculating the levy of local cess from the Inamdars on the survey assessment instead of on the old beriz; and therefore suggests (1) that the entries relating to the above said villages made in columns 10, 11 and 12 of the quit-rent registers showing their survey extent and assessment, may be struck off and the columns left blank; (2) that the corresponding columns in the final title-deeds which are yet to be issued for these villages may be also left blank; and (3) that the heading of the column 3 of the quit-rent register may be changed from "the date on which the title-deed has been issued" to "date of the title-deed" so as to indicate the correct interpretation of the word "issued."

Government agree with the view of the Superintendent and are pleased to approve of his suggestions.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Dasara Representative Assembly Subjects Nos. 85 of 1912, and 24, 139 and 140 of 1913 on the question of the appearance of legal practitioners in Revenue Courts.

2. Chief Commissioner's Notification No. 1024—R. 15, dated the 9th May 1874, on the same subject (printed as an accompaniment to this Order).

3 Correspondence ending with letter No. C. 51, dated the 5th January 1914, from the Revenue Commissioner in Mysore, furnishing his opinion in the matter.

No. R. 6458-66--L. R. 398-12-4, DATED BANGALORE, 16TH FEBRUARY 1914.

ORDER THEREON.—The Revenue Commissioner having, in certain cases heard by him, refused to recognise the right of the parties concerned to be represented by legal practitioners, the Law Association of Bangalore moved the Revenue Commissioner for a reconsideration of the order and, on his declining to do so, have submitted a representation to Government. The question was raised also by certain members of the Dasara Representative Assembly in the Sessions of 1912 and 1913.

2. The Chief Commissioner's Notification No. 1024—R. 15, dated the 9th May 1874, lays down that it is discretionary with the presiding officers of Revenue Courts to permit Pleaders to appear before them in suits instituted therein, if they should deem the same to be desirable from the circumstances of the case.

3. The Land Revenue Code was enacted in 1888 and it contains no provision directly applicable to the employment of Advocates and Pleaders in Revenue Courts. But under Section 204 of that Code the office of any authority holding a formal or summary enquiry is deemed a Civil Court for purposes of such enquiry, and every hearing or decision whether in a formal or summary enquiry is required to be in public and the parties or their authorised agents shall have due notice to attend. Rule 102 of the Land Revenue Rules lays down that, in matters not provided for by the Code or the Rules, the provisions of the Code of Civil Procedure for the time being in force shall be followed as far as possible. It has been contended on the strength of these provisions that the circular of 1874 can have no force in so far as it is inconsistent with them and that a right has been impliedly conceded to parties to be represented by Advocates or Pleaders, if they should so desire in all formal and summary enquiries under the Code.

4. The Revenue Commissioner, on the other hand, is of opinion that the appearance of legal practitioners is repugnant to the provisions of the Code as Section 204 omits all reference to them and allows only parties or their authorised agents to attend the hearings in formal and summary enquiries. He considers that Advocates and Pleaders can be allowed to appear in Revenue cases only as authorised agents of the parties concerned and not as legal practitioners. He also observes that Rule 102 has no bearing on the question and that it should not be interpreted in a manner inconsistent with the specific provisions of the Revenue Code.

5. Government have carefully considered all the arguments connected with the question and they have come to the conclusion that there is nothing in Section 204 of the Land Revenue Code to justify the interpretation that the appearance of legal practitioners in Revenue Courts is inconsistent with the provisions of the Land Revenue Code.

6. Besides, in a matter of this nature, much importance has to be attached to local practice. Though under the circular of 1874, the appearance of legal practitioners in Revenue cases is permissive, a practice has established itself of allowing them to appear freely before Revenue Officers of all grades in the State. In cases coming before the Government no restrictions have been placed on the appearance of Advocates. Government have no reason to believe that the concession has led to any undesirable consequences. The representations in the Dasara Representative Assembly showed that public opinion was in favour of the concession.

Moreover certain classes of subjects dealt with by Revenue Officers partake of the nature of those coming under the purview of Civil Courts in which parties have a right to be represented by legal practitioners. These subjects are, cases falling under Section 221 of the Land Revenue Code, regular suits under the Village Offices Regulation and matters in regard to which the Revenue Code has prescribed formal enquiries.

7. Government are therefore pleased to direct that parties be allowed to appear by Advocates or Pleaders, if they so desire in the following cases, including appeals :—

(i) Cases falling under Section 221 of the Land Revenue Code.

(ii) Regular suits under the Village Offices Regulation.

(iii) All other cases in which a formal enquiry has been prescribed under the Land Revenue Code or any other law.

In any case not coming under the above category, the previous permission of the presiding Revenue Officer should be obtained before legal practitioners are allowed to appear and the Revenue Officer concerned will exercise his discretion according to what is fair and reasonable having regard to all the circumstances of the case.

8. Only Advocates will be allowed to appear before the Government and Advocates or First Grade Pleaders before the Revenue Commissioner.

9. These directions will be incorporated in the Revenue Rules

K. R. SRINIVASIENGAR,

Accompaniment.

From the Offg. Commissioner of the Ashtagram Division, to the Offg. Secretary to the Chief Commissioner of Mysore, General Department, No. 45—Rev. 6, dated 21st April 1874

In submitting herewith copy of letter No. 13, dated 7th instant, from the Deputy Commissioner, Mysore, requesting to be informed whether Pleaders may be allowed to practice in Revenue Courts, I have the honor with reference to the marginally noted correspondence to request you will have the goodness to favor me with the orders of the Chief Commissioner on the subject.

Secretary's No 5979—53, dated 27th January 1873, to the address of the Commissioner, Nagar Division, forwarded to this office under cover of No 5961 1252 of 27th idem.

Looking to the simple nature of the cases at present cognizable by the Revenue Courts, which seldom involve any intricate points, either of law or fact, requiring the aid of professional Pleaders, and the heavy expense which will be entailed on the parties in case the former are admitted, I respectfully beg leave to suggest that the present system may be continued at any rate until the completion of the survey operations in this Division.

In a certain case of special appeal preferred by a Gauda, Major Cambell, my predecessor, declined to hear the Pleader who appeared for him.

From the Offg. Deputy Commissioner of the Mysore District, to the Offg Commissioner of the Ashtagram Division, No. 13, dated Mysore, 7th April 1874.

Adverting to the Chief Commissioner's instructions conveyed in your Circular No. 475, dated 6th February 1873, on the subject of the general application of the provisions of the Civil Procedure Code to Revenue suits, I have the honor to request that you will be good enough to inform me whether Pleaders can be allowed to be heard in Revenue cases, original or appeal, and, if so, whether they are entitled to their costs as in Civil Courts.

No 1024—Rev. 15, dated Bangalore, 9th May 1874

Order thereon.—In the above letter, the Commissioner of the Ashtagram Division requests instructions as to whether Pleaders may be allowed to practise in Revenue Courts.

Land Revenue, dated 16th February 1914.

2. On a full consideration of this question and of the practice heretofore in force on the point, the Chief Commissioner sees objections to the "*compulsory*" employment of Pleaders, in Revenue suits in the Revenue Courts of this Province, and as their general *permissive* employment would in a brief time compel all who have suits in such Courts to have recourse to them, and would thus virtually make the measure a compulsory one in its results, it will, in Colonel Meade's opinion, be sufficient to leave it to the Presiding Officers of such Courts, to permit the employment of Pleaders in any suits instituted therein, in which they deem the same to be desirable from the circumstances of the case.

J. S. F. MACKENZIE,
Offg. Secretary.

To—The Offg. Commissioner of the Ashtagram Division.
The Commissioners, Nundydroog and Nagar Divisions.

Proceedings of the Government of His Highness the Maharaja of Mysore, Land Revenue, dated 3rd February 1914.

READ—

Letter No. 8178, dated the 22nd December 1913, from the Revenue Commissioner in Mysore, soliciting instructions in the matter of granting promotions to the officials in the several Taluk and Sub-Taluk Offices in accordance with para 4 of Government Order No. 3528-37—L. R. 281-13-1, dated 19th September 1913.

No. R. 5931-40—L. R. 281-13-9, DATED BANGALORE, 3RD FEBRUARY 1914.

ORDER THEREON.—It was not contemplated in para 4 of the Government Order read above that officials who have rendered approved service for 3 years should at once be promoted to the maximum of the new scale or even obtain increments according to such scale for the past years of service put in by them in their present appointments.

All that was meant in the order was that officials who have not rendered approved service for 3 years and are not quite fit for their present appointments should not draw more than the maximum pay of their appointments under the old scale and that they will not be entitled to increase of pay under the new scale.

3. Such of the officials as have rendered approved service will start on the minimum pay according to the new scale unless they have been drawing the maximum pay of the old scale for not less than one year, in which case, they will be given one increment under the new scale, with effect from 1st January 1914.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore returning the enclosures.
The Comptroller, Mysore Government (through Branch II).
The Deputy Commissioners of Districts.

Ext.—K N.

No. R. 6058-6107—L. R. 430-13-1, DATED BANGALORE, 6TH FEBRUARY 1914.

ORDER.—Nine-tenths of the population of the State reside in villages and, when the agricultural operations are slack, people in rural areas suffer from want of employment for many months in the year, particularly during years of deficient rainfall or scarcity. It is therefore considered important that a beginning should be made to stimulate economic and other activities in rural areas in order to provide subsidiary occupations and increase production and the earning power of the people.

2. After discussion with officers of Government and a large number of Representative Assembly Members and others, a form has been prepared showing the essential statistics to be collected to enable the people of a village to take stock of their progress from year to year. This form is now printed and issued for use and arrangements will be made to collect the statistics for the year 1913-14 and submit the form duly completed in July next.

3. Detailed instructions for compiling the statistics are given on the face of the form. The information needed to fill in the columns will be collected by the village agency, which will be referred to *infra*, before the end of June in each year and the form duly completed will be submitted from each village to the Taluk Progress Committee concerned or, where there is no such Committee, to the Amildar of the taluk, by the 15th of July. The figures will then be compiled by *hoblis* for each taluk by the Progress Committee or the Amildar, as the case may be, and submitted to the Deputy Commissioner before the end of July. The statistics for the whole district will be compiled in the Deputy Commissioner's Office and sent to the Revenue Commissioner by the end of August, who will prepare a consolidated return for the whole State and submit the same to Government in the Departments of Education and Agriculture by the end of September. The return will then be briefly reviewed by Government.

4. The form is intended merely to record progress from year to year. But it is essential that there should be in each village or a group of villages, an agency who will prepare a programme of the special measures of improvement necessary and hold themselves responsible for giving effect to the programme.

5. The following are some of the principal matters which require the attention of the village agency :—

(1) Improvement of education, including the education of adults and instruction in some industry or industries subsidiary to agriculture.

Spreading enlightenment by means of newspapers, lectures, demonstration, etc.

(2) Increasing production and occupations by improved methods of cultivation and irrigation and by encouraging rural industries and trade with a view to enable the people to earn more and live better.

(3) Improvement of village sanitation by keeping the village clean, and free from uneven surfaces and hollows, and by providing good water-supply and drainage.

(4) Improvement by co-operative effort in respect of—

(*a*) repairs to, and maintenance of, irrigation tanks and channels, cart-tracks and village school houses, temples, mosques, etc;

(*b*) providing facilities to travellers;

(*c*) establishment of co-operative societies for supplying capital, for agricultural and industrial undertakings, for disposal of produce and other objects;

(*d*) supply of fodder, fuel and other requirements of village life.

(5) All other objects calculated to increase production in the village and add to the comfort of the people.

(6) Collecting funds and expending the same judiciously for all these objects

6. In villages which have already been constituted into Unions and for which Panchayets have been appointed, a small committee of not less than three and not more than five members will be elected by the Panchayet to attend to the work of village improvement. In other villages containing not less than 300 inhabitants, the people of the villages should be induced to appoint a committee consisting of a sufficient number of members, preferably by election, for the same purpose. Smaller villages, that is, villages having less than 300 inhabitants, should be grouped together and a single committee appointed jointly for the group which should not exceed six villages in number. In the latter case, the meetings of the committee and the people may take place in the principal village of the group, or in each village by turns.

In places where it is difficult to form such committees, the local officers concerned should endeavour to carry out the objects of the scheme by the aid of honorary workers and collect statistics required through the village officers.

The committee will usually be appointed for one year at a time and no member should be retained on it unless he continues to render useful service.

7. Wherever there is sufficient enterprise in a village or group of villages, an endeavour should be made by the village agency to induce the villagers to give one half day in a week, for work connected with the improvement of the village, such as cleaning and improving the village site, constructing and repairing village tracks, levelling roads, filling holes and hollows, providing or improving water-supply and drainage, repairing tank embankments and irrigation channels and other similar works of general utility.

Every family in a village may be induced to contribute one adult worker and those which are not accustomed to manual work may be induced to give for the one half day in the week the services of a hired labourer, or contribute, in lieu, an anna or two at their option.

Again, on some one evening every week, all the leading villagers and communities might assemble in the village *Chavdi*, or at any other convenient place of meeting. At the meeting, a few rules on sanitation and other matters conducive to their well-being might be recited by any one of the members who is able to read, after which extracts from the week's newspapers might be read and perhaps also from religious texts like the Ramayana or the Khoran. The meeting may be followed, wherever possible, by some wholesome recreation or amusement.

People should be taught the dignity of labour. They should also be taught to esteem it a special honour to be called upon by the leaders to co-operate in carrying out works of public utility in the village.

It should be possible to get the residents of half a dozen important villages in each taluk at once to agree to such weekly co-operative work and meetings. If the scheme is worked with success in some villages, other villages are likely to follow their example and in this way a useful system of co-operative village enterprise may be gradually brought into existence.

8. Most of the works needed to improve villages can be carried out at little cost if the villagers concerned learn to co-operate and provide for their common wants.

9. A programme of all works of local improvement which may be carried out by the villagers themselves during the next five years should be maintained and the works to be taken up for each year should be selected before the beginning of the year, by the committee or other agency concerned.

10. As regards improvements which involve the employment of outside agency, such as sinking drinking water wells, execution of masonry drains and constructing buildings, school houses, etc., Government will be prepared to sanction one-half of the amount locally raised towards objects approved by them.

A sum of Rs. 2 lakhs will be provided annually in the Budget for sanctioning grants in aid of such works, chiefly in villages which are not Unions and as such have no funds at their disposal to spend. This will be exclusive of the Budget provision for the restoration of minor tanks which is being dealt with as an independent scheme.

(Land Revenue), dated 6th February 1914.

The amount will be treated as contribution from State Funds to Local Funds. Separate orders will issue as to the amounts to be allotted to each of the eight districts and the manner in which the grant will be made available for expenditure on village works.

11. The Revenue Officers will be requested to prepare lists of villages in which committees have been formed to carry on the work of village improvement and for collection of statistics and also of those in which the villagers are willing to set apart half a day in the week for work of communal benefit and devote a few hours one evening in the week for deriving knowledge and instruction. These lists may be prepared and sent up to Government by the Deputy Commissioners through the Revenue Commissioner not later than the end of April next. The lists will be printed separately for each district.

12. The forms will be printed in the Government Press and copies supplied free of cost on application to the Deputy Commissioner.

13. Besides the District authorities in the Revenue and other Departments, the Secretary to the Economic Conference, the Secretaries to the Central Committees, the Registrar of Co-operative Societies and his staff, and the officers of the Medical and Sanitary Departments, will, during their tours, get into communication with these village improvement agencies and endeavour by advice, assistance and encouragement, to stimulate their activities and maintain their interest in the work undertaken by them. *Shanbhogs* and *Patels* should be directed to give every facility for the collection of the statistics from the village accounts and in other ways.

14. Reference should be made in the Revenue Administration Report in future years describing briefly the progress made in developing the scheme in each district.

READ AGAIN—

Government Order No. R. 1329-32—L. R. 223-12-2, dated the 3rd September 1912, calling for proposals from the Revenue Commissioner, the Excise Commissioner and the Senior Surgeon on the following points connected with the development of the latent resources of the tract commanded by the Sulekere tank in the Channagiri Taluk.

i. Improving access to irrigated banjar lands by the construction of culverts and the diversion of water courses wherever necessary.
ii. Desirability of granting lands on alve terms.
iii. Selection of new village sites.
iv. Reclassification of wet lands in Arehalli and other villages.
v. Reclaiming for cultivating a portion of the land set apart as date reserve.
vi. Opening a Hospital in the Sulekere tract, either in Sulekere or Hosahalli

READ—

*1. Letter No. 10244, dated 19th May 1913, from the Revenue Commissioner, submitting proposals from the Deputy Commissioner, Shimoga District, in respect of points numbers 1 to 4 noted above and expressing his concurrence therewith.

†2. Letter No. 394, dated 10th July 1913, from the Excise Commissioner in Mysore, furnishing his opinion in regard to point No. 5.

No. R. 6193-6—L. R. 223-12-5, DATED BANGALORE, 11TH FEBRUARY 1914.

ORDER THEREON.—The Deputy Commissioner's proposals contained in his letter No. 618, dated the 26th March 1913, for the construction of culverts and the diversion of water courses will be referred to the Chief Engineer for necessary early action.

2. Regarding the 600 acres of assessed land under the tank stated to be lying waste for want of cultivators, as these lands are said to require considerable outlay to bring them under cultivation, Government accept the recommendation of the Deputy Commissioner to grant them on *alve* tenure ranging from 3 to 6 years; and with a view to facilitate the prompt disposal of applications they are pleased to authorize the Deputy Commissioner to grant the lands on *alve* tenure not exceeding 6 years, a quarterly statement of lands so granted by him being submitted to Government for information by the Revenue Commissioner.

3. The Deputy Commissioner will take the necessary steps for shifting the Hosahalli village as proposed by him and sinking a new well therein from District Funds or Local Funds General.

4. The Deputy Commissioner's proposals in respect of the Arehalli wet lands are rather indefinite and incomplete. The Revenue Commissioner is requested to obtain and submit definite and detailed proposals in regard to them in consultation with the Chief Engineer and the Survey Superintendent.

5. With respect to the land set apart as a date reserve under the tank, an extent of 71 acres and 32 guntas will, as suggested by the Deputy Commissioner and approved by the Excise Commissioner, be removed from the date reserve list and thrown open for cultivation.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore, returning the records of the case.
The Excise Commissioner in Mysore.
The Chief Engineer of Mysore.
The Deputy Commissioner, Shimoga District.

Proceedings of the Government of His Highness the Maharaja of Mysore,

Accompaniment No. 1.

Letter No. 1024, dated 19th—22nd May 1913, from Ananda Rao S. Sirsi, Esq., B.A. LL.B., Assistant Commissioner in charge of the Office of the Revenue Commissioner in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments.

With reference to Government Order No. R. 1329-32—L. R. 223-12-2, dated 3rd September 1912, calling for proposals on certain points which are calculated to develop the latent resources of the tract commanded by the Sulekere tank, I have the honor to forward herewith copy of letter No. 618, dated 26th March 1913, together with its enclosures in original, from the Deputy Commissioner, Shimoga District, submitting his proposals and to state that I agree with the Deputy Commissioner.

(ENCLOSURE.)

Letter No. 618, dated 26th March 1913, from the Deputy Commissioner, Shimoga District, to the Revenue Commissioner in Mysore.

Adverting to your Memorandum No. 2793, dated 16th September 1912, forwarding copy of Government Proceedings No. R. 1329-32—L. R. 223-12-2, dated 3rd September 1912, regarding the economic and administrative measures necessary to develop the latent resources of the tract commanded by the Sulekere tank, I have the honor to state as follows :—

(1) The construction of culverts and the diversion of water courses at the undermentioned localities is necessary to afford access to irrigated banjar lands.

Culverts.

1. Over Thambu Hole between Survey No. 209 of Sulekere and Survey No. 52 of Hosahalli to the west of Survey No. 70 of Hosahalli.

2. Over Hanumanthadevaru Hole in Survey No. 20 of Haromatti village.

3. In the northern corner of Survey No. 2 of Hirekurubarahalli village.

Diversion of water courses.

(1) Diversion of water courses from Survey Nos. 23, 98, 126, 125, 87, 127, 75, 74, 61, 60 and 131 of Sulekere into Survey Nos. 123 and 133 of the same village.

(2) Diversion of water courses from Survey Nos. 58, 57, 167, 52, 51, 168, 50, 170, 171, 172, 182, 174, 176, 181, 166, 165, 177, 178 and 179 of Sulekere into Survey Nos. 160 and 164 of the same village.

2. Some lands which are included in the date reserve have been already darkhasted on full assessment as they are conveniently situated for purposes of cultivation. These darkhasts will be disposed of in accordance with the principles laid down in Government Proceedings No. 1008-18—L. R. 159-03-11, dated 7th August 1907. But there is an assessed area of more than 600 acres in extent which is lying waste for several years past for want of cultivators. As these lands require considerable outlay to bring them under cultivation, I would propose that sanction may be accorded to the grant thereof on *Aloe* tenure for a period ranging from 3 to 6 years according to circumstances of each case.

(3) Hosahalli village situated in the Sulekere tract requires immediate shifting as it is very unhealthy and that a new well should be sunk for the supply of drinking water to the villagers. The Health Officer is also of this opinion.

(4) The correspondence regarding the lands applied for for cultivation in the Arehalli village is herewith submitted. There are only 9 houses and 25 people in the village. Out of an extent of 223 acres and 9 guntas of wet and garden lands in this village, an area of 208 acres, 18 guntas assessed at Rs. 925-4-0 is lying waste for want of irrigational facilities. Thirteen darkhasts for the entire area of assessed banjar lands have till now been received but the darkhastdars pray that these wet and garden lands may be granted at dry rates inasmuch as they are not capable of irrigation. If there is no immediate prospect of restoring the Kulmenalli Voddu on which these lands depend for irrigation, I would propose that these lands may be granted on temporary dry assessment subject to the payment of wet rates as soon as irrigational facilities are afforded.

Land Revenue, dated 11th February 1914.

Accompaniment No. 2.

Letter No. 391, dated 8—10th July 1913, from M. Kantaraj Urs, Esq., B.A., Excise Commissioner in Mysore, to K. R. Srinivasiengar, Esq., M.A., Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments.

With reference to Government Proceedings No. R. 1329-32—L. R. 223-12-2, dated the 3rd September 1912, calling for a report as to what extent the land set apart as date reserve under Sulekere tank, could be made available for cultivation, I have the honor to forward herewith copy of docket No. nil, dated the 3rd instant, from the Deputy Commissioner, Shimoga District, together with that of its enclosure and to state that I concur with the opinion of the Deputy Commissioner that out of 3,586 acres and 5 guntas, 71 acres and 32 guntas may be spared for cultivation purposes and that these lands are of immense value to the Excise Department, inasmuch as the taluks of Honnali, Davangere and Channagiri are supplied with date toddy chiefly from this region; and beside these lands there is still a large extent of land not included in the date reservation list which can be made available for cultivation.

(Enclosure 1.)

Docket No. nil, dated 3rd July 1913, from the Deputy Commissioner, Shimoga District, to the Excise Commissioner in Mysore.

With reference to his No. 9471, dated 17—19th idem, has the honor to report that the undersigned personally inspected the lands set apart for date reservation under the Sulekere tank and to state that out of 3,586 acres and 5 guntas, 71 acres and 32 guntas may be spared for cultivation as per list herewith appended.

In this connection, it has to be observed that these are the only lands available as date area in the whole district and as such the taluks of Honnali, Davangere and Channagiri have to be supplied with date toddy chiefly from this region.

Further it has to be added that there is still large extent of land available for cultivation not included in the date reservation list.

(Enclosure 2.)

List of the lands available for cultivation in the villages set apart as date reserve under the Sulekere tank:—

Proceedings of the Government of His Highness the Maharaja of Mysore, Revenue (Agriculture), dated 5th February 1914.

READ—

Letter No. 8896, dated the 13th January 1914, from the Revenue Commissioner in Mysore, submitting a statement of cattle mortality in the State during the quarter ending 30th September 1913 together with a copy of his review thereon.

No. R. 6032-40—AGRI. 26-13-6, DATED BANGALORE, 5TH FEBRUARY 1914.

ORDER THEREON.—Recorded.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.

Exd.—C. R.

Revenue Commissioner's Review No. 8887-95—1, dated 13th January 1914.

Recorded.

2. The accompanying consolidated statement shows the extent of cattle mortality in the State during the quarter ending 30th September 1913, as compared with the corresponding quarter of the previous year.

3. It is satisfactory to note that the total loss of cattle during the quarter under review was 2,985 less than during the corresponding quarter of the previous year, the totals for the quarters being 18,547 and 21,532 respectively.

Statement showing the losses in cattle of various kinds in the Mysore State for the quarter ending the 30th September 1913.

Government Order No. R. 6294-335—Agri. 52-11-2, dated 4th May 1912, appointing Dr. Coleman as Director of Agriculture in Mysore.

2. Letters Nos. 1414, dated 28th May 1912, 1754, dated 7th March 1913, and 1801, dated 13th March 1913, from Dr. Coleman, Director of Agriculture, forwarding proposals for the development of the Agricultural Department and submitting a programme of work of the department for a period of five years.

3. Notes and memoranda furnished by Dr. Coleman in January and February 1914.

4. Letter No 917, dated 12th February 1914, from the Secretary, Economic Conference, communicating the views and suggestions of the Agricultural Committee of the Economic Conference in regard to the programme of work of the department.

No. R. 6695-743—Agri. 107-12-13, dated Bangalore, 24th February 1914.

Order thereon.—In the Government Order No. R. 6294-335—Agri. 52-11-2, dated 4th May 1912, appointing Dr. Coleman as Director of Agriculture, he was requested to submit proposals for the re-organization of the Agricultural Department and to prepare a programme of work for the next five years.

2. Soon after his return in February 1913 from leave and deputation to Europe and America, Dr. Coleman submitted his proposals with the communications read above, and these have received careful consideration.

3. Government have resolved to increase the expenditure of the department to more than double its present amount chiefly with a view to enable the department to co-operate with the agricultural population of the State and stimulate all healthy activities calculated to promote their prosperity.

4. The work to be done may be considered under the following main heads:—

I. Direction and statistics.

II. Scientific and experimental work.—

(1) Agricultural.

(2) Chemical.

(3) Biological.

(4) Educational.

III. Practical work in association with the people.

5. In regard to statistics it will be the duty of the Agricultural Department to co-operate with the Revenue Department in collecting accurate information, in estimating the quantity and value of the annual production, in issuing reports in respect of special crops and in otherwise periodically bringing under quantitative examination the agricultural activities of the people of the State and instituting instructive comparison with other parts of India and other countries of the world. Particular attention should be paid to increase in the area under cultivation both generally and in respect of special crops and special consideration should be given to the removal of difficulties, wherever they exist, which hinder the expansion of cultivation.

6. The work of the Agricultural, Chemical and Biological Sections in Part II will relate to the scientific and experimental work conducted in the farm and the Laboratory. Government approve of the general line of work proposed in Dr. Coleman's letters.

7. The work under agricultural education should include not only the conduct of the Agricultural School, but also attention to agricultural education in rural schools and by means of continuation classes and itinerant lecturers. The Inspector-General of Education is requested to co-operate with the Director of Agriculture in formulating a scheme for practical action. Special attention should be paid to teaching the people simple book-keeping and the maintenance of farm accounts, and also to training them in rural industries auxiliary to agriculture and necessary in the rural economy, such as carpentry, blacksmithing, the manufacture of carts and agricultural implements, constructing farm buildings, making ropes and baskets, dairying, preserving fruits and vegetables, etc.

8. The subjects suggested by the Agricultural Committee will also be included in the programme.

9. The principal items of work falling under main head III in paragraph 4 *ante* will be as under.

(1) The formation and working of Agricultural Associations.

(2) The formation and development of Co-operative Societies for agricultural purposes.

(3) Stimulating the growth of commercial crops.

(4) Stimulating the improvement of production in area, quantity and quality.

(5) Stimulating the increase of agricultural stock.

10. Special attention should be devoted to these branches of work. The Agricultural Department should work in close association with the people and also with the departments and officers of Government whose work has a bearing on its own, *viz.*, the Revenue, Forest, Education and Veterinary Departments, the Registrar of Co-operative Societies, the Economic Botanist and Superintendent of Government Gardens and the Economic Conference.

In the annual reports of the department, the work of the year should be described under the heads enumerated in paragraph 4 *ante*, and particular reference should be made to the practical work done in close association with the people.

11. The pay of the Deputy Director of Agriculture and the Chemist for the Geological Department will be fixed at Rs. 400—30—700. The pay of the Agricultural Chemist will be Rs. 250—30—700.

Dr. Coleman's proposal to appoint Mr. A. K. Yegnanarayana Iyer, as Deputy Director of Agriculture, is approved. Having regard to their services and qualifications Mr. H. V. Krishnayya and Mr. A. K. Yegnanarayana Iyer will be started on Rs. 490 and Rs. 400 respectively with effect from 1st March 1914.

The place of the Agricultural Chemist will not be filled till Mr. B. Narasimha Iyengar, now in training in Europe returns duly qualified.

The pay of the Assistant Director of Agriculture, Agricultural Engineer and Senior Assistant Chemist, Mycologist, Entomologist and Botanist will be Rs. 150—20—350.

The pay of the Agricultural Inspectors, Assistant Farm Manager and Supervisors of rural science in Elementary Schools will be Rs. 50—4—70 and 30—4—50, 19 places being sanctioned for the higher grade and 8 for the lower grade.

The pay of the Librarian on the Director's office establishment will be fixed at Rs. 30—4—50 instead of Rs. 55. The clerk from the Chief Commandant's office, now doing duty in the Director's office will be appointed to this place but will continue to draw Rs. 55, the excess of Rs. 5, over the maximum pay of the appointment being treated as a personal allowance. The increments of the Manager will be spread over a period of ten years while those of the Head Clerk, Librarian and Accountant will be spread over five years. Of the menial establishment of 72 hands (including farm servants) proposed by the Director, 36 appointments will be regarded as pensionable and 36 non-pensionable.

12. The existing and the sanctioned scale of establishment are shown in detail in the statement appended to this order.

Revenue (Agriculture), dated 24th February 1914.

The average cost of the establishment as revised will be Rs. 1,10,495¾ per year as against Rs. 46,411 at present, involving an increase of Rs. 64,084¾ per annum.

13. The main heads of expenditure are as summarised below:—

Section	Establishment and travelling allowance	Other charges	Total
	Rs.	Rs.	Rs.
Direction and Statistics	28,664	1,176	29,840
Agricultural	38,900	32,458	71,358
Chemical	20,100	5,146	25,246
Biological	20,912	5,088	26,000
Educational	19,100	3,556	22,656
Total ...	1,27,676	47,424	1,75,100

Government understand that out of the expenditure of Rs. 1,75,100, that is expected to be incurred on the department, a sum of nearly Rs. 1,04,000 will represent the cost of the work which will be done in close association with the cultivators and for their benefit as explained in paragraph 9.

Besides the above recurring charges, Government will be prepared to devote one lakh of rupees during the next three years for non-recurring expenditure on permanent works such as buildings, equipment, etc.

Orders will separately issue in regard to the opening of experimental farms in the malnad and in the Chitaldrug District.

14. In filling up the subordinate posts and in making recommendations for appointment to the superior staff, Government desire to lay special emphasis upon the desirability of securing the services of persons who will, whether in service or after retirement, live in the State and take part in agricultural pursuits, and who will in course of time become leaders of the agricultural population and help them to understand and appreciate the application of scientific methods and results to agricultural occupations. If such men are not immediately available, qualified men may be employed with the special sanction of Government in each case on a temporary tenure for a term of years not exceeding five. Such men may, if necessary, be paid at a reasonably higher rate than that provided in the scale, having regard to the temporary character of their engagement.

C. S. BALASUNDARAM IYER,
Secy. to Govt., Depts. of Edn. & Agri.

To—The Director of Agriculture in Mysore.
The Revenue Commissioner in Mysore.
The Comptroller, Mysore Government.
The Inspector-General of Education in Mysore.
The Conservator of Forests in Mysore.
The Registrar of Co-operative Societies in Mysore.
The Economic Botanist and Superintendent, Government Gardens.
The Secretary, Mysore Economic Conference.
The other Heads of Departments, and
The Deputy Commissioners of Districts.

Exd.—C. R.

C. S. BALASUNDARAM IYER,
Secy. to Govt., Depts. of Edn. & Agriculture.

Revenue (Agriculture), dated 24th February 1914.

Accompaniments.

(1) Letter No. 1257, dated Bangalore, 27th May 1912, from Leslie C. Coleman, Esq., M.A., Ph.D., Officer in charge of the Agricultural Chemist's Office, Bangalore, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments, Bangalore.

With reference to Government Order No. 6294-335—Agri. 52-11-2 of the 4th instant, para 4, I have the honour to forward a draft scheme for the development of the work of the Department during the next five years. This is a mere outline and I have purposely not gone into details as I propose communicating with Government in more detail on my return to Bangalore in January 1913, after I have had an opportunity to study more closely the work being done in connection with Agriculture and Agricultural education in Germany, Canada, the United States and Japan.

2. The chief aims which the Department of Agriculture in Mysore must keep in view, are in my opinion—

(1) To obtain a very thorough knowledge of the present agricultural practices throughout the State.

(2) To ascertain by carefully planned and scientifically controlled experiments how these practices can be improved.

(3) By demonstration throughout the State to bring to the attention of agriculturists the value of these tested improvements.

(4) To educate the agricultural population in as thorough a manner as possible so that they may reach a position such that they will be able to carry out the tested and demonstrated improvements in an efficient and intelligent manner.

3. I need hardly point out that progress along these lines is likely, at the best, to be slow but that seems to me a particularly strong reason why the work should be planned for a series of years to ensure uninterrupted progress along sound lines.

4. The work of the Department in the past has been handicapped in two ways. In the first place, the staff has been *hopelessly* inadequate to cope with the work to be done and in the second place the land set aside for experimental purposes is quite insufficient and moreover is situated in one soil tract only so that the results obtained can be properly applied only to those parts of the State where conditions similar to those found at Bangalore are to be met with

5. With regard to the insufficiency of staff I wish to compare on the accompanying table that part of the staff dealing with purely agricultural work (*i.e.*, excluding Chemist, Botanist, Mycologist, etc.) in Mysore with that in the Central Provinces, information with regard to the latter being taken from a communication just received from the Director of Agriculture at Nagpur.

Agricultural Staff, Mysore, for purely agricultural work.

Officers	No. sanctioned	No. appointed	Pay
			Rs.
Agriculturist (lately returned from England and still designated Assistant Chemist) ...	.....	1	300
Farm Manager	.....	1	100-150
Agricultural Inspectors	.....	1	45
	.....	2	30-5-50
Total ...	.....	5	525

Proceedings of the Government of His Highness the Maharaja of Mysore,

Agricultural Staff, Central Provinces.

Officers	No. sanctioned	No. appointed	Pay
			Rs.
Deputy Directors	2	2	500-50-1,000
Provincial Service	12	4	100-400
Subordinate Service Agricultural Assistants	1	.. ..	250
Do do do ...	2	.....	200
Do do do ...	3	.....	175
Do do do ...	4	3	150
Do do do ...	7	7	100
Do do do ...	8	10*	80
Do do do ...	10	13*	60
Do do do ...	15	4	50
Probationers	4	7*	40
Total ...	68	50	5,910†

6. As will be seen from the table, our staff is just one-tenth the size of the one in the Central Provinces and the monthly pay bill is less than one-tenth as great. When we consider that the population of Mysore is decidedly more than half that of the Central Provinces, the contrast is very striking. But this is not all. The Director of Agriculture, Central Provinces, informs me that he has lately submitted to his Government proposal for the improvement of the subordinate agricultural service and an increase in the numbers to bring it up to 93. This together with the 12 posts in the Provincial Service and the two Deputy Directors brings the total cadre up to 107 posts which have to do exclusively with carrying out work on experimental farms and conducting demonstrations of improved agricultural methods throughout the Province.

7. Besides this district staff in the Central Provinces there is also a headquarters staff consisting in addition to the Director of Agriculture, of a Principal of the Agricultural College, an Agricultural Chemist and an Economic Botanist each with a fairly large staff of Assistants. The Director of Agriculture, Central Provinces, has not furnished me with detailed information with regard to this headquarters staff.

8. I have taken the Central Provinces as an example because they form the nearest parallel to Mysore in point of size and because their agricultural policy has been a sound and progressive one which has already been productive of marked benefit to the agricultural classes.

9. I believe then that one of the first things to be done is to prepare a skeleton cadre for the Department to be filled up gradually as men become trained and funds become available. You will note that most of the higher posts in the Central Provinces cadre are still unfilled simply because men have not yet had sufficient experience to be advanced to these appointments.

10. Before presenting what I consider would be a fair draft cadre I believe it would be advisable to consider the question of experimental and demonstration work in general because upon the extent and possibilities of such work will depend the size of the staff which can be economically and profitably employed.

11. As already stated in my Annual Report for 1910-11, I believe that two more experimental farms should be opened in Mysore, *viz.*, one in the cotton growing area in the northern part of the State and one in the western part of the State in the region of heavy rainfall. I am not at all in agreement with the establishment of an experimental or demonstration farm at each district headquarters as I can see no sufficient reason for duplicating experimental work to that extent. The districts have been formed for administrational purposes and without any reference to differences in agricultural conditions and the establishment of district experimental farm seems to me not only extravagant but also scientifically unsound.

12. With regard to demonstration work there is no doubt that this should be under the direction of trained officers of the Agricultural Department if it is to be of any real value. No doubt much may be done by enlisting the sympathies of the landholders and raiyats but, for many years to come, it will be unsafe to leave the introduction of improvements in general in their hands without any expert guidance.

(*) The extra appointments here are covered by vacancies in the higher grades.
(†) This gives actual figures for the present as far as known to me.

Revenue (Agriculture), dated 24th February 1914.

13. Now, with regard to the type of officer required for this work, it seems to me that it would be extremely unsound to disconnect him from all other work of the Department and place him in a district to look after the introduction of agricultural improvements there. To attain the best results it seems to me essential that all officers carrying out demonstration work should be closely connected with the work of the experimental farm for the tract on which the demonstration work is to be carried out. In other words, each experimental farm should have attached to it a staff sufficient to supervise the experimental work of the farm in a proper manner and, at the same time, to carry out demonstration work in the area which has the experimental farm as a centre. This will ensure, first of all that the officers are kept in practical touch with the experimental work of the Department and in the second place that the demonstration work is supervised by properly trained and efficient men.

14. In order to provide a staff sufficient to make a beginning at demonstration throughout the State, it will be necessary to arrange for at least thirteen trained men being attached to the experimental farms. Of these six should be attached to the farm at Hebbal, two of whom will have work to do in connection with the practical instruction of students in the Agricultural College and the other four be utilized for demonstration work. Three should be attached to the experimental farm in Chitaldrug District and four to the experimental farm in the malnad or semi-malnad. The following shows the way the work would be arranged :—

Experimental Farm and Agricultural College, Bangalore—

1 Farm Manager,

1 Assistant Farm Manager,

4 Agricultural Inspectors for work in Bangalore, Kolar, Tumkur and Mysore Districts.

Experimental Farm in Chitaldrug District—

1 Farm Manager,

2 Agricultural Inspectors for work in Chitaldrug and part of Shimoga District.

Experimental Farm in Kadur or Hassan District—

1 Farm Manager,

3 Agricultural Inspectors for work in Shimoga (except Honnali and Channagiri Taluks), Kadur and Hassan Districts.

15. Now with regard to supervision over the farms and their staffs, one highly trained man will have to be in charge of the agricultural instruction in the College. In addition he should have immediate supervision of the staff of the farm including the demonstration staff. He might be termed Deputy Director and Professor of Agriculture. In addition there should be a second officer to have immediate supervision over the work of the two other experimental farms and their staffs. He might be designated as Assistant Director.

16. With regard to the other scientific work of the department certain increases should undoubtedly be made to ensure efficiency. With the return of Mr. B. Venkata Rao, who is now undergoing training in Germany, Chemistry should be fairly well looked after. I have already recommended an addition of one Assistant Chemist in conection with the draft scheme for the Agricultural College and this addition to the present staff should, I believe, be sufficient for the next five years. But the entomological and mycological divisions require strengthening. With the increase of work that will be thrown upon me in the way of general supervision I shall, I fear, have but little time for continuous scientific investigation work. I believe these divisions are of sufficient importance to warrant the sending of the two men now engaged as Assistants to Europe or America for special study for at least one year to fit them better for investigation work. In addition, I believe that two further Assistants in each of these branches should be provided for within the next five years.

17. There remains the question with regard to the Botanical side of Agricultural work. This is a very important side, as I have no doubt that one of the most hopeful lines for agricultural advancement in India in the near future lies in the direction of improving the crops by plant breeding. In India, this work is being done partly by the Deputy Directors of Agriculture and partly by the Economic Botanists attached to the various Agricultural Departments. At my suggestion, Mr. A. K. Yegna Narayan Iyer devoted a good deal of his time to this subject while in Cambridge and should be able to devote some time to this important work in addition to his other duties. I believe, however, that we should have in addition two Assistants with good training for Botanical work. One of these should devote

the whole of his time to plant-breeding work, while the other should be engaged primarily in teaching in the Agricultural College.

18. To recapitulate the following scheme seems to me to contain the essential details of a plan of development in the Agricultural Department during the next five years :—

I. Staff.

A. Director of Agriculture.

B. Agricultural Division—

1. One Deputy Director of Agriculture serving also as Professor in the Agricultural College.
2. One Assistant Director of Agriculture to supervise work in the western part of the State.
3. Three Farm Managers.
4. Fourteen Agricultural Inspectors (one to do duty as an Assistant Farm Manager on the Hebbal Farm).

C. Chemical Division—

1. One Agricultual Chemist.
2. One Chemist in charge of work for Geological Department.
3. Three Assistant Chemists.

D. Biological Division—

1. Senior Assistant Mycologist to undergo training in preparation for taking charge of Mycological work, when most convenient during the next five years.
2. Two Assistants in Mycology.
3. One Senior Assistant Entomologist to undergo training in preparation for taking charge of Entomological work, when most convenient during the next five years.
4. Two Assistants in Entomology.
5. Two Assistants in Botany one for investigation and one for teaching work.

Experimental Farms—

1. Experimental and Agricultural College Farm at Hebbal to be increased to at least 150 acres.
2. Experimental Farm in Chitaldrug District of about 150 acres.
3. Experimental Farm in Kadur or Hassan District of about 150 acres.

19. I propose leaving a discussion of the details connected with the funds required for the expansion indicated above to be communicated to Government on my return from leave and deputation, I may say, however, that in my opinion, Government should be prepared to provide for an expenditure of not less than Rs. 1,50,000 a year or about twice that at present being expended if the work is to progress and the department is to become a practical force in developing the resources of the State.

20. With regard to the work to be attempted by the department during the next five years I have the honor to present a rough outline.

I. Agricultural Section.

1. Experimental Farm, Hebbal—

(*a*) Study of the manurial requirements of the chief crops of this section of the State, *e.g.*, ragi, paddy, and sugar cane in continuation of work already begun,

(*b*) study of methods of cultivation with the special object of conserving soil moisture,

(*c*) plant breeding work on paddy and ragi with the object of obtaining better and higher yielding varieties,

(*d*) testing indigenous and imported varieties of sugar-cane with the object of ascertaining what varieties are best suited to the eastern part of the State,

(*e*) improvements in the making of jaggory and sugar,

(*f*) rotation experiments on paddy and sugar-cane,

(*g*) continuation of the present experiments on seasonal planting of sugar-cane to ascertain through how many months it can be profitably planted,

(*h*) testing of various varieties of cotton on the farm, with the object of ascertaining what ones, if any, are suitable for introduction into this part of the State where cotton is, at present, not grown,

(*i*) experiments on minor crops such as potatoes, maize, lucerne, groundnuts, etc.,

(*j*) growing of seed of such varieties of the various crops as have been tested and found suitable, for distribution among agriculturists of this part of the State.

Private seed farms should later on grow up to fill this need.

II. Experimental Farm in Chitaldrug.

(*a*) Manurial requirements of the chief crops of this part of the State, praticularly cotton.

(*b*) Plant breeding especially of cotton and jola with the object of improving the varieties now grown. Testing of new varieties with the object of introducing them if suitable.

(*c*) Testing of sugar-cane varieties with reference to their suitability to this part of the State especially with reference to their resistance to unfavourable conditions, such as lack of adequate water-supply. At present a very poor cane (Cheni) is being largely grown in this part of the State, simply because it can withstand lack of water better than the richer varieties. There is a probability that a better cane with an equal power of resistance might be grown.

This farm should, in the main, be a cotton farm and as such will have ample scope for very useful work.

III. Experimental Farm in the semi-malnad.

This farm should be utilized chiefly for experiments on paddy and sugar-cane and should have, as its special work, the testing and breeding of varieties especially suited to the conditions of this tract. The chances for the development of sugar-cane growing in the western part of the State seem to me to be bright and the work of such a farm should give a strong impetus to this branch of agriculture. With regard to paddy there is no doubt, much room for improvement both in quality and yield.

This farm should also take up the question of sugar and jaggory making to suit the moist conditions of this part of the State.

IV. Implement Depot.

The work already begun should be expanded and special emphasis should be placed on the manufacture of improved implements as cheap as possible and suitable to the local conditions. The department should also be made a centre of information for all those who wished to go in for power machinery in connection with water lifting, sugar-cane crushing, paddy hulling, etc. In order to accomplish this, a competent engineer of about the grade of a Senior Assistant Engineer should be attached to the department for say five years to look after this kind of work. Such a course has been followed in various other parts of India apparently with success.

At present improvements in the implements that are being extensively introduced are being worked out and it is proposed to push this work during the coming five years.

V. Chemical Section.

1. A study of the nutritive processes of the paddy plant forms one of the most important pieces of work that can be taken up, as upon it will rest a more rational treatment of that important crop. This will be begun as soon as possible and will extend throughout the five years.

2. The commencement of a soil survey of the State which will enable us to give more accurate advice with regard to the use of manures will also form an important part of this section's work.

3. All work in connection with the growing of improved varieties of sugar-cane will have to be done under chemical control and this will take up much of the time of the staff.

4. Work on the two important questions of nitrification and nitrogen fixation which has been in abeyance for lack of adequate staff, will be taken up again.

5. Work on the availability of various different manures for the chief crops of the State as well as investigations as to the conservation of soil moisture in connection with different methods of cultivation will also form important items of investigation.

6. Work in conjunction with the mycological section on the nutrition of the sandal and on the manurial requirements of the areca palm as well as on the best methods of preparation of fungicides for tropical conditions should be taken up.

VI. Mycological Section.

1. Work on the disease of supari will be continued. In addition to Koleroga there are at least two other diseases of a serious nature which await investigation.

2. Work on the smuts of jola and their prevention will be taken up.

3. *Spike disease of sandal.*—This is a very difficult piece of investigation work and will require a great deal of time. I have already formulated plans for beginning the investigation and hope to make a beginning within the next five years.

4. Work on the bacterial disease of potatoes will be finished.

5. The preparation of a text-book on the main plant diseases affecting crops will, it is hoped, be completed. This will entail a thorough survey of all the chief crops of the State with reference to their diseases.

6. Work along with the chemical section with regard to soil bacteriology with special reference to the nutrition of paddy and to the processes of nitrification and nitrogen fixation will be taken up.

VII. Entomological Section.

1. Work is at present in progress with regard to combating (*a*) the Jola Grasshopper, (*b*) the Rice Grasshopper, (*c*) Kamblihulas and will probably continue throughout the five years.

2. Many other important insect pests remain to be investigated, *e. g.*, (*a*) the pests of sugar-cane, (*b*) paddy pests, (*c*) pests of stored grain and other stored products, (*d*) fruit flies, (*e*) borers in fruit trees, (*f*) cotton pests. Investigations of these and other pests will be taken up as time will permit.

3. Silk culture.—It is in my opinion important that improvements in this industry should be carried out under scientific supervision. The present arrangement of having Sericultural Inspectors working in the State without any adequate control seems to me a highly undesirable one. The question of the introduction of Eri silk culture has been occupying my attention. In my opinion its introduction should be attempted only after the ground has been gone over carefully by this department. I am at present looking up the question of the disposal of the cocoons and if I find that a fair market can be assured for them. I shall make certain definite proposals to Government with regard to the introduction of this industry. There are also many questions connected with the diseases of silk worms and their prevention which should be investigated by this section.

4. Work on the parasites of serious insect pests; a beginning has been made and the work will be expanded.

5. Preparation of a text-book on the Insect Pests of Mysore, materials are being collected for this and it may be possible to issue such a book within the next five years.

VIII. Agricultural Education.

A beginning is being made and I hope, in the course of a year or so, to be able to make definite proposals to Government with regard to the establishment of vernacular schools in agriculture. I must, however, emphasize that great care will be required in starting such schools, otherwise they are likely to prove a decided failure and so retard the progress of agricultural education for many years. The question of agricultural education will form my chief subject for study during my absence from Mysore.

21. This letter gives simply a bare outline of the expansion in the work of this department which I believe should take place as rapidly as possible. I trust that Government will not object to my postponing the making of more definite proposals till my return, when I hope to be able to draw up a comprehensive and fairly detailed scheme both of expenditure as well as of work for the next five years. It will be prepared in ample time to be considered along with the budget of the Agricultural Department for 1913-14.

(2) *Letter No. 1754, dated 7th March 1913, from Leslie C. Coleman, Esq., M. A., Ph. D., Director of Agriculture in Mysore, Bangalore, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments, Bangalore.*

In continuation of my letter No. 1414 of the 27th May 1912, I have the honour to submit herewith for sanction a draft cadre for a re-organized Department of Agriculture. In connection therewith indication is given as to how many of the posts it is advisable to fill at an early date.

Revenue (Agriculture), dated 24th February 1914.

		Pay Rs.
A. Director of Agriculture	... ...	1,200-50-1,400
(*a*) Office Establishment—		
1. Office Manager	... ...	100-10-150
2 Head Clerk	... ...	60-5-75
3. Accountant	... ...	30-5-50
4. Clerks	one on	40
	one on	30
	one on	20
5. Librarian	on	55
(*b*) Servants—		
Jamedar ...	.. ...	12
Dafadar ...	. . ...	9
Mutchi ...	... ...	10
Peons 8 ...	on Rs. 8	64
Lascar 4 ...	on Rs. 7	28
Watchmen 2	on Rs. 7	14
Mali ...	... . .	10
Gardeners 2	on Rs. 7	14
Sweeper ...	... ...	7
	Total ...	168

Note.—(*a*) Office Establishment.—

The appointment of an Office Manager to relieve the Director of much of the routine correspondence is in my opinion essential. This matter was brought to the attention of Government by Dr. Lehmann in his letter No. 673 of 8th February 1908, where he pointed out the advisability of relieving the officer in charge of as much routine office work as possible There is of course much greater force in the contention now as in the meantime the clerical work of the department has increased to many times. Its former extent I may also point out that there is Manager at the head of the office establishment of most, if not all, heads of departments in the State. With regard to the other clerical appointments there is little change from the present cadre except in the case of an Accountant. The necessity for this post is increasingly felt. The accounts of the Implement Depot are constantly growing in importance while the general accounts of the office have been increasing very rapidly. It is to be noted here that the Agricultural Inspector on Rs. 50 included in Section III, Experimental Farms of the present establishment has in reality been serving as a clerk for several years. If then we compare the present clerical staff with the proposed one we get—

Present Staff.	Rs.	Proposed Staff.	Rs.
Head Clerk	75	Office Manager	100-10-150
Clerks (50) (30) 2 (20)		Head Clerk	60-5-75
Librarian (55) Supernumeray		Accountant	30-5-40
		Clerks one on	40
		one on	30
		one on	20
		Librarian (permanent)	55

With regard to the menia establishment I have nothing to say except that the office at present is very much undermanned and I have frequently had to hold an urgent message back simply because there was no peon available.

In connection with the garden I propose to have the whole compound laid out into plots for the growth of important and interesting indigenous plants for instructional purposes in the new school. Hence the necessity for a small gardening staff.

B. Agricultural Section—

	Rs.	
1. One Deputy Director on	... 400-50-700	
2. One Assistant Director on	... 175-25-400	
1. Three Farm Managers	... 70-5-100	Only two to be appointed this year.
	... 100-10-150	

B. Agricultural Section—*concld.*

		Rs.	
4. Fifteen Agricultural Inspectors (three to do duty as Assistant Managers on Experimental Farms)	7 on	50-5-70	Three already appointed.
	8 on	30-5-50	Seven more to be provided for this year.
Office Establishment—			
One clerk on ...	30		
One clerk on ...	15		
Menials—Peons 4 on ...	7		

With regard to the appointment of a Deputy Director and an Assistant Director I believe the need for them has already been sufficiently explained. In the case of the Farm Managers as I am proposing the establishment of only one additional experimental farm (the one in Chitaldrug District) during the coming year only two need be appointed at present. With regard to the Agricultural Inspectors I believe that for the coming year a staff of ten is sufficient; that means the appointment of seven in addition to the ones including the Superintendent of experimental plots we at present have. It is a matter of doubt whether we shall be able to procure that many suitable men, but provision should be made for them in the budget. The appointment of the remaining men can be made later on to meet the growing needs of the department. If the work of demonstrations is to grow, an increasing staff of Agricultural Inspectors connected with the experimental farms is an absolute essential.

The provision for office and menial establishment needs no comment. It will in all probability have to be increased within two or three years.

C. Chemical Section—

	Rs.
1. Agricultural Chemist ...	400-50-700
2. One Chemist in charge of analytical work for the Geological Department, etc. ...	500-50-700
3. Two Assistant Chemists on ...	150-25-400
4. One Junior Assistant Chemist on ...	70-10-150

Establishment—

1. One store clerk on ...	20	
One Laboratory man on ...	15-1-20	
Two Attenders one ...	9 and 8	respectively
2. Gas-house—		
One Engine Driver on ...	25	
Two firemen on ...	20 and 10	respectively.
3. Menials—Cooly on ...	7	
4 Peons on ...	7	

The appointment of an Agricultural Chemist is one which will have to be considered almost immediately. If Government do not feel disposed to appoint a thoroughly trained and experienced man, the only alternative is to send another for training to Europe. In my opinion it would perhaps be wiser to appoint a thoroughly trained man on Rs. 600—800 for a term of five years and in the meantime send one of the Assistants for training to Europe. I am however making separate representation to Government on this matter.

The Senior Assistant Chemist has for years been doing practically independent work and has been in charge of the entire office during my absence and must for the present at least have general direction of the Chemical Laboratory. Under these circumstances I think his grade should be increased in a manner commensurate with his responsibility.

The two further Assistant Chemists have had much responsibility placed upon them and are likely to have more in the future. Moreover their promotion in the past has been particularly slow. Considering the fact that the department has already begun a soil and manure survey and has many other items of important work which will largely devolve upon these two men I feel the above indicated grade is only a fair one for them.

The further Assistant Chemist has already been shown as an additional man in connection with the Agricultural School. I have however changed the grade from 70—100 (then proposed) to 70-10-150.

The establishment needs no comment. It is much the same as at present.

D. Biological Section—

	Rs.
1. One Senior Assistant Mycologist on ...	150-25-400
2. Two Assistant Mycologists on ...	70-10-150
3. One Senior Assistant Entomologist on...	150-25-400

Revenue (Agriculture), dated 24th February 1914.

D. Biological Section—

		Rs.
4.	Two Assistant Entomologists on ...	70-10-150
5.	One Senior Assistant Botanist on ...	150-25-400
6.	One Assistant Botanist	70-10-150
7.	One Chief Artist	75-5-100
8.	One Second Artist	50-5-75
9.	Three Fieldmen on	30 each
	Three do	15 each
	Three Laboratory men on	20 each
10.	One clerk on	15
11.	Servants—Two attenders on ...	10 each
	Three peons on	7 each

With regard to the Senior Assistant in Mycology and Senior Assistant in Entomology I believe they should later on be sent abroad for at least year's training. With the development of the department their responsibility is bound to grow, the field for work in these two lines is very great and the training given to the two men should be as good as possible.

With regard to the Assistant Botanists the senior man should be as good a man as we can get with a previous experience in plant breeding work. This branch of agricultural work has up to the present been entirely neglected in Mysore simply for want of a staff. It is perhaps likely to yield as rapid practical result as any line that can be possibly taken up and I feel that we should develop this line of work at all costs. The second assistant is provided for instructional purposes.

A word must be said with regard to the Artists. This side of the Department's work is very important and its importance will grow. The work of illustrating bulletins, of preparing drawings for use as wall diagrams in the Agricultural School, and in connection with demonstrations and lectures throughout the State as well as the preparation of lantern slides for illustrated lectures is endless and all requires a very great deal of skill. The present men have on the whole done very satisfactory work and their usefulness is now very much greater than when they were first appointed. Their services will also be available for instructional work in the Agricultural School where a course in drawing plans for farm buildings, etc., should form a part of the instruction given. Under these circumstances I believe that they should each be placed on a slowly rising grade.

The remainder of the cadre requires no special explanation. The two additional fieldmen and the one additional Laboratory man are provided for work in Botany.

I believe that the above cadre represents the minimum for a development of the Department in the slightest degree commensurate with the needs of the State. Agriculture is the predominant industry of the State and the great permanent source of revenue. There are admittedly vast opportunities for development in agriculture and I am firmly convinced that a properly manned and efficient Agricultural Department will be by far the most important factor in bringing about that development. I trust therefore that the Government may be pleased to sanction the cadre of the Agricultural Department now proposed by me and at an early date.

(3) *Letter No. 1801, dated 13th March 1913, from Leslie C. Coleman, Esq., M.A., Ph.D., Director of Agriculture in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments.*

I have the honour to state that in my letter No. 1414 of 27th May 1912, para 4, I have suggested the attachment of an Agricultural Engineer to this office especially in connection with designing and adapting of agricultural machinery for the needs of the raiyats. I wish now to bring to the attention of Government the further fact that an officer trained in Engineering will be very valuable in connection with the Agricultural School which is to be opened up.

2. Students in such a school should receive a certain amount of training in elementary surveying, levelling, etc., as also in the preparing of plans and estimates for the construction of simple farm buildings. Most of the Agricultural Colleges in India provide for such instruction and I believe that the practical value of such training will appeal to Government.

3. Although the above suggestion was made before the establishment of the Department of Industries and Commerce, I still believe that the provision of such an officer in the Agricultural Department would be a wise one and I see no danger of the work which he will be called upon to carry out clashing with that done by the above mentioned department. There is in my opinion a large field for the introduction of improved agricultural implements which must of necessity be tested by the Agricultural Department as to their suitability and the presence of an Engineer on the staff will greatly facilitate the development of this branch of agricultural improvement.

4. To obtain a suitable man a pay of Rs. 150-25-400 should be provided for. This should be sufficiently attractive to enable us to get the right type of man.

5. If appointed he should have under him for the present the following:—

One Mechanic	...	...	on Rs. 20-2-30
One Assistant Mechanic	...	...	at Rs. 12
One Carpenter	...	...	at Rs. 12
Two Engine drivers	...	...	at Rs. 12 each.

The first of these subordinate appointments has already been sanctioned but has, through oversight, been omitted from the draft cadre of the Department submitted with my letter No. 1754 of the 8th instant. The last four are new posts now proposed and I request that you will be so good as to have these items and the Agricultural Engineer included in the cadre under Agricultural Section. I also have the honour to request you to obtain Government sanction for the extra appointments enumerated.

(4) Notes and Memoranda furnished by Dr. Coleman in January and February 1914.

Memorandum on the work of the Agricultural Department.

The present memorandum will attempt to deal with all the activities of the Agricultural Department in a fairly comprehensive manner. It will include a discussion of work that is already being done together with that which it is proposed to take up within the next five years. In connection with much of the work planned for the future it is possible in many cases to give only a general outline as it is impossible to say how such work will develop. In any case it is hoped that Government will be able to decide on perusing this memorandum whether the proposed work is likely to be of such a character as to warrant the expenditure of the funds asked for.

For convenience the work of the Department is discussed under the following heads:—

Direction, Agricultural Section, Chemical Section, Biological Section, Educational Section, and Statistical Section.

It must be understood of course, that these various sections are not to be looked upon as so many water-tight compartments. On the contrary the closest co-operation and inter-relationship exists between them so that in many cases it is well nigh impossible to say exactly to which section a certain charge should be debited. However an attempt will be made in the present memorandum to make the division in the financial statement as accurate as possible.

In order that Government may more readily consider the financial aspect of the proposed changes in the various branches of the department a detailed financial statement is given at the end of the discussion on each section. This statement gives present expenditure under establishment and other charges, side by side, with the proposed expenditure at the end of five years under these two heads.

(A) Direction.

The duties of this section hardly require explanation or comment. However it may be well to point out here that while in most of the Provinces and Presidencies in India the Director is purely an executive and administrative officer with little, if any practical knowledge of agriculture and its related sciences the Director in Mysore is a highly trained scientific officer who at the same time has had the advantage of being brought up on a farm This together with the comparatively small size of the department leads naturally to a much more careful and personal supervision of the work of the department than would otherwise be the case. It should also lead to a more logical, uniform and sound development of the departmental activities.

In the financial statement appended it will be seen that the chief change proposed is the appointment of an office Manager. This appointment has been objected to by the Financia Secretary on the ground that the office is a small one and so does not require the services of such an officer. The Financial Secretary, however, seems to have overlooked the fact noted above, *viz.*, that the Director's training should fit him not only to administrate but really to direct the work of the department and that if he is not freed to a great extent from office routine the Government will not be getting the full value which they should receive from his services. Another important fact which appears to have been overlooked by the Financial Secretary is that in organizing the work of a new department the future success depends to an immense extent on the care and attention which is paid to each phase

of the work in the beginning. If the Director is not freed from much of the office routine which can be looked after equally well by an Office Manager, it will be impossible for him to use his energies in the way most likely to yield beneficial results to the State.

The small increase in office staff which has been provided for hardly requires comment in fact the provision in this regard is, I fear, to meagre. The present arrears in office work make it imperative that the office staff should be strengthened without delay (*vide* my letter No. 1754 of the 8th March 1913, to General Secretary and letter No. 471, dated 8th August 1913, to Secretary, Education and Agriculture).

With regard to the menial staff a considerable increase has been provided for. It must not be forgotten however that in the Agricultural Department peons are being constantly used as supplementary fieldmen (*vide* my letter No. 2259 of 7th May 1913, to General and Revenue Secretary) so much so that with the present menial staff frequently no one is available at the office to run on urgent messages.

Altogether the increases provided for under direction are not very great and I believe that the sanctioning of them by Government will lead to an increased efficiency which will very much more than compensate for the increased expenditure.

(B) Agricultural Section.

Present work.—The experimental work at present being carried on in this section is confined to one farm at Hebbal, and, of necessity, is also practically restricted to the important crops grown in the eastern part of the State.

The farm comprises at present an area on 50 acres, 30 acres dry land and 20 acres wet land. Of this area about 10 acres are occupied by roads, buildings, etc., and more land will have to be devoted to this purpose in the near future. Out of the present 50 acres, 20 acres (10 acres wet and 10 acres dry) were acquired about two years ago at a total cost of about Rs. 5,180-12-0. Arrangements have to be made for providing the students of the Agricultural school with land on which to carry out the practical growing of crops and this will require from five to ten acres of land. It has been therefore necessary to enlarge the farm still more and for this purpose 20 acres of dry land immediately west of the farm have been acquired from the Military authorities on lease and it is hoped that arrangements can be made for the more or less permanent retention of this land for farm use.

The work at present being carried out on the farm and being planned for the future may be classified as follows:—

A. Work on ragi, (*a*) experiments on manuring, (*b*) experiments on cultivation including time of sowing, depth and time of ploughing land, seed rate, etc., (*c*) experiments on rotation, (*d*) testing of various varieties and (*e*) breeding of new varieties of increased yield. Some of this work has already reached the stage where the results can be used for demonstration purposes and this will be done during the present year.

B. Work on sugar-cane, (*a*) testing of varieties, (*b*) testing of seasonal planting with the object of utilizing power machinery to the best advantage, (*c*) rotations with other crops to find the most suitable rotation, (*d*) experiments on jaggory-making. To quote one instance of practical results under this head the improvements effected in jaggory-making by the department have this year in one place already given an increased return of Rs. 1,240 to sugar-cane growers on 19 acres of cane, over what they would have obtained by their old methods. As the milling is not yet finished this will probably be increased to Rs. 1,500. This increase has been obtained at no appreciable increase of expense and the demand for jaggory-making demonstration work is now so great that the department is not able to meet it.

C. Work on paddy. Details as under A. Here again results have already been obtained which are being used in demonstration work.

D. Work on groundnuts, (*a*) testing of varieties as to yield and (*b*) rotation with ragi.

E. Work on cottons—Testing of varieties as to suitability for the eastern part of the State.

F. Work on dry land lucernes—Testing of varieties.

G. Miscellaneous work including trials of sorghums, maizes, etc.

The work of the experimental farm may be considered as more or less adequate to meet the needs of the following districts:—Kolar, Bangalore, major part of Mysore and

Tumkur and part of Hassan. This leaves the northern and western parts of the State without adequate experimental facilities. It is therefore proposed to open two new experimental farms. One of these farms will be situated in Hiriyur Taluk and will serve a dual purpose, *viz.*, (*a*) to ascertain and demonstrate the best methods of cultivation for lands under the Marikanave Reservoir for such profitable crops as sugar-cane, Cambodia cotton, etc., and (*b*) as a cotton and jola farm to breed improved varieties for the great cotton tract of the State. This farm will meet the needs of Chitaldrug and parts of Shimoga and Tumkur Districts. The other of these new farms will be situated in a suitable locality in the malnad, probably in Kadur District. Here experiments on existing malnad crops will be carried on with the object of improving them and at the same time other crops and varieties of crops will be tested as to their suitability for introduction into the malnad with the object of increasing the yield and extending the area under cultivation in that important section of the State. This farm will meet the needs of the major parts of Shimoga, Kadur and a part of Hassan.

The estimated non-recurring expenditure on the enlargement of the Hebbal Farm and the establishment of the new farms will be found at the end of this section of the memorandum.

Before discussing the proposed increase in establishment, it will be well first to discuss the present and proposed activities of the department in spreading agricultural improvement through the State. This will be done for the sake of clarity under various heads.

1. *Present work.*—Demonstratipns on the lands of private owners. This is undoubtedly the most practical method of persuading raiyats and landowners to take up improvements. It requires however careful supervision and constant work on the part of an adequate staff to obtain the best results. While a great part of the energies of the department has been expended in this direction in the past three or four years the hopelessly inadequate size of the district staff has made it impossible to carry out the work as intensively or over as large an area as is desirable. Among the lines of work that have been and are being taken up for demonstration may be mentioned the following (*a*) green manuring for paddy and sugar-cane, (*b*) single seedling transplantation of paddy, (*c*) use of oil-cakes for sugar-cane, (*d*) use of improved ploughs and other improved implements, (*e*) use of improved varieties of cotton, (*f*) introduction of improvements in jaggery manufacture. There is an impression in the minds of some that this work is too slow, but it must not be forgotten that in the past the small sizes of the district staff has made it impossible to keep one officer in a tract throughout the year or even the growing season to ensure that degree of continuity in supervision which is essential for rapid progress. In addition, the few officers have had in most cases to work single handed whereas with the establishment of experimental farms and the training of farm labourers on them these latter can be very largely used to extend the work of demonstration at a small cost to Government.

The results already obtained in India coupled with those obtained in other parts of the world convince me that practical results will be obtained more rapidly by this method than by any other. Especially is this the case if the sympathies and co-operation of organized local bodies of raiyats and landholders can be obtained. This matter will be discussed under the heading of work proposed for the future.

2. Demonstrations and lectures at jatras and fairs. This method of spreading agricultural information is being at present very largely used and during the present year such demonstrations and lectures will have been held at about 20 different fairs and jatras. In this way probably one lakh of people will be reached. I must however emphasize the fact that only a very small proportion of those reached by such short demonstrations are likely to be practically influenced whereas in the case of the individual demonstration plots probably at least 50 per cent of those on whose lands demonstrations have been held, will be persuaded to take up the improvement. Nevertheless undoubtedly the work at fairs and jatras is important and it will be extended.

3. Collection of people at shandies, etc. Where an officer of the department is touring in a certain taluk he tries as far as possible to meet raiyats and those interested in agricultural improvements when they are gathered together at the weekly shandies. This is an excellent way to spread information by word of mouth in a rapid manner.

4. Introduction of improved implements. At present the Agricultural Department is operating an Implement Depot for the sale of improved implements which on trial have been found suitable for Mysore. This depot is at present financed out of a permanent advance of Rs. 5,000. Its work is constantly growing. The introduction of improved ploughs through this depot and the agency of itinerant officers of the staff, has already reached considerable proportions and I estimate that if there is no shortage in supply, about 500 ploughs will be

sold during the present year. A record is kept where each plough goes to and officers on tour attempt as far as possible to see that such implements are being properly used. The work under this head however is growing so rapidly that increased funds and more men for training raiyats in the use of the implements are urgently needed.

5. *Crop surveys.*—Plans have been made to obtain accurate information with regard to some of the chief crops of the State. A beginning has been made with sugar-cane. The chief sugar-cane areas of the State have been selected and detailed enquiry sheets have been prepared which are to be filled out by touring officers when they visit these sugar-cane tracts. In this way, it is hoped to be able to obtain an accurate picture of the present state of sugar-cane cultivation which will enable the department to know just where demonstration work is most urgently required and is likely to have the greatest effect.

Future work.—All the above lines of work are capable of great expansion and with the increase of staff in the section as outlined below it will be possible gradually to extend the demonstration work to all the districts and finally to all the taluks of the State. An effort will be made to utilize bodies of men such as Co-operative Societies and Agricultural Associations in connection with demonstration work. The Agricultural Department will associate itself as closely as possible with the Co-operative movement as I look upon that movement as probably the most important single factor in the agricultural development of the State. The Co-operative stocking and sale of implements and spare parts, Co-operative Seed Farms where seed of improved varieties will be tested and introduced by the Agricultural Department, Co-operative sale of improved varieties of cotton and improved jaggory, Co-operative threshing of crops with improved threshing machines, Co-operative use of improved cultivating implements, Co-operative manufacture of jaggory, Co-operative dairying, Co-operative manure supply, etc., are some of the lines where the Co-operative movement can prove of inestimable value. However, I must here emphasize the fact that this Co-operative Agricultural work will be almost certainly doomed to failure unless carried on under the careful and, in the initial stages, constant supervision of the Agricultural Department.

The work of Agricultural Associations must also be largely controlled and guided by the Agricultural Department if it is to be of real practical value and with a strengthening of the staff of the department an effort will be made to make these bodies as well as other local bodies which have for their object the improvement of agriculture, more efficient than they are at present.

It is hardly necessary for me to go into further detail as to demonstration work as the programme already prepared by me and submitted to the Dewan indicates the character of work that is to be carried out. It is now necessary to discuss the present and proposed establishment of the Agricultural Section and to indicate the necessity for the proposed increases under establishment.

The present staff available for all work under the Agricultural Section is as follows:—

1. Assistant chemist doing duty as Agriculturist and in charge of the Agricultural School.
2. Farm Manager.
3. Assistant Farm Manager, in charge of practical classes on the farm and whose pay is therefore to be charged to the Agricultural School.
4. Seven Agricultural Inspectors, etc., four of whom are temporary for one year with effect from 10th July 1913.

Of the Agricultural Inspectors, all but one have been less than a year in the service and so require considerable training and should have a good deal of supervision in their work. This supervision cannot at present be provided.

The proposed staff is as follows:—

1. Deputy Director in charge of school and also of supervising work in the eastern section of the State, *viz.*, Kolar, Bangalore, Tumkur and Mysore Districts.
2. Assistant Director supervising work in the western part of the State, *viz.*, Chitaldrug, Shimoga, Kadur and Hassan Districts.
3. Agricultural Engineer.
4. Three Farm Managers for the three Experimental Farms.
5. One Assistant Farm Manager for the Hebbal Farm, also in charge of the practical work of the Agricultural School.
6. Fifteen Agricultural Inspectors, two to do duty as Assistant Farm Managers on the new farms.
7. Office establishment, two clerks.
8. Staff for Agricultural Engineer ... { One Assistant Mechanic. / One carpenter. / Two Engine drivers.
9. Menials, four peons.

As already pointed out district work to be successful requires a great deal of careful supervision on the part of well-trained and experienced officers. It would, I believe, be extremely unwise to send inexperienced Agricultural Inspectors out into the districts without adequate provision for the careful supervision of their work. With the great increase in the general work of the department and from the fact that the Director has to exercise a guiding hand in all sections of the department's activities it will be quite impossible for him to give that constant and detailed supervision of district work which is essential to success. There is thus a necessity for two superior officers (Deputy Director and Assistant Director) under him to carry out this most important work. The criticism has already been made that the proposed staff in the Agricultural Section is top-heavy. To this I have already replied that in the beginning of any department the provision of an adequate experienced supervising staff is of prime importance. The Agricultural Inspectors and even Farm Managers, will have to be recruited from inexperienced graduates of Agricultural Schools and Colleges and to send them out into the districts and on to the farms without adequate supervision on the part of experienced men would be simply to court disaster.

The provision of 15 Agricultural Inspectors may seem at first sight too liberal but as pointed out in previous communications two of these go to the farms as Assistant Farm Managers and it is certain that in some districts the work will develop so rapidly that one man cannot cope with it. During the present year, as many as three Inspectors have been engaged in one district at the same time. It is thus essential besides having a man for each district to have in addition a reserve force who can be utilized to assist the others during the busy seasons of the year and who can also be employed on the farms when work there is pressing. It will be impossible to fill all of these posts at once simply because men are not avilable, but ample provision should be made for the expansion of district work and this can be done only by providing for the appointment of extra men when they are required and the men are available.

It must also be pointed out that it is not proposed to utilize the services of Agricultural Inspectors strictly according to districts. Each Experimental Farm should be considered as a centre from which demonstration work should extend and the Agricultural Inspectors will be able to draw upon the trained laborers of the farms to assist them in demonstration. These laborers, drawn as they will be from the cultivating classes and with an intimate knowledge of indigenous methods, will, in many cases, be able to reach and influence raiyats in a way that the Inspectors themselves could not. In this connection, I may point out that the use of such trained laborers has been found extremely valuable in the Central Provinces where they are being used to an ever-increasing extent. I need not point out that this allows for very much more economical work than would be the appointment of a large number of Agricultural Inspectors. Trained laborers are already being used by the Mysore Agricultural Depatment for a great variety of demonstration work and I propose to make this an important feature of the future work of the department.

The appointment of an Agricultural Engineer is, I think, also essential. If the lands under the Marikanave are to be made productive a great deal of drainage work will have to be undertaken there and this will require the services of an experienced officer. There is also considerable scope for drainage work under a number of tanks where the soils are saline and if the Kannambady Irrigation Scheme goes through drainage plans will have to be worked out for that also. I do not think this work should be left entirely to the Public Works Department as after all drainage is a question most intimately connected with agriculture.

In addition to the above lines of work much has to be done in the way of adapting agricultural implements and machinery to Mysore conditions and this also requires the supervision of an Engineer. A course in Elementary Survey and Mensuration has been included in the curriculum of the Agricultural School and this also requires expert supervision.

In this connection, I may point out that many of the Indian Agricultural Departments have already an Agricultural Engineer on the staff and it is only a matter of a short time when they will all be thus provided.

A complete statement of the proposed establishment of the Agricultural Section is appended. The subordinate posts do not, I believe, require any explanation, or their inclusion any justification. A separate statement of the proposed expenditure on Experimental Farms is also given. In connection with this, the only item which requires special comment is the comparatively large provision made for labour. I have already indicated that farm labourers will be very extensively used under the supervision of Agricultural Inspectors for the carrying on of demonstration, so an adequate provision under this head is necessary.

With regard to the sum allotted for the purchase of land for the Chitaldrug Farm, if as is proposed this farm is situated under the Marikanave Reservoir, the major portion of this

Revenue (Agriculture), dated 24th February 1914.

sum will not be utilized. It was originally included because it was thought that it might be necessary to purchase a fairly large area already under good cultivation so that a generous provision was made for this contingency.

Statement in connection with the enlargement of Hebbal Farm and the establishment of new Farms.

		Rs.
1. Establishment of a steam joggery plant in connection with Marikanave Farm (non-recurring) *vide* my letter No. 1200 of November 4th, 1913	...	20,000
2. Establishment of a Dairy and Breeding Station (non-recurring expenditure) *vide* my letter No. 1200 of November 4th, 1913 ...	...	15,300
3. Students' Visitors' Quarters (non-recurring expenditure) *vide* my letter No. 1200 of November 4th, 1913	...	11,000

Total	...	1,11,000

(C) Chemical Section.

Present work.—This section is, at present, engaged in controlling scientifically experiments of all sorts that are being carried out on the experimental farm. This work includes (*a*) the determination of soil moisture to see to what extent special methods of cultivation are conserving the moisture in the soil for use during periods of drought, (*b*) soil analysis to see what effect various methods of manurial treatment are having upon the fertility of the soil, (*c*) analyses of sugar-cane and jaggory in connection with the sugar-cane and jaggory experiments (the services of the chemical staff are also being drawn upon by the Department of Industries and Commerce in this connection), (*d*) analyses of soils and manures for land-holders and raiyats, (*e*) analyses of fungicides used in the work of the Biological Section and (*f*) miscellaneous analyses for other Government Departments and private parties.

Future work.—The work, as above outlined, is certain to expand rapidly in the future especially with the establishment of further Experimental Farms. A soil survey of the State should also be attempted to furnish us with data upon which to recommend manurial treatment. In this connection, a survey of the soils under the Marikanave Reservoir is of prime importance in planning any extensive improvement of that important tract. In fact, the work awaiting the Chemical Section is both vast and important and the provisions for increase of staff err decidedly on the side of economy. Undoubtedly in the course of time, this Section will have to be very decidedly strengthened, but this may be left over till the officer who is now under training in Germany has returned and has gained some more experience.

Appended is a statement of the present and the proposed staff and charges under this Section. In this connection, it must be stated that although the Senior Assistant Chemist is shown as doing work for the Geological Department and his pay is debited to that department he is at present and will, for some years at least, be in general charge of the Chemical Section and Laboratory. He is the Senior officer and has a fairly detailed knowledge of the work of the department, as he was in charge of the department during my absence and is in charge of the current duties while I am away on tour. It would therefore perhaps be fairer to debit part of his pay to the Agricultural Department.

With regard to proposals for the rest of the staff, the post of Agricultural Chemist cannot be filled for at least three years as the officer whom it is proposed to promote to that post has just begun his studies in Germany and these are likely to extend over three years. Whether he is finally appointed or not, should, of course, depend upon the sort of report that is received from the Professors under whom he is working. It should not be taken as a matter of course that he will be appointed to the post immediately on his return.

With regard to the Assistant Chemists, one will be engaged practically his full time as Teacher in the Agricultural School so that leaves only two Assistants for carrying on the laboratory work. This is the absolute minimum and I fear they will be unable to cope with the large amount of work that there is to do.

With regard to the grades for Assistant Chemists, that for the two posts on Rs. 150—25—400, two of the present Assistant Chemists have been in the service for many years. One of these has been sent for training in Europe and his post cannot be permanently filled up till after he has returned and has been appointed to the higher post of Agricultural

Chemist. The other Assistant Chemist will thus have a good deal of responsibility thrown upon him and is, I think, deserving of being placed on a higher grade.

The rest of the establishment in this Section hardly requires any comment. The only new post of any importance being that of Store clerk. With our large stock of apparatus which has now to be increased to supply the Agricultural School the necessity of a man to keep charge of the stores must, I think, be quite clear.

(D) Biological Section.

The Biological Section, as proposed, will be divided up into three Sub-sections, *viz.*, Mycological, Entomological, and Botanical. As these three branches are represented in the present work of the Section, I shall deal with present and proposed work under these various heads.

Mycological.

Present work.—At present, the chief work under Mycology is in connection with Koleroga, a disease which is responsible for losses aggregating several lakhs of rupees each year. The work that has already been done in connection with this disease represents, I believe, the most soundly organized and most successful campaign that has ever been carried out against a plant disease in India. It is moreover work, which has attracted attention outside the confines of the State for the Departments of Agriculture in Bombay and Madras have both taken up the work and are carrying it out on the lines originally worked out here.

This work was begun in 1908 with experments in two gardens. In 1909 this was extended to six gardens in various parts of the affected area. From 1910 the work was enlarged and spraying was begun in gardens throughout the infested area at the garden owners' expense. In 1912, the work had progressed so far that a beginning was made in selling sprayers and during the two years 1912 and 1913 about seventy sprayers have been sold. During 1913, between 150 and 200 acres were either sprayed or protected from Koleroga by the garden owners having spraying materials and sprayers ready in case the disease should break out. During 1914, it is estimated that between 75 and 100 sprayers will be sold and arrangements are being made for the supply of materials sufficient for 800 or 900 acres.

In addition to this practical demonstration work, experimental work is continuing in two gardens, one at Murtur in Sagar Taluk and one at Agumbe in Tirthahalli Taluk. In the former, various different spray materials are being tested to see if the process can be cheapened. In addition, work has been begun on the manuring of betel gardens and on the growing of different varieties with the object of ascertaining whether a disease resistant variety can be raised. For this work, it is necessary to have the garden permanently in the possession of the department. At present, it is held on long lease but this is not satisfactory, as it is necessary to erect buildings for the housing of a small staff and for the storing of chemicals and the crop. In my letter No. 1211 of the 5th November 1913, I have proposed that the gardens together with some wet land contiguous to it, should be bought at a cost of about Rs. 6,000. In addition, a non-recurring grant of Rs. 2,500 for buildings, etc., and a small recurring grant for running expenses has to be provided for. All this should be met from the Supari Cess Fund and so is not to be included in the regular budget of the department.

In this connection, I may point out that up to the present, the garden has more than paid its way. During the past year, the total expenses on cultivation, spraying, harvesting and other experimental work have been Rs. 298-5-6 while the receipts have been Rs. 458-6-10 leaving a profit of Rs. 160. I believe the garden can be continued practically on a self-supporting basis.

With regard to the work at Agumbe, it is there restricted to an attempt to stamp out the disease and in this the department has been very successful. After another year's treatment the garden will be left without treatment to ascertain if the disease has been permanently stamped out. This work of stamping out the disease by thorough treatment will now be extended to other isolated areas wherever the department can induce the requiste amount of co-operation on the part of the garden owners.

Future work.—The work in connection with Koleroga will, of course, be extended, but as time goes on, it will be handed over more and more to the garden owners themselves, so that the staff will be freed for work in connection with other diseases. Among the pieces of work to be taken up are the following:

1. *Work on other diseases of the areca palm.*—There are at least two other diseases of the areca palm, which do considerable damage and these will be taken up.

Revenue (Agriculture), dated 24th February 1914.

2. *Work on potato diseases.*—The cultivation of this crop is extending quite rapidly so the importance of its diseases is likely to increase The work on them will, it is hoped, be brought to a conclusion in another year as far as experiments are concerned. The work of demonstration will, however, remain and this is, of course, the part of the work, which is of more practical importance.

3. *Work on smuts of jola.*—This is an important disease which causes large losses each year. Already certain experimental results have been obtained and demonstrations have begun. This work will be extended.

4. *Diseases of coffee.*—There are a number of serious diseases of this important crop as yet no time could be devoted to them, but it is hoped that a beginning can be made before long.

5. *Spike diseases of sandal.*—This important disease still awaits investigation. A small beginning has been made and the work will be continued as rapidly as possible.

6. *Miscellaneous diseases.*—There are an immense number of diseases of the various crops of the State, which require investigation and which, after the proper organization of the department, will receive more attention than they have in the past.

7. Preparation of an illustrated Handbook of Plant.

Diseases.—The preparation of a Handbook explaining in easily understood language, the causes of the chief diseases in the State with directions for combating them should be of great value to landholders and educated raiyats. This Division is gradually collecting information and material for the preparation of such a Handbook and will be published as soon as possible.

Entomological Section.

Present work.—Up to the present, the chief work of the department has been in connection with two important grasshopper pests and with a hairy caterpiller, which does extensive damage to young crops in certain sections of the State. Demonstration work in connection with these pests has been very successful and an especially interesting feature has been the utilization of children in carrying out combative measures. Other work that is in hand is a study of the pests of stored grains and other stored products and of the methods of preventing the extensive damage they cause A third important item is the work against Green Bug of coffee, which has lately appeared in Mysore and which threatens to cause extensive damage on coffee estates. An attempt is being made to check and exterminate this pest on the estates of Indian coffee growers and this will occupy the time of one Assistant and a number of the subordinate staff during the rest of the year.

Future work.—In addition to the above work, which will require a great deal of time for demonstration purposes for some years to come, a study of the important pests of individual cultivated crops will be taken up. Paddy and sugar-cane alone have a dozen or more important insect pests attacking them, all of which require study.

In addition to this work, the preparation of an illustrated Handbook of the insect pests of the State will be taken up. This Handbook will contain descriptions of the insect pests their time and mode of attack, their life histories and at what stage or stages they can be most advantageously combated. Lastly it will contain practical instructions for the combating of the pests. The preparation of such a Handbook will involve a thorough survey of the State so as to enable us to know just where the various insect pests are prevalent.

Botanical Sub-section.

Work in this connection has just been begun and the staff consists of only one Assistant on Rs. 70 a month. He has already taken up plant breeding work in connection with ragi and to a lesser extent in connection with sugar-cane. The work with ragi consists firstly in collecting the various varieties of this important crop in the State and the testing of them against each other as to yield. It has been found that all of the so-called varieties are mixtures and the next step is to get the varieties pure. From these pure varieties, individual plants which give the largest yield will then be selected and from them improved high yielding strains will be procured.

Future work.—The work in connection with ragi will require a great deal of time and attention and should occupy most of the time of one man for the next three or four years. Similar work is to be done with paddy, cotton and many other crops. All of this work is of immense practical importance. I know of no surer and more readily applicable method of increasing production in the State than by supplying seed of high yielding strains of the chief crops. Before this can be done the necessary preliminary breeding work must be carried out.

(E) Educational Section.

While the practical demonstration work of all sections may properly be considered to be educational in nature, for the sake of convenience of discussion the work of this section may be taken to include.

(*a*) Direct educational work in schools and farms,

(*b*) Publication of bulletins, circulars, special articles, etc., and

(*c*) Lecture courses on agricultural subjects.

At present under the first head there is one school providing a two years' course in Agriculture and arranged to accommodate from thirty to thirty-five students in the two years. We are at present in the first year of the school. This school has for its chief purpose the training of sons landholders to take up the active supervision of work on their fathers' lands. The course is being made as practical as possible only so much elementary science being given as seems essential to an intelligent understanding of the various agricultural processes.

Under the second head the department is at present publishing bulletins and circulars in English and Kannada giving the results of the work of the department which are of practical value to the raiyats. Up to the present 9 bulletins and 11 circulars have been published. In addition a series of articles on practical subjects is being published in the two leading vernacular newspapers of the State. These papers have a combined circulation of about nine or ten thousand.

With regard to lectures on agricultural subjects these are being given regularly at jatras and fairs where demonstration work is done.

Future work.—The Agricultural School at Bangalore will be continued. At the end of two years if there are any of the students who have shown special aptitude and express a desire for further training these will be given a further training of one or two years to fit them to take up agricultural posts that may be vacant in the department.

In addition to this school, arrangements will be made to hold short vernacular courses for raiyats on the various experimental farms. These courses will be given not with the object of imparting general agricultural instruction but to provide training in special subjects such as the manufacture of jaggery, cultivation of sugar-cane, use of improved implements and machinery, transplanting of paddy, etc.

With regard to more elementary instruction I believe much can be done through the co-operation of Educational and Agricultural Departments in planning work in rural science either in connection with the higher classes in rural schools or as special continuation courses in connection with those schools. To ensure success such work should, in my opinion be supervised by officers in the Agricultural Department with special training. Each of these officers could supervise this special work in a number of schools. Their services might also be utilised in giving instructions to adults in the matter of account keeping, etc., provided there is any likelihood of a demand for such instruction.

The question of starting Vernacular Agricultural School in the districts on lines similar to the one already in operation at Poona should also be considered and if there appears to be a real local demand for such schools one or two might be started as an experiment. It will be several years before this can be done as teachers will have to be trained in the meantime.

Under the head of "Publications" the present series of bulletins and circulars will be continued as well also the publication of articles in the vernacular press. In addition an Agricultural Calendar containing information on agricultural matters will also be published.

Under the head of "Lectures" as noted above many lectures in the vernacular are at present being given in connection with fairs and jatras throughout the State and this work will be gradually extended in the future. In addition arrangements will be made for a more advanced series of lectures which will be given for the benefit of Government officers, landholders, etc.

(F) Statistical Work of the Department.

At present the only work the department is doing which may properly come under this head is the collection of information with regard to special crops. Along with a great deal of purely agricultural information details with regard to yields, cultivation, expenses, gross and net returns, etc., are being obtained and these will be worked up into a report on each crop. Sugar-cane is being investigated in this manner at the present moment.

In the future if it is thought advisible by Government the Agricultural Department is prepared to take over the examination and publication of agricultural statistics. In that case it will still be necessary for the Revenue authorities to furnish the figures on which to base

the reports. The district staff of the Agricultural department will when properly organised be able to check these figures especially as to yield by enquiries in the districts and also by special crop cutting experiments similar to those which have been commenced lately by the Agricultural Department in the Madras Presidency.

In addition to an Annual Report of the Agricultural Statistics I propose the publication of special crop forecasts and also special crop reports which will give more detailed statistics with reference to some of the more important crops of the State. I am at present collecting information from other parts of India as well as other countries with regard to the best method of checking and publishing agricultural statistics and hope soon to be in possession of much valuable information on the subject.

For the present I propose that this work shall be carried on directly by the Director's staff and have therefore provided only for an extra expenditure of Rs. 1,000 per annum, at first to provide for a small addition to the clerical staff. Later on if the work proves to be valuable it may be necessary to increase the staff and have a more highly paid officer in charge of the work. Hence I have provided for an annual expenditure of Rs. 5,000 at the end of five years.

In addition to the above items the question of Soil Survey, Crop Survey and Cattle Survey might also be considered under this head though the actual carrying out of this work will have to be left to the various other sections of the department and in the case of Cattle Survey the close co-operation of the Civil Veterinary Department will have to be obtained.

(G) Note on the Publication of Statistics.

1. The work of collecting agricultural statistics will have to remain largely the work of the Revenue Department. The new Village Improvement Forms if filled out properly should prove of great assistance in checking returns, but it will, I fear, be very difficult to get accurate figures as to yields. The figures as to areas under a given crop in a given year should however be more accurate.

2. The Agricultural Department could take over the work of publishing and checking the statistics. The publication might take the form of (*a*) Bulletins known as Crops Reports with the statistics of special crops. A beginning should be made with money making crops such as sugar-cane and cotton, chiefly because the areas under these crops are restricted; and in the second place because, especially in the case of cotton, the yield can be checked more or less accurately by the trade and railway returns. In addition these are to a great extent cash crops so that the growers can calculate their returns much more accurately than they could with food crops such as ragi or paddy. (*b*) A report on the same general lines as the present Season and Crop Report published by the Revenue Department might be issued annually by the Agricultural Department. This could be published as the part of the Annual Report of the Department, but, I believe, it would be advisable to publish it as a separate report.

I may note in conclusion that in Canada and I believe also in the United States the returns as to yield for any given crop in a given year are sent in by voluntary reporters so that on the face of it we should have better facilities for the collection of accurate agricultural statistics than they have in America.

(H) Note on the Development of Agricultural Education in Mysore.

1. *Agricultural School.*—The course as at present arranged is a two years' one in which the teaching in the sciences is of an elementary nature and strictly subordinated to the training in agriculture. The instruction in agriculture consists of a large amount of practical training supplemented by easily understood lectures. It is to include also practical training in carpentry, blacksmithing, fitting and elementary land surveying. Entrance to the course is by an examination to test the student's knowledge of English and Arithmetic. Arrangements as at present made allow of a total enrolment of about thirty to forty students but should the school prove popular the numbers could be increased to fifty or sixty without any very great extra expense. The best students will if they so desire and the needs of the department require it be given a further more scientific course preparatory to taking them into the department service. The main purpose of the school should, however, remain the training of sons of landholders to take up the active management of their farther's lands.

I may say this school is in general planned along the lines of the American Agricultural High Schools which are developing with great rapidity in the United States at present. There is in my opinion little if any scope for an Agricultural College in Mysore, at present.

2. Vernacular courses on experimental farms. These will be planned for more influential raiyats and their sons with the object of giving them special training in special branches of agriculture. They will extend from fifteen days to about three months and will

take up such subjects as, (*a*) sugar-cane cultivation, (*b*) use and repair of improved implements, (*c*) single seedling transplantation and green manuring of paddy, (*d*) elementary dairying, etc. These will correspond to the so called farmers courses which are provided by Agricultural Schools in Europe and America.

3. *Rural Science Instruction.*—The development of primary education in rural districts will almost certainly if not guarded against bring with it one great danger, that of a discontent with rural conditions and a desire on the part of the boys so trained to migrate to the towns. This has been the case both in Europe and America. To prevent this and at the same time to fit the sons of the raiyats for more efficient and productive work on the land, it is essential that the training in Rural Primary and Middle Schools should be given with special reference to rural conditions. In my opinion special work in arithmetic dealing with the practical questions of farm life should be introduced into the higher classes; also work in reading writing, etc., should all be given a rural tend. In addition an experiment should be tried in introducing special work in Elementary Rural Science into the upper classes of selected Primary Rural Schools and Middle Schools. For carrying out this work the teachers should be given a special six months' training in the Agricultural School and scholarships for the allowing of such training might be provided by the Educational Department. The actual work of instruction in this subject should be supervised by special Itinerant Agricultural Instructors in the Agricultural Department who could also utilize their spare time in giving instruction to adults in the villages where they do their supervising. I would not have this work introduced too rapidly as its success depends almost entirely on the kind of staff available for the work.

4. *Vernacular Agricultural Schools.*—A school of this type has been opened at Poona and seems to be doing good work. Its chief disadvantage is the relatively great expense connected with it, as, at present, all the expenses including the board of the students met by Government. These schools to be a real success must in my opinion be to a large extent supported locally. It is a subject which might well occupy the attention of District Committees as there is ample scope for one such school in each district if funds are available. Such schools should form a sort of connecting link between the rural science instruction in the Primary and Middle Schools and the Agricultural School at Bangalore.

(I) Note on Co-operation in relation to Agriculture.

One of the most striking features of the recent meeting of the Board of Agriculture in India was the mass of evidence there presented as to the growing use which is being made of Co-operative Societies for agricultural improvement. Among the lines of work cited, as, at present, being taken up by such societies may be mentioned (*a*) Co-operative Seed-stores and Farms and Farm Implement, (*b*) Co-operative Dairies, (*c*) Co-operative Milk-supply Societies and (*d*) Co-operative Manure-supply Societies. Societies along all these lines are at present in working in various parts of India and are apparently proving successful. In all cases the societies were formed and are being run with the assistance and supervision of the Agricultural Department.

In Mysore all these lines of work should be kept in view. As regards Seed-stores and Seed-farms, before these can be opened, the Agricultural Department will have to breed and propagate improved seed of the chief crops to provide the initial supply and this will take some time. I look upon this, however, as one of the most important lines of work which the department can take up.

In addition the following occur to me as capable of development and extension in the future:—(*a*) Co-operative jaggory manufacture.—In this connection I may point out that there, at present exists, in many places, a good deal of co-operation in the milling of cane and manufacture of jaggory. The Agricultural Department has this year carried out a demonstration of jaggory manufacture at Kibbanahalli in Tumkur District where the sugar-cane growers were persuaded to co-operate and were provided with mills and pans on hire and with adequate supervision in the early stages by the Agricultural Department. The results have been very gratifying, resulting in a largely increased return to the cane growers. Largely as a result of the success at Kibbanahalli, we are receiving more demands for assistance in jaggory manufacture than we can comply with. With regard to the use of power mills for jaggory manufacture, I believe here also that the time is ripe for co-operative action.

(*b*) Co-operative supply of improved implements such as ploughs and their spare parts. Later on the repairs of such implements may also be taken up (*c*) Co-operative running of improved implements such as threshing machines, etc.

During the present year, I hope to be able to make a beginning in establishing branch depots for the supply of implements and their spare parts with Co-operative Societies.

It is essential however that great care should be exercised both in starting such societies as well as in supervising their working so as to avoid failure.

No doubt there are many more lines along which Co-operative Societies will be able to assist in the development of agriculture and rural industries in general but the ones noted give an idea of the valuable work that may be done.

Revenue (Agriculture), dated 24th February 1914.

(J) Programme of the Agricultural Department, Mysore.

I. Agricultural Section.

(a) *Increase of production.*

At present being done	To be done next year	To be done in five years
(1) Introduction of improved cotton varieties, which in normal seasons, yield from 15% to 20% more than those at present grown; about 20,000 lbs. of seed enough for 3,000 acres distributed during the year. (2) Improved ploughs are being sold at the rate of 500 to 600 a year. These should allow of an increase of 5,000 acres in the area that can be ploughed with the same men and bullocks. Other labour saving implements are also being sold in large number which should allow the cultivator to extend his cultivation greatly. (3) Increase of production of sugar-cane and paddy by introduction of better manurial methods. A beginning has been made in demonstration and it has already been shown that an increase of from 50 to 100% is possible in many cases.	(a) Extension of work on cotton especially in introduction of Cambodia (b) Extension of use of green manures for paddy and sugar-cane, also single seedling transplantation and seed selection. (c) Extension of use of improved implements especially ploughs and better methods of conserving soil moisture. (d) Extension of growth of better varieties of sugar-cane in suitable areas. (e) Improvement in jaggery manufacture. (f) Extension in use of suitable manures for sugar-cane. (g) Extension of introduction of improved and labour saving machinery. This not only leads to better cultivation but much greater extent cultivated in same time. This in my mind is one of the practical ways of increasing the area under cultivation.	(a) If the programme of enlargement and reorganization is carried out, we should have improved varieties of most if not all of the staple crops, *e.g.*, paddy, ragi, cotton and possibly jola. In addition we shall have probably varieties of sugar-cane better suited to certain sugar-cane areas than those now being grown. The department will be in a position to push the introduction of these new varieties which should represent an increase in production of many lakhs per annum. This along with the introduction of improved implements is the line of work which will lead to the most immediate practical results (b) Every District in the State will be dotted with branch Implement Depots for the ready sale of improved implements and spare parts. There should be a sale of from 2,000 to 5,000 ploughs per annum. This should allow for the cultivation of from 20,000 to 40,000 acres more every year than the same number of country ploughs with the same number of men and very few more bullocks. This will allow for a great extension of cultivation of arable waste land. (c) The practice of using green manures for paddy will have been extended to at least 10,000 to 20,000 acres of paddy land in the western part of the State and this will represent an increased production of at least one lakh of rupees per year.

(b) *Statistics.*

At present being done	To be done next year	To be done in five years
(1) A beginning has been made on a crop survey which will aim to show the economic aspect of the cultivation of each of the chief crops; sugar-cane has been taken up first.	(1) Extension of crop survey. (2) Beginning of publication of crop reporter on the lines of that issued by the U. S. Department of Agriculture. This should	(1) Carrying out and perfecting of items 1 and 2 of previous column.

I. AGRICULTURAL SECTION—*contd.*

At present being done	To be done next year	To be done in five years
	contain all the main facts as to area under cultivation, yields, price realized by the growers, market rates, rainfall statistics, etc. (3) Carrying out of crop cutting experiments to check data *re* yields.	(2) Soil survey commenced by the Chemical Section to get accurate data on the fertility of the soils. (3) Preliminary cattle and dairy survey of the State should also be made.
(c) *Demonstration*—This work is intimately connected with increase of production. Hence practically all of the items mentioned there fall properly under this head.		
(1) Introduction of improved varieties of crops especially cotton and sugar-cane. (2) Improvements of cultivation of sugar-cane and paddy. (3) Improvements in manufacture of jaggory. (4) Use of improved agricultural implements.	(1) Introduction of improved varieties of crops as at present. (2) Improvements in dry land cultivation to conserve soil moisture and so increase the yield; this especially in the eastern part of the State. (3) Improvements in making of ghee and butter and handling of milk. (4) Extension of use of improved implements. Establishment of local depots. (5) Improvements in cultivation of sugar-cane, paddy, ragi and groundnut. (6) Improvements in manufacture of jaggory with attempt to place it on a co-operative basis. (7) Establishment of local manure depots.	(1) Great extension of this work. Establishment of private or co-operative seed farms for supply of seed. (2) Great extension of this work. (3) Improvements in dairying and aid in establishment of co-operative dairies. (4) Large extension of use of improved implements; attempts to establish local industries for repair and manufacture of improved implements. 5, 6, 7, also to be greatly extended. Attempt to establish co-operative manure supply.
	d. Experiments.	
(1) Experimental work on ragi, paddy, sugar-cane, groundnuts and to a slight extent on cotton are in progress. These experiments have to do with testing and improving varieties, improving methods of cultivation especially with reference to conserving soil moisture, ascertaining most suitable manurial treatment and in the case of sugar-cane improving quality of product, *e.g.*, jaggory. (2) Testing of improved implements and adapting them to Mysore conditions.	(1) As at present. (2) Experiments on cotton in the cotton area with special reference to breeding improved varieties. (3) Experiments on paddy and sugar-cane in the malnad with the object of ascertaining what are the best varieties, manures and methods of treatment for those parts. (4) Testing of other crops for introduction into the malnad with the object of increasing area under cultivation in that important tract. (5) Testing of improved implements, etc.	(1) Extension of work outlined in previous column. (2) Growing of sugar-cane on a large scale under the Marikanave reservoir to show the possibilities of large holdings and improved machinery. (3) Testing of improved implements, etc.
	II. CHEMICAL SECTION.	
(1) Work for the Geological Department.	1, 2, 3, 4 and 5 as in first column.	1 to 6 as noted in 2nd column.

At present being done	To be done next year	To be done in five years
(2) Analyses of manures and soils, etc., for private parties. (3) Analyses of manures, soils etc., in connection with experimental work on the farm. (4) Chemical control of sugarcane and jaggery-making experiments. (5) Chemical work connected with the Biological Section.	(6) Chemical work in connection with new experimental farms.	(7) Soil survey. (8) Study of the chemical processes in paddy cultivation with the object of a better use of manures. (9) Testing of the various varieties of food grains as to their relative food value for the people. (10) Testing of fodders as to their relative value for cattle.
III. Biological Section.		
A. Mycological division.		
(1) Work on Koleroga. (2) Work on smuts of jola. (3) Work on potato diseases.	1, 2, 3, continued especially on the demonstration side. (4) Work on other diseases of the betel palm begun (5) Work on spike disease begun.	1 to 4 carried on especially on demonstration side. The work will be handed over to private agency, Agricultural Associations, etc., as soon as feasible. The work on Koleroga alone will give an increase of over one lakh of rupees per annum. (5) Work on spike disease continued. (6) Work on diseases of other important plants taken up. (7) Preparation of an illustrated handbook of the plant diseases of Mysore taken up.
B. Entomological division.		
(1) Demonstration work in connection with grasshopper pests. (2) Experimental and demonstration work in connection with kumblihulas. (3) Pests of stored grains under investigation. (4) Study of parasites of insect pests being made. (5) Coffee pests.	(1) and (2) Demonstration work under these heads extended. (3) Study of pests of stored grains continued and demonstration work begun. (4) Study of parasites continued. (5) Coffee pests studied and combative measures demonstrated. (6) Pests of paddy studied.	(1) to (3) Demonstration of combative measures. (4) Attempt to utilize parasites in controlling insect pests. (5) Study of coffee pests completed. (6) Study of paddy pests completed. (7) Preparation of a handbook on insect pests in Mysore taken up.
C. Botanical division.		
(1) Breeding of improved varieties of ragi. (2) Rearing of sugar-cane from seed to obtain improved varieties.	(1) and (2) as now. (3) In addition work begun on similar lines with paddy.	1 to 3 as in 2nd column. (4) Breeding work on cotton. (5) Breeding work on jola and other important crops begun.

Proceedings of the Government of His Highness the Maharaja of Mysore.

IV. AGRICULTURAL EDUCATION SECTION.

At present being done	To be done next year	To be done in five years
(1) Agricultural school for the training of sons of landholders opened.	(1) Agricultural school enlarged. (2) Starting of short courses in the vernacular on the Experimental Farm. (3) Arrangements for supervising rural science instruction in Rural Schools.	(1) and (2) as in column 2 when new farms are opened opportunity will be taken to start vernacular courses in connection with them also. (3) Organization of rural science instruction in co-operation with Educational Department; holding of evening classes in book keeping, etc., in the villages. (4) Opening of special vernacular agricultural schools in the districts if there appears to be a real demand for them.

Letter No. 917, dated Bangalore, 12th February 1914, from C. S. Balasundaram Iyer, Esq., B. A., Secretary to the Mysore Economic Conference, Bangalore, to the Secretary to the Government of His Highness the Maharaja of Mysore, for Education and Agriculture.

I have the honor to forward herewith for orders of Government an extract from the proceedings of the meeting of the Agricultural Committee held on the 5th February 1914, relating to the programme of work of the Agricultural Department, wherein the Committee suggests the inclusion of certain items in the programme of the department.

Extract of para 8 from the proceedings of the meeting of the Agricultural Committee held on the 5th February 1914.

* * * * * *

8. *Programme of work of the Agricultural Department.*—The programme had been circulated to the members and was considered item by item.

There was a long discussion during the course of which the Director of Agriculture explained what all work the department would attempt to do as soon as it is able to secure an adequate staff and some of the members suggested the crops in which their districts were most interested.

The Committee unanimously adopted the programme of the department with the suggestions noted below and with the observation that the increased cost within the next five years was very moderate when compared with the magnitude and the importance of the work the department had before it.

In "I Agricultural Section A. Increase of production to be done next year" add after (8) the following:—Extension of the cultivation of money crops such as Garlic, Coriander, Turmeric, Ginger, etc."

(2) After No. 1 under "6 Demonstration to be done next year" as follows:—"Introduction of improved varieties of the more important crops" and under (5) in the above section add the following words:— "And other important crops, if possible."

(3) Under "D. Experiments No. 3 to be done next year" add the words, "and other money crops," after the word "sugar-cane" and in the column "to be done in five years" in the same section add "stock breeding."

(4) Under "III Biological Section A Mycological Section, to be done next year" add the following "Fungoid diseases of coffee."

Proceedings of the Government of His Highness the Maharaja of Mysore, Revenue (Forest), dated 5th February 1914.

READ—

Letter No. 463, dated the 15th July 1913, from the Conservator of Forests in Mysore, proposing certain concessions, in addition to those sanctioned in Government Order No. R. 4961-5—Ft. 131-06-6, dated the 7th February 1908, in favour of the Mahratta kunbies already settled or going to be settled in the ghat regions of the Sagar Taluk.

2. Letter No. 4193, dated the 11th October 1913, from the same officer, submitting, as called for in Government Order No. 3244-7—Ft. 129-10-12, dated the 11th December 1912, a report on the work done in the settlement of the new families during the year 1912-13, with the views of the Shimoga Deputy Commissioner on the proposals made in the first letter.

No. R. 6024-6—Ft. 19-13-4, DATED BANGALORE, 5TH FEBRUARY 1914.

ORDER THEREON.—It is reported that 34 families consisting of 99 adults and 45 children have been newly settled during the year 1912-13 at a cost of Rs. 2,986-10-3.

2. The following further concessions recommended by the Conservator of Forests are sanctioned.

(*a*) A money grant not exceeding Rs. 20, according to the discretion of the Forest Sub-Division Officer, Sagar, for the maintenance of each new indigent family settling down, during the first year of settlement of the family.

(*b*) A sum not exceeding Rs. 10, as may be fixed by the same officer, for each family, to meet the actual expenses of journey from their old abodes to the new.

(*c*) Grant of 2 acres of land for kumri cultivation instead of one acre, as laid down in Government Order of the 7th February 1908.

3. Government do not consider it desirable to lend to the settlers any money for marriage or other expenses. A spirit of co-operative help should be infused and developed among the settlers which should gradually make them independent of external aid.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

The Revenue Commissioner in Mysore.
The Deputy Commissioner, Shimoga District

Exd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore, Revenue (Forest), dated 11th February 1914.

No. R. 6211-22—Ft. 139-13-1, dated Bangalore, 11th February 1914.

Order.—With a view to improve the working of the forests and to utilize them to a greater extent in future in providing occupations to the people, it is proposed to carry out a survey of the forest resources of the State and to investigate the means necessary for the exploitation of remote and inaccessible tracts and the development of forest industries. With these objects Government have decided, in consultation with the Conservator of Forests, to depute for a period of one year to begin with, Mr. G. Krishnamurti Naidu, Assistant Conservator of Forests, and Mr. H. S. Narayana Rao, Probationary Assistant Conservator, for employment in these investigations.

2. The following subjects should be taken up for investigation:—

(i) Study of important forest products of economic value and the publication of a commercial guide giving information as to the localities where they are found, the quantities available, their uses and the demand and markets for them.

(ii) Extension of forest communications with an eye to work distant forests.

(iii) Opening forest tramways and establishing saw-mills and providing other facilities for economical working of the forests.

(iv) Investigation of the possibilities of the following important forest industries and the preparation of brief monographs embodying the results of investigation:—

(*a*) Wood-distillation, including manufacture of charcoal.
(*b*) Paper manufacture.
(*c*) Match-making.
(*d*) Sandalwood oil distillation.
(*e*) Development of tanning industry.
(*f*) Better propagation and utilization of lac, gum, etc.
(*g*) Introduction and acclimatization of new varieties of timber from Malabar, Travancore and other places.
(*h*) Improving and utilizing cane and rattan which are deteriorating in the malnad forests.
(*i*) Formation of a herbarium.

3. The Conservator is requested to submit proposals as to the manner in which the work will be divided between the two officers named above and their relations to each other. He will also arrange to relieve them so that they may enter upon their work at once. He is requested to provide them with the necessary establishment by suitable redistribution of officials either from his own establishment or that of other officers subordinate to him and if this is not possible he may apply for the necessary additional establishment.

4. The two officers will be expected to undertake exhaustive tours in the interior of the districts in accordance with the programmes prepared with the approval of the Conservator and their work will be carried out under the general directions of the Conservator. Monthly progress reports of work done particularly in respect of the objects set forth in para 2 by each officer will be submitted to the Conservator, who will forward them with his remarks to Government. Copies of the reports will be sent to the Chairman of the Industries and Commerce Committee.

5. The Deputy Commissioners of Districts and the local District Forest Officers will be requested to afford the above officers every facility in their work. The Director of Industries and Commerce and the Secretary to the Industries and Commerce Committee will also be requested to arrange to furnish them with such information as may already be available or as may hereafter be collected on the subjects entrusted to them for investigation.

6. The work of preparing a Commercial guide to forest products sanctioned in Government Order No. R. 2023-5—Ft. 91-12-7, dated the 29th August 1913, will be taken over by the two Officers now placed on special duty. The Assistant Conservator Mr. Ramiah will be relieved of that work.

READ—

(1) Government Notification No. R 2709—Ft. 192-08-6, dated 27th September 1909, declaring under Section 4 of the Forest Regulation, the proposal to constitute as State Forests certain lands in the Gundlupet Taluk, forming the Kaniyanpur Block II and appointing a Forest Settlement Officer to make the necessary enquiries, etc.

(2) Letter No. 5835, dated the 11th January 1913, from the Revenue Commissioner in Mysore

I have the honor to forward herewith, for the orders of Government, letter No 342, dated 31st May 1912, together with the enclosures (in original), from the Forest Settlement Officer in Mysore, and received through the Deputy Commissioner, Mysore District, with his letter No 21, dated 9th July 1912, reporting on the conclusion of the settlement of the Kaniyanpur Block II in the Gundlupet Taluk.

Copy enclosed for reference

The block in question is situate to the east of the Bandipur State Forest and extends over an area of 6,538 acres, 7 guntas or 10 21 square miles The reservation affects the three villages of Bandipur, Kebbepur and Kaniyanpur and comprises kharab and District Forest lands as noted in the margin. Adequate provision has been made by the Forest Settlement Officer for the exercise of the mamool rights of the villagers concerned in respect of grazing and removal of fuel, etc., for agricultural and domestic purposes. Nine claims were preferred before the Forest Settlement Officer and all but four were admitted by him.

	A.	G.
Kharab .	3547	7
District Forest ..	2991	0
Total	6538	7

As no appeals were preferred against the decisions of the Forest Settlement Officer and as the Deputy Commissioner himself has no objection to the reservation of the block under reference, the final notification may issue.

ENCLOSURE

Letter No. 21—5, dated 8th July 1912, from the Deputy Commissioner, Mysore District, to the Revenue Commissioner in Mysore

I have the honour to submit herewith the marginally noted records connected with the settlement of Kaniyanpur Block II in the Gundlupet Taluk, received with the District Forest Officer's letter No. 982, of 8th June 1912, and to state that the submission of the same was delayed, to see whether any complaints would be preferred by the raiyats against this. As no complaints have been received the records are submitted for the needful being done in the matter

B and C Registers, Map, Topo tracing and Boundary Notification.

Letter No. 342, dated 31st May 1912, from the Forest Settlement Officer in Mysore to the Revenue Commissioner in Mysore, through the Deputy Commissioner, Mysore District

I have the honor to report on the conclusion of the Settlement of the Kaniyanpur Block II in the Gundlupet Taluk.

2 The proposal to constitute the block in question into a State Forest was notified by Government under Section 4 of the Mysore Forest Regulation with Government Order No. 2709—Ft. 192-08-6, dated the 27th September 1909, and the same was published on pages 499 and 500 of Part I of the *Mysore Gazette*, (English), dated 30th September 1909. The proclamation under Section 5 of the said Regulation was issued by my predecessor Mr. M. Shama Rao. M A , which appeared on pages 894 and 895 of Part II of the Mysore Kannada Gazette, dated the 16th December 1909.

The proclamatory notices were got served on the villagers concerned through the Amildar of the Gundlupet Taluk.

3. The block under report was inspected and perambulated by me, in company with the Amildar, Mr. M. Kesaviah, and the Range Officer Mr B. Narasimha Iyengar, on the 27th and 28th of May last.

4. During my enquiry the following nine claims were preferred to me, —

(i) 2 claims to right of way.
(ii) 1 claim to right of water.
(iii) 6 claims to miscellaneous rights.

Out of two claims in (i) one was admitted and the other rejected, the claim to the right for the use of water was admitted, and out of 6 claims in (iii) 3 were admitted and 3 rejected, as sufficient extent of gomal lands was ordered to be excluded from the reserve for their use.

Proceedings of the Government of His Highness the Maharaja of Mysore,

As a large portion of lands proposed to be included within the reserve out of the Mangala village had already been given out for cultivation to the raiyats to the extent of about 350 acres, it was found difficult to secure even a small strip of land for being conveniently included within the reserve. As the small sub-divisions recently made out of the kharab Survey Nos. 24 and 25 are interspersed throughout the kharab area and as the preliminary demarcation line in many places, goes right in the middle of these Sub-Divisions, there was no alternative but to exclude these lands altogether from the proposed reserve, even though this arrangement breaks the compactness of the reserve and divides it into two separate blocks. As both these sub-divisions are contiguous with the already settled Bandipur State Forest they may be conveniently added on to it.

5. The Deputy Commissioner of the Mysore District has intimated his Docket No. 2892, dated the 4th November 1911, that no appeals have been preferred to him against my decision relating to this block.

6. The following records are, herewith submitted :—

1. 'B' Register.
2. 'C' Register.
3. Sketch map.
4. Topo-tracing and
5. Boundary Notification.

7. The date from which the reservation is to take effect has to be kindly inserted in the draft boundary notification.

———

B.—Register of claims to lands, right to forest produce or easements in the proposed Kaniyanpur State Forest Block II

No.	Name of claimants	Date of presentation of claims	Nature and extent of claims preferred	Brief summary of the evidence adduced in support of claims	Brief summary of the Forest officer's arguments and evidence produced by him	Brief abstract of decision and final disposal of the claims by the Forest Settlement Officer	Brief abstract of decision, if any, of Court of final appeal and settlement	Remarks
1	2	3	4	5	6	7	8	9
1	Anantiah, Shanbhog of Siddaiyanpur.	27th May 1911	States that as the kharab and gomal lands of Siddaiyanpur, on which the cattle of the villages of Bachahalli, Keelkamanthalli, Sambepura, Moyathalli, Melkamanthalli, Hangalapura, Pattanpura and Kalligowdanhalli, depend for pasture, have been taken up for the Somanathpur Sandal Reserve, they have since been passing in the Bandipur District Forest which has now been proposed to be included in the Kaniyanpur Block II and therefore requests that this right may be recognized.	... ...	There is no objection for the cattle to graze in the gomal lands included in the Somanathpur Sandal Reserve.	*Claims 1 and 2* The raiyats of Siddaiyanpur and other villages state that as the entire area of the gomal and kharab lands of Siddaiyanpur has already been converted into a sandal Reserve known as the Somanathpur Sandal Reserve, they entirely depend upon the adjoining District Forest, *viz*, Bandipuur District Forest for pasture for cattle, for fuel for domestic purposes and for wooden materials for agricultural implements and pray, that in the, event of the Bandipur District Forest being included in the State Forest, their existing rights and privileges in the said District Forest may be admitted in the State Forest to be formed. The entire extent of kharab and gomal lands is 1,730 acres and the villagers have been deprived of this owing to its inclusion in the Sandal Reserve named above. It is therefore incumbent upon us to find for the raiyats an equal extent of District Forest for exercising in it their manool rights and privileges. An extent of 1,615 acres in the Bandipur District Forest has not been proposed to be included within the reserve and this block is adjacent to Siddaiyanpur and other three villages. I would add to this area a bit having an extent of about 355 acres from out of the proposed area, so that the raiyats may have a District Forest of about 1,400 acres for their exclusive use. This extent must be considered more than adequate for their requirements I accordingly direct that the north western boundary line of the reserve be deviated at the starting point so as to meet the bend of the proposed preliminary demarcation line about 62 chains west from the 1st furlong of the 132nd mile on the Nilgiri high road. Then it will run in a South-Easterly direction	... ...	

B.—Register of claims to lands, right to forest produce or easements to the proposed Kaniyanpur State Forest Block II.

No.	Name of claimants	Date of presentation of claims	Nature and extent of claims preferred	Brief summary of the evidence adduced in support of claims	Brief summary of the Forest officer's arguments and evidence produced by him	Brief abstract of decision and final disposal of the claims by the Forest Settlement Officer	Brief abstract of decision, if any, of Court of final appeal and settlement	Remarks
1	2	3	4	5	6	7	8	9
						meeting the said road on the inner side at a distance of about 21 chains from the said furlong stone and thence in the same direction till it meets the gadi bandhs of Siddaiyanpur. C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911.		
3	Chikkegowda of Kaligowdanhalli.	27th May 1911	States that the cattle of his village were being taken for grazing to the kharab and gomal lands of Siddiyanpur and as the same has been taken up for the Somanathpur Sandal Reserve, they were under the orders of the Conservator allowed, to graze their cattle in and remove fuel, thoru, etc., from the adjoining Bandipur District Forest. As this District Forest is also proposed to be included within the Kaniyanpur, Block II, prays that subject to the following concessions being granted to them the proposal to form the State Forest in question may be confirmed :— Right to remove from the reserve for the use of each house per annum. (i) Fuel from 12 to 24 cart-loads. (ii) Thorns from 25 to 30 cart-loads.	.....	May not be admitted as no lands have been taken up from this village for the proposed reserve and as there is sufficient District Forest left to them for meeting their requirements.	*Vide Claim 1.*	.....	

Revenue (Forest), dated 24th February 1914.

3	4							
Krishnappa, Shanbhog of Kebbapur, and Basavaya, re-ident of Kebbapur	Putla Basavaya, Patel of Mangala.	27th May 1911	Do	(iii) Half a cart-load of wood for agricultural implements from Kagli, Banni, and Dindiga trees (iv) Twenty bamboos and twenty leaves or props for putting up lofts and (v) Right of free grazing States that the preliminary demarcation line runs close to cultivated lands in survey No. 77, viz., survey Nos 280 and 281 and another bit of land to which no survey number is given and requests that the line may be shifted further away from these lands.	.....	The shanbhog endorses the statement of the patel and adds that in addition to the cattle of his village, the cattle of eight adjoining villages are kept in the kharab lands of his village for grazing as pasture is available in this locality owing to its being situated in a hollow. The owners construct temporary sheds in the kharab lands and impound the cattle during nights	The lands recently brought under cultivation may be excluded from the area of the proposed forest. The cattle may not be allowed to graze free as the owners are in the habit of paying grazing fees for grazing their cattle in the Bandipur State Forest which is close by	There is some difficulty in including the lands proposed out of Mangala village within the reserve. Three kharab survey Nos 22, 20, 21 and 2, are proposed to be taken away from the village for being included within the Kanyapur Block II. About 85 new survey numbers with an aggregate extent of 953 acres and 21 guntas have been formed out of them and given out for cultivation. These survey numbers are so interspersed that it is impossible to find a detached tract for being included within the State Forest. Besides a portion of the eastern boundary line of the reserve passes through many of these new survey numbers, almost from one end to the other. There is no alternative but to exclude the lands of Mangala altogether from the reserve. This arrangement will cut the reserve	.....	The alignment of the line within the limits of Kebbapur village is incorrect. According to the sketch map and the boundary notification, it should run touching the south-west corner of survey No. 178 of that village But on the land it is so laid out as to bisect the adjoining survey No. 179. Besides it includes the new survey numbers already given out for cultivation within the reserve. The line is accordingly deviated at a point about 34 chains from the common bandhs of the Hmalapur village and Bandipur District Forest and made to run at right angles for a distance of about 8 chains, then parallel to the proposed line for a distance of about 26 chains and then again at right angles so as to meet the original line at a distance of about 8 chains This arrangement will obviate the inconvenience complained of.	The line may be so shifted as to exclude the cultivated lands.

C. VENKATA RAO,

Forest Settlement Officer.

2nd June 1911.

B.—Register of claims to lands, rights to forest produce or easements in the proposed Kaniyanpur State Forest Block II—*concld.*

No.	Names of claimants	Date of presentation of claims	Nature and extent of claims preferred	Brief summary of the evidence adduced in support of claims	Brief summary of the Forest Officer's arguments and evidence produced by him	Brief abstract of decision and final disposal of the claims by the Forest Settlement Officer	Brief abstract of decision if any, of Court of final appeal and settlement	Remarks
1	2	3	4	5	6	7	8	9
						into two blocks destroying the compactness of the reserve as proposed by the Forest Department. As a consequence of this arrangement, the boundary line at the trijunction of Kelbepur, Mangala and Bandipur District Forest will instead of running southwards, be made to run along the northern boundary of the Mangala village as far as the north-east corner of survey No. 18 of the Bandipur village and then along the eastern boundary of the said survey number until it meets the Bandipur State Forest boundary. The eastern boundary of the proposed reserve will be deviated at the north-west corner of survey No. 26 of Kaniyanpur so as to run westwards along the southern boundary of survey No. 20 of Mangala village till it meets the Bandipur State Forest. C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911.		
5	Shamanna, Shanbhog of Mangala.	27th May 1911	Claims right of way over the foot-path from Mangala to Yedakunda majare of Bandipur	.....	.....	As a cart-track of 15 feet wide has been granted from Mangala to the Bandipur, no separate foot-path is necessary. C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911.	.....	
6	Basaviah, Patel of Kaniyanpur	Do ...	Represents that in addition to the cattle of his village, the cattle of the adjoining 2 villages graze in the kharab lands of his village and that much inconvenience will	.....	The concession may not be conceded to the raiyats.	Kaniyanpur is a small village having 27 houses, with a population of 64 persons, and a stock of 237 head of cattle. The area remaining for the village, *viz.*, 654 acres and 24 guntas of kharab, plus 102 acres excluded by the deviation of the line	.....	

			be caused to them, if the lands of his village are included within the reserve. Prays, therefore, that no lands of his village may be included in the forest.			within the limits of this village is more than enough for the requirements of the raiyats. C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911.
7	Basaviah, Patel of Kaniyanpur.	27th May 1911	That there are two kattes one in survey No. 24 and another in survey No. 21 to which the cattle go for drinking water and requests they may be allowed this privilege.	.....	Nil	The raiyats of Kaniyanpur are allowed to take their cattle for water, to kattes situated in survey Nos. 23 and 24, access to them being allowed by a foot-path, 6 feet wide, throughout the year. C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911.
8	Do ...	28th May 1911	States that the preliminary demarcation line runs close to the cultivated fields bearing survey No. 52, 51 and 50 and requests that the line may be shifted further away.	.....	The line may be shifted.	As the preliminary demarcation line runs at the close of the cultivated fields, *viz.*, survey Nos. 52, 51, and 50, I direct that the line be shifted at the junction of Survey Nos. 22, 25 and 24, so as to meet the eastern boundary line of survey No. 16 of the Kaniyanpur village at a distance of 43 chains north from the south-east corner bandh of survey No. 16 of the said village. C VENKATA RAO, Forest Settlement Officer. 2nd June 1911.
9	Forest Settlement Officer on behalf of the public.	28th May 1911	Requests that the following rights of ways may be admitted within the blocks:— (i) The Nilgiri-Mysore high road. (ii) The cart-track beginning from the mangalagadi and running through survey No 18 of Bandipur which branches off at the western boundary of the said survey number one branch leading to Bandipur and the other to the Nilgiri high road.	.....	Nil	The following public rights of way will be admitted throughout the year. (i) The Nilgiri Mysore high road. (ii) Cart-track 15 feet wide, beginning at the eastern boundary of Bandipur village and running as far as the western boundary of survey No. 18, where it branches off one portion leading to Bandipur and the other to the Nilgiri-Mysore high road. C. VENKATA RAO, Forest Settlement Officer. 2nd June 1911

Revenue (Forest), dated 24th February 1914.

(3) Letter No. 7264, dated 12th March 1913, from the Conservator of Forests in Mysore.

I have the honour to submit herewith the file of papers relating to the settlement of the Kaniyanpur Block II in the Gundlupet Taluk, received with your letter No. R. 3836—Ft. 90-12-2, dated the 28th January 1913, and to request you to kindly obtain the early orders of Government for notifying the block as a State Forest under Section 17 of the Forest Regulation.

(1) Revenue Commissioner's letter No 5835, dated 11th *January last*
(2) Mysore Deputy Commissioner's letter copy No. 21, dated 8th July 1912.
(3) Forest Settlement Officer's letter No. 312, dated 31st May 1912
(4) Boundary Notification,
(5) 'C' Register,
(6) 'B' Register,
(7) Map and (8) Topo tracing.

2. It seems a great pity that a large extent of the block comprised in the Mangala village was assigned for cultivation so as to cut it up into two parts. I may observe that such alienation is contrary to the provisions of Section 6 of the Forest Regulation.

(4) Letter No. 3265, dated 22nd August 1913, from the Revenue Commissioner in Mysore, explaining the circumstances under which some of the lands comprised within the reserve come to be granted for cultivation without the orders of Government.

No. R. 6652-63—Ft. 90-12-6, dated Bangalore, 24th February 1914.

Order thereon.—The settlement is approved. The draft notification will be published in the *Mysore Gazette* declaring the lands as State Forest with effect from the 1st March 1914.

2. The Deputy Commissioner, Mysore District, is requested to duly promulgate the boundaries of the two sub-divisions of the block in the localities in which they are situated.

3. It is to be regretted that a large extent of land comprised within the block, as notified under Section 4 of the Forest Regulation, was granted for cultivation subsequent to the date of such notification, contrary to the provisions of Section 6 of the Forest Regulation. If upon the reservation of the area the Revenue officers had taken the trouble to make a note in the khetwar against such of the survey numbers as came within the notified area, the mistake could have been avoided. The Revenue Commissioner is requested to issue suitable instructions to ensure a note being invariably made in the khetwars of the villages as soon as the preliminary notification under Section 4 is issued so that such lands may not be granted for cultivation except in accordance with the provisions of Section 6 of the Forest Regulation.

4. A statement of lands comprising the area proposed to be reserved will, in future, be appended to the notification under Section 4.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore, returning the sale records.
The Conservator of Forests, in Mysore.
The Superintendent, Revenue Survey and Settlement.
The Deputy Commissioner, Mysore District, with map and statements.
The Deputy Commissioners of other Districts.
The Forest Settlement Officer.

Proceedings of the Government of His Highness the Maharaja of Mysore,

NOTIFICATION.

No. R. 6664—Ft. 90-12-7, dated Bangalore, 24th February 1914.

The Government of His Highness the Maharaja of Mysore are pleased to declare, under the provisions of Section 17 of the Mysore Forest Regulation (XI of 1900) that, from the 1st March 1914 the areas the boundaries of which are set forth in the schedule annexed to this Notification, shall be deemed to be "State Forests" subject to the exercise of rights specified at foot thereof :—

District	Taluk, hobli and village	Approximate area	Name of the block	Boundaries
Mysore	Gudlupet, Hangala Hobli; Bandipur District Forest; Bandipur, Kebbapur and Kaniyanpur villages	6,538 acres 7 guntas or 10·21 sq.miles	Kaniyanpur Block II.	*Situation.*—A tract of jungle lying to the east of Bandipur State Forest. It is divided into two portions, *viz*, A. and B.

Boundaries of the A. sub-division.

North.—Starting from the common bandhs of Hangala, Hosahalli, Siddaiyanpur, Bandipur District Forest and the Bandipur State Forest, the line runs south-east in a straight line through survey No. 1 of Bandipur District Forest for about 145 chains to cairn No. 1 constructed at a point about half a furlong south-west from the south-west corner of survey No. 1 of Melkamanahalli; then in the same direction through survey Nos. 1 and 2 of Bandipur District Forest for about 117 chains crossing the Nilgiri-Mysore high road at a point about 24 chains south from the 1st furlong of the 132nd mile and meeting the gadi bandhs of Siddapur; then again south-east along the western boundary of Siddapur to the trijunction bandhs of Siddapur, Sivapur and Bandipur District Forest; then east along the southern boundary of Sivapur to the common bandhs of Sivapur and Hundipur; then in the same direction along the southern boundary of Hundipur to a point about 24 chains south-west from the north-west corner of Kebbapur; then north-east along the eastern boundary of Hundipur for about 24 chains to the north-west corner of Kebbapur.

East.—Thence south-east through survey No. 77 of Kebbapur in a straight line for about 84 chains to a point about 10 chains north-west from the north-west corner of survey No. 178; then west for about 8 chains through the same survey No. 77 : then south in a straight line for about 26 chains through the same survey number to a point about 6 chains west from the south-west corner of survey No. 180; then east through the aforesaid survey number for about 8 chains to a point 6 chains south-west from the south-west corner of the above survey No. (180) ; then south-east in a straight line through the said survey No. 77 of Kebbapur for about 40 chains to the south-west corner of survey No. 80 of Kebbapur.

South.—Thence north-west along the northern boundary of survey No. 59 of Mangala to its north-west corner: then north-west along the northern boundary of Mangala village to the north-east corner of survey No. 18 of Bandipur; then south-west along the eastern boundary of survey No. 18 of Bandipur to its south-east corner, where it meets the Bandipur State Forest gadi.

West.—Thence along the Bandipur State Forest boundary to the starting point.

Boundaries of the B. Sub-Division.

North.—Starting from the north-west corner of survey No. 25 of Kaniyanpur the line runs almost east in a straight line along the northern boundary of the same survey number to its north-east corner.

East.—Thence south-along the east side of survey No. 25 of Kaniyanpur to its south-east corner; then south-east in a straight line through survey No. 22 of the same village for about 72 chains till it meets the west side of survey No. 16 at a point about 18 chains south, from the south-west corner of survey No. 53; then in the same direction through survey No. 16 for about 85 chains till it meets the east side of the said survey No. 16 at a point about 43 chains north from the south-east corner of survey No. 16; then south for about 43 chains along the east side of the same survey number to its south-east corner.

South.—Thence west along the Moyar river up to the point where the river and the Bandipur State Forest meet.

West.—Thence along the Bandipur State Forest boundary to the starting point.

Revenue (Forest), dated 24th February 1914.

Remarks.

A.

The undermentioned public rights of way are admitted within the block :—

1. The Nilgiri-Mysore high road. It enters the forest in the western boundary of Sub-Division A, at the north-west corner of survey No. 9 of the Bandipur village, goes north, north-west, north and north-east through survey No. 2 of Bandipur District Forest and quits the forest in the northern boundary in the 4th furlong of the 132nd mile of the Mysore Nilgiri high road.

2. Cart-tract, 15 feet wide, from Mangala gadi to the above high road will be admitted for men, cattle and carts, throughout the year. It enters the forest in the southern boundary (of Sub-Division A) at a point about 22 chains south-west from the north-east corner of survey No. 18 of Bandipur village, goes west in a straight line for about 45 chains through survey No. 18 until it meets the west side thereof, at a point about ten chains north from the north-west corner of survey No. 11 of Bandipur, then north-west through survey No. 9 of the same village for about 41 chains till it meets the Mysore-Nilgiri high road.

3. Cart-track, 15 feet wide, branching from cart-track No. 2 *supra*, at a point about 10 chains north from the north-west corner of survey No. 11 of Bandipur, goes south-west through survey No. 9 of Bandipur for about 67 chains to Bandipur village which is treated as an enclosure.

B.

The following concessions are allowed within the block :—

(i) The raiyats of Kaniyanpur are allowed to take their cattle for water, to kattes situated in survey Nos. 23 and 24 of the same village throughout the year, access to them being by means of a foot-path, 6 feet wide. It enters the forest in the eastern boundary of Sub-Division B at a point about 4 chains north from the south-west corner of survey No. 26 of Kaniyanpur, goes west and south through survey Nos. 25,24 and 23 for about 86 chains (touching the kattes mentioned above).

(ii) The following survey numbers of Bandipur village will be treated as enclosures within the block and demarcated out free from reservation :—

Survey Nos. 1 to 8 and 10 with a margin of 5 chains on the north and east and 8 chains on the south so that the katte situated to the south of survey No. 8 may be included within the enclosure. The other block of cultivated lands, *viz.*, survey Nos. 11 to 17 will also be treated as an enclosure within the block with a margin of 5 chains all round. Access to these enclosures will be by means of cart-tracks Nos. 2 and 3. *supra*.

By Order,
K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Compiler, *Mysore Gazette*, for publication.

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

The following orders regarding the grant of advances for the purposes of building or purchasing houses for the use of Government servants :—

1. Government Order No. 994-1002—R. F. 17-03, dated the 16th January 1902, disallowing joint advances and joint bonds.

2. Government Order No. 1512-56—G. F. 8-06-2, dated the 16th August 1906, rejecting the application of Venkatakrishnaiya, for a second advance.

3. Government Order No. Fl. 5682, dated the 15th March 1906, declining to grant house building advances for repairing houses.

4. Government Order No. Fl. 138-78—G. F. 332-08, dated the 7th July 1909, sanctioning the relaxation of the rule in Article 136(*a*) of the Civil Account Code, Vol. I.

5. Government Order No. Fl. 1894-934—Ml. 478-06, dated the 9th October 1909, reverting to the system of making advances not exceeding a year's pay for building houses, in the extensions of Bangalore, Mysore and Shimoga towns.

6. Government Order No. Fl. 1110-80—G. F. 582-09-2, dated the 2nd September 1910, prescribing the form of application for house-building advances.

7. Government Order No. Fl. 2539—G. F. 368-09-4, dated the 16th November 1910, declining to grant house-building advances to Municipal employees from the General Revenues.

8. Government Order No. Fl. 1306-39— G. F. 237-10-3, dated the 15th September 1911, limiting the grant of house building advances in the case of a single person to build only one house in the extensions of a city.

9. Government Order No. Fl. 135-80—G. F. 9-12-1, dated 7th July 1913, limiting the grant of advances for purchasing houses to six months' pay.

No. Fl. 3190-538—G. F. 588-11-5, DATED BANGALORE, THE 7TH FEBRUARY 1914.

ORDER THEREON.—Owing to want of proper understanding of the rules on the subject read above, Government are receiving frequent applications for the grant of advances not covered by the orders already passed. In order to avoid all such unnecessary correspondence, it has become necessary to issue a consolidated order explaining once again the conditions and circumstances under which advances are given for building or purchasing houses. Accordingly the Government of His Highness the Maharaja of Mysore are pleased to lay down the following rules :—

1. Advances from the General Revenues without interest are made to Government servants for two objects, *viz.*, (i) House-building and (ii) house-purchasing. No advance of any kind is made for repairing or improving a house.

2. House-building advances are subject to the maximum limit of either 12 months' pay or 6 months' pay. The former limit is restricted to the case of houses in the extensions of Mysore, Bangalore and Shimoga towns. The latter applies to all other places in the State, provided the conditions mentioned in Article 136, Civil Account Code, Vol. I, applied to that locality.

3. Advances for purchasing a house are restricted only to the grant of six months' pay irrespective of the locality where the house is situated.

4. A Government servant working in a station other than the one in which the building is to be purchased or constructed cannot get any advance unless it be for a house in the Extensions of Mysore, Bangalore and Shimoga towns.

5. Advances from the General Revenues cannot be made to Municipal, Palace and Trust Board servants, nor can Government servants get any advance from other than the General Revenues.

6. An advance of one year's pay is recoverable in 48 equal monthly instalments and that of six months in 24 equal monthly instalments.

7. No second advance is admissible in any case to the same person, either for building a house or purchasing one in the same station. But there is no objection to an advance sanctioned being drawn in instalments as required.

Financial (General Finance), dated 7th February 1914.

8. The advance should be drawn only when there is immediate necessity therefor and any proportion of this advance not used for building or purchasing a house should be returned to Government forthwith, in part adjustment of the advance and should not be deposited in a savings bank or invested in other ways.

9. These rules are supplementary to the rules in Article 136 of the Civil Account Code, Volume I.

Proceedings of the Government of His Highness the Maharaja of Mysore, Financial (General Finance), dated 12th February 1914.

READ—

Letter No. 3831—S. A. 221, dated the 15th December 1913, from the Comptroller to Government, forwarding his report on the working of the Savings Banks in Mysore during the year 1912-13.

No. FL. 3589-98—G. F. 75-13-3, DATED BANGALORE, 12TH FEBRUARY 1914.

ORDER THEREON.—Recorded.

Government note that as anticipated in paragraph four of Government Order No. Fl. 4368-77—G. F. 127-12-2, dated the 3rd February 1913, the abolition of the annual and aggregate limits of deposits has resulted in an increase in the balance of Savings Banks deposits. The balance rose from Rs. 75,12,263 to Rs. 77,23,210 during the year under review.

3. The total amount deposited during the year was Rs. 30,65,813 against Rs. 28,55,458 in the previous year, while the withdrawals during the same period amounted to Rs. 28,78,833 against Rs. 25,26,781 of the previous year.

4. The average amount at credit of each depositor was Rs. 279 against Rs. 268 in the previous year.

5. In the year under review there has been a net increase of 550 accounts contributed chiefly by the Districts of Mysore and Shimoga.

J. S. CHAKRAVARTI.
Financial Secretary to Government.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ AGAIN—

Government Proceedings No. Fl. 1633—G. F. 13-12-9, dated the 17th September 1913, sanctioning certain proposals for the re-organization of the gazetted and ministerial staff and menial establishment of the Comptroller's office.

READ—

The following communications from the Comptroller, Mysore Government :—

1. Letter No. 83, dated the 4th October 1913, submitting certain revised proposals with reference to the Government Order read above, *viz.*—

(1) To entrust the Deputy Comptroller placed in direct charge of the Public Works and Railway Branch with also the following work of the Civil Branch :—

(i) holding the custody of valuables in the safe in the State Huzur Treasury,

(ii) signing cheques and requisitions on the State Bankers,

(iii) inspecting the State Huzur Treasury on the 1st of every month,

(iv) attending to any other work to be specially referred to him by the Comptroller.

(2) To alter the designation of the gazetted Superintendents to "Chief Superintendents" to distinguish them from non-gazetted Superintendents.

(3) To attach a gazetted Superintendent to the Civil Branch and to distribute the Gazetted Officers between the branches as shown below :—

Civil Branch.	4 Assistant Comptrollers. 1 Chief Superintendent.
Public Works and Railway Branch	1 Deputy Comptroller. 1 Assistant Comptroller. 1 Chief Superintendent, *Temporary*.

(4) To order the following arrangements in the gazetted staff:—

(i) M. A. Rangachar, B.A., Assistant Examiner, to be Chief Superintendent, *Temporary*.

(ii) Mr. K. R. Krishnaswami Iyengar, M.A., B.L., to be Chief Superintendent, *Permanent*.

(iii) Mr. N. Krishnaswami Rao, B.A., B.L., to be Assistant Comptroller.

(iv) In addition a Probationary Assistant Commissioner to be attached for training in due course.

(5) To sanction the permanent retention of one temporary peon attached to the plague clerical establishment of the Comptroller's office which has since been made permanent.

(6) To reclassify the temporary clerical establishment sanctioned in the Government Order read above as follows :—

2 on Rs. 50 each.

13 on Rs. 30 each.

(7) To raise the pay of one of the two temporary hands Rs. 50 to Rs. 100 to enable him to secure the services of a Commercial Auditor.

(8) To pass specific orders as to the present scale of his office as the present scale is only a tentative one.

(9) To authorise the existing 11 hands entertained out of the temporary grant being taken against the scale sanctioned in the Government Order of the 17th September 1913, read above from the said date and to relieve the temporary grant to that extent to be utilized for other purposes.

2. Letter No. 2826—R 246, dated 31st October 1913, submitting proposals for filling up the places of 15 temporary hands sanctioned in the Government Order read above in accordance with the revised scale as suggested in his letter of the 4th October 1913, *viz.*, two on rupees fifty and thirteen on rupees thirty.

3. Letter No. 3070—R. 279, dated the 14th November 1913, representing the urgent need for the appointment of a third Gazetted Officer sanctioned for the Public Works and Railway Branch, and requesting early orders on his proposals made in his letter No. C. 83 of the 4th October 1913.

4. Letter No. 3154—R. 292, dated the 17th November 1913, stating that the Deputy Comptroller will be entrusted with the work of examining and passing the Pay, Travelling

Allowance and Contingent Bills of the Civil Branch in addition to the other works enumerated in his letter No. C. 83, dated the 4th October 1913, all doubtful and difficult cases being referred to the Comptroller.

5. Letter No. 3155—R. 200, dated the 17th November 1913, stating that the usual grant of Rs. 2,000 allowed for the temporary establishment has become insufficient to meet other legitimate demands, and requesting that in addition to the debit of the pay of the eleven temporary men entertained in anticipation of Government sanction to the provision of five lakhs under 26 Miscellaneous in the current year's budget as already proposed on 4th October 1913, a sum of Rs. 1,300 may be transferred to the temporary grant of Rs. 2,000 from the lump sum provision of five lakhs.

No. Fl. 3746—G. F. 54-13-7, dated Bangalore, 16th February 1914.

Order thereon.—After further consideration, Government are pleased to pass the following orders on the several proposals put forward by the Comptroller.

I. Gazetted Officers of the Account Department.

(*a*) The designation of the gazetted Superintendents is changed to "Chief Superintendents."

(*b*) The gazetted staff of the Comptroller's Office shall be distributed as shown below:—

Civil Branch.	4 Assistant Comptrollers. 1 Chief Superintendent.
Public Works and Railway Branch.	1 Deputy Comptroller. 1 Assistant Comptroller. 1 Chief Superintendent (*Temporary*).

(*c*) The following appointments are made to the gazetted staff of the Comptroller's office.

(1) Mr. N. Krishnaswami Rao, B.A., B.L., to be Chief Superintendent, but to act as Assistant Comptroller until further orders.

(2) Mr. K. R. Krishnaswami Iyengar, M.A., B.L., Assistant to the Census Superintendent to be Temporary Chief Superintendent.

II. Clerical Establishment.

(*a*) The scale of the temporary clerical establishment sanctioned in para 4 of the Government Order of the 17th September 1913, is revised as shown below since no additional cost is involved thereby:—

2 clerks on Rs. 50 each.
13 clerks on Rs. 30 each.

Government will be prepared to sanction the pay of Rs. 100 for a Commercial Auditor if the Comptroller can show savings in the budget allotment for his Office.

(*b*) Government generally approve of the principles underlying the selections made by the Comptroller to these temporary posts.

(*c*) The permanent scale of the clerical establishment of the Comptroller's Office was, in Government Proceedings No. Fl. 1577—G. F. 88-07-2, dated the 5th October 1907, altered tentatively for a period of three years. The tentative scale which is still in force may be continued until the period of one year fixed in para 5 of the Government Order No. Fl. 1633—G. F. 13-12-9, dated the 17th September 1913, expires and final orders are passed by the Government in the matter thereafter.

III. Menial Establishment.

No necessity for the permanent retention of the peon attached to the Plague Establishment of the Comptroller's Office has been made out. Accordingly the services of the temporary peon should be dispensed with.

Financial (General Finance), dated 16th February 1914.

IV. Addition to the work and responsibility of the Deputy Comptroller.

Government direct that as a special case, the Deputy Comptroller, who is placed in charge of the Public Works and Railway Branch, subject to the general control of the Comptroller, be entrusted with the following items of work in the Civil Branch :—

(i) holding the custody of valuables in the safe in the State Huzur Treasury,

(ii) inspecting the State Huzur Treasury on the 1st of every month.

Government consider that these duties should be performed by the Comptroller himself whenever the Deputy Comptroller is absent from the Headquarters on inspection work or other duty, and that in view of the heavy work in the Railway and Public Works Branch, it is deemed inexpedient to generally authorise the Comptroller to refer any work of the Civil Branch at his discretion to the Deputy Comptroller.

V. Temporary Grant.

The cost of the eleven temporary men employed by the Comptroller out of the temporary grant cannot be legitimately debited to the scale sanctioned long after their entertainment. Government consider that the temporary grant is meant precisely to serve such exigencies as the one under advertence.

Government are unable to sanction any increase to the ordinary temporary grant of Rs. 2,000 which is itself of a very exceptional character. The large increase of clerical establishment recently sanctioned by Government at a monthly cost of Rs. 490 should lead to increased economy in the spending of even the temporary grant of Rs. 2,000 per year.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

To—The Comptroller, Mysore Government.

Exd.—C. R.

READ—

(1) Letter No. 3277, dated the 20th September 1913, from the Excise Commissioner in Mysore, submitting a report on the results of the sales of excise privileges in the State for 1913-14.

(2) Letter No. 4202, dated 13th November 1913, from the same officer, submitting a comparative statement, showing the results of the sales according to each taluk.

No. 3277, dated Bangalore, 20—23rd September 1913, from M. Kantaraj Urs. Esq., B.A., Excise Commissioner in Mysore, to K. R. Srinivasiengar, Esq., M.A., Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments.

I have the honor to submit herewith for the information of Government a comparative statement showing the number of excise shops, talukwar, and the result of sale of excise privileges in the several districts of the Province for the year 1913-14 and to report as follows.

2. The important changes introduced in the administration of the excise revenue which may be considered to have had any effect on the rental figures for the current year were :—

(1) The legal possession of the owner of the toddy yielding trees and their liability to Government for dues of tree-tax when the licensee defaulted, was definitely fixed ;

(2) the right to vend special liquors manufactured at the Central Distillery, Bangalore, was sanctioned to be disposed of by auction ;

(3) three separate shops to sell Bangalore Brewery bottled beer were sanctioned tentatively for a year, one in Bangalore and Mysore Cities each and one in the Kolar Gold Fields area.

3. *Arrack shops.*—Seven hundred and fifty-two shops were sold for an aggregate sum of Rs. 4,02,816 against 758 shops for Rs. 3,73,466-13-8 in 1912-13, resulting in a net increase of Rs. 29,349-2-4 or 7·8 per cent. The number of shops closed was four in the Kolar District and one in each of the Districts of Tumkur, Shimoga and Mysore, while one shop was opened in the Mysore District. There was a net decrease of six shops on the whole.

4. The undermentioned eleven taluks show a fall ranging from 1 to 14 per cent while all the other taluks show an increase.

Names of taluks	Rental			Per cent
	1912-13	1913-14

5. Examining the statistics for the past several years throughout the State in general, and with reference to the Cities of Bangalore and Mysore and the Kolar Gold Fields area in particular, it is interesting to compare the incidence of vend rental per gallon, and of consumption and taxation per head of population. The figures furnished on the top of the said statement show the total arrack revenue of the State from 1877-78 to 1891-92

Years	Arrack revenue	Years	Arrack revenue
	Rs a p		Rs a p
1876 78	1,06,751 0 0	1885-86	7,38,451 0 0

N.B—The letters R, C, denote rental and consumption respectively

6. It is peculiar that the incidence of vend rental with reference to the Cities of Bangalore and Mysore keeps more or less on a level from the very commencement.

7. Comparing the incidence of rental obtaining in the Kolar Gold Fields area with those of the aforesaid two Cities, it defies all forecast; there, owing to the peculiar charac-

teristic of the industry, the fluctuation in the drinking population and consequently in the consumption, are so violent as to frustrate all calculation. There is, however, nothing unusual in this feature; for even in Madras and similar other urban areas of that Presidency the incidence of rental per gallon has always been higher than the declared margin of profit. The incidence of vend rental per gallon obtaining in the border districts of the Madras Presidency is given below for purpose of comparison from which it will be seen that what is being obtained in the Gold Fields area has not yet reached the high ratio at which numbers 2, 3, 5 and 6 Madras collectorates stand.

Districts	Rental	Consumption	Incidence of rental per gallon		
			Rs.	a.	p.
1. Cuddappah	65,524	43,963	1	7	10
2. Bellary	1,07,916	55,634	1	15	0
3. South Arcot	53,610	57,798	0	14	10
4. Coimbatore	1,67,136	67,029	2	7	11
5. Anantapur	63,121	32,455	1	15	1
6. Salem	91,572	52,808	1	11	9
7. South Canara	44,617	59,806	0	11	11

8. As regards the fall under arrack rental amounting to Rs. 7,350 in the Kolar Gold Fields area, the Deputy Commissioner assigns the following reason "prevalence of plague in the Robertsonpet, Surapalli, Masikam and other places; the high prices of food stuff, the great demand for cocoanut toddy not only on account of its cheapness as compared with arrack, but also on account of its nourishing and intoxicating properties and to the fact that most of the coolies employed on the Fields who belong to Palaghat, Malabar and other places in the Madras Presidency prefer this kind of drink as they are long accustomed to it." It is seen from the statistics of trees licensed for shops in the Gold Field area that there was an increase of 1,562 cocoanut trees during the past year over the preceding year. This does in a way verify the cause assigned. The first two causes, however, namely, "the plague and the high prices of food stuffs are not quite convincing as they are not peculiar to the Gold Fields alone but prevail all over the State more or less.

9. In Mysore City area, it is seen that the seasonal conditions coupled with the large number of public and other important works in that area during the period under review, employing large number of labourers for sufficiently long period, have not resulted in any appreciable rise in consumption. This leads one to surmise that the major portion of these labourers were all men generally addicted to the cheaper drink, toddy. The proportion of rise in consumption, from the year 1896 and onwards when the construction of the Palace work was undertaken was, therefore, inappreciable. It was only from the year 1907-08 that the consumption has shown an upward tendency rising from 28,000 to 33,000 gallons which kept up till the year 1911-12. It has again gone down by 3,000 gallons during the past year owing probably to the completion of several works. In spite of these adverse circumstances the rental obtained for the current year is the highest on record.

10. The result achieved in the coffee growing taluks of the State is encouraging, owing probably to the revival of the coffee industry that had suffered a depression during the past several years, as will be seen from the sub-joined statement.

Name of taluks	Rental for 1912-13	Rental for 1913-14	Increase	Per cent
	Rs.	Rs.	Rs.	Rs.
Hassan ...	4,452	4,992	540	12·1
Kadur ...	3,708	4,008	300	8
Manjarabad ...	3,528	4,053	525	14·8
Tarikere ...	5,388	6,876	1,488	27·6
Belur ...	3,192	3,528	336	10·5
Chikmagalur ...	10,398	12,150	1,752	17
Koppa ...	10,260	11,406	1,146	11·1
Mudgere ...	6,060	7,698	1,638	27

The following table will show the fluctuation under consumption in the coffee *tracts* during the past several years. It was only during the last year that the consumption rose from 44,076 to 55,483 gallons.

Year	Consumption	Incidence of consumption per head of population
		Drs.
1894-95 ...	78,425	6·9
1895-96 ...	80,647	7·1

1911-12 ...	44,076	5·2
1912-13 ...	55,483	6·6

11. The figures of incidence furnished in the aforesaid statements are based upon the departmental accounts; but the actual conditions generally differ in different localities with reference to the situation and habits of people residing in a given area. To work out the incidence of consumption and revenue with reference to the total population of each defined area on the basis of departmental returns is a pure mathematical calculation. The whole population of a given area does not drink. The children should be excluded. The women to a large extent do not drink and there are besides the non-drinking classes. Deducting these the rate of consumption and taxation per head of actual consumers ought to be considerably more than what is illustrated in these statements.

12. Figures similar to that given under para 5 *supra* is given below, districtwar, for the last 11 years. Comparing the same with that returned in the aforesaid statement the contrast between these two is discernable.

13 For purpose of comparison the amount of arrack rental obtained is given below, districtwar, in thousands of rupees for the last 16 years from which it is seen that the districts of Tumkur, Mysore, Hassan, Kadur, Shimoga and Chitaldrug record figures higher than in any previous year. Bangalore equals the rental got in 1899, 1900 while Kolar records the lowest

Years	Bangalore	Kolar	Tumkur	Mysore	Hassan	Kadur	Shimoga	Chitaldrug	Total
	Rs	Rs	R	Rs	Rs	Rs	Rs	Rs	Rs
1898 99	90	155	7	56	17	32	38	1	376

* *N B* —These are two check shops in the Kolar Gold Fields licensed on fixed fee of Rs 60 per annum

15 *Date toddy shops.*—Two thousand five hundred and forty-seven shops were sold for an aggregate sum of Rs 16,97,136 as against 2,563 shops for Rs 15,44,259 in 1912-13, showing a net increase of Rs. 1,52,877 or 9 9 per cent The number of shops closed was three in the Bangalore District, two in the Tumkur District, ten in the Mysore District and one in the Hassan District, resulting in a net decrease of 16 shops, while no new shop was opened in the Province

Financial (Separate Revenue), dated 19th February 1914.

16. The table appended below illustrates the percentage of decrease in some taluks, while there has been an increase throughout in other taluks.

Taluks	Rental		Minus	Per centage of minus
	1912-13	1913 14		
	Rs.	Rs.	Rs.	Rs.
Bowringpet	14,358	14,082	272	1·9
Kolar Gold Fields area	67,440	66,168	1,272	1·9
Mysore City	1,00,320	97,800	2,520	2·5
Heggaddevankote	14,850	13,584	1,266	8·5
Mandya	14,940	12,852	2,088	14·0
Arkalgud	10,686	9,660	1,026	9·6

17. *Bagani toddy shops.*—Six hundred and eighty-five shops were sold for an aggregate amount of Rs. 48,903-12-0 as against 695 shops for Rs. 44,387-7-0 in 1912-13, showing an increase of Rs. 4,516-5-0 or ten per cent. The number of shops closed was 10 in the Kadur District, while no new shop was opened in the current year. There has been an increase throughout in the Bagani Taluks with the exception of Sagar, where the amount of rental obtained was 9,660 against 10,686 in 1912-13, showing a decrease of Rs. 1,026 or 9·6 per cent.

18. The subjoined statement in thousands of rupees shows the amount of rental, district-war, obtained under date toddy for the last 16 years from which it is seen that all the districts in the State without a single exception record for this year figures higher than any hitherto obtained since the introduction of the tree-tax system.

Years	Bangalore	Kolar	Tumkur	Mysore	Hassan	Kadur	Shimoga	Chitaldrug	Total
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

1912-13	280	215	228	374	126	72	51	193	15·44
1913-14	284	229	272	402	137	90	60	219	16 97

19. Judging from the aforesaid results it is suggestive if the existing rate of tree-tax is not capable of further enhancement in order to reach the level of normal proportion of duty and of rental to the total toddy revenue as is now obtained elsewhere. The percentage of shop rental and of tree-tax to the total toddy revenue obtaining both in Madras and Mysore is given below, side by side, for purposes of comparison.

Years	Toddy shop rental	Tree-tax	Total	Mysore		Madras	
				Percentage of rental to total revenue	Percentage of tree-tax to total revenue	Percentage of rental to total revenue	Percentage of tree-tax to total revenue
1899-00	10,81,669	5,48,944	16,30,613	66·4	33·6	15·8	51·2

It may also be said here that the yielding capacity of our trees is slightly higher than those of Madras

20 *Akkibhoja shops.*—Thirty-five shops were sold in the Tirthahalli Taluk of the Shimoga District, for an aggregate sum of Rs. 2,863-8-0 against the same number for Rs. 2,464-8-0 in 1912-13 showing an increase of Rs. 453 or 19 per cent.

21. *Ganja shops.*—254 shops were sold for an aggregate sum of Rs. 65,348-4-0 as against 249 shops for Rs. 56,138-4-0 in 1912-13 showing an increase of Rs. 9,210 or 16·4 per cent. The difference in the number of 5 shops is due to the opening of the 2 in the Kadur District and 1 in each of the Kolar, Mysore and Chitaldrug Districts.

22. *Opium shops.*—One hundred and thirteen shops were sold for an aggregate sum of Rs. 21,985-8-0 against 108 shops for Rs. 20,601-12-0 in 1912-13, resulting in a net increase of Rs. 1,383-12-0 or 6·7 per cent. The difference in the number of shops is due to the opening of the two shops in each of the Districts of Mysore and Kadur and one in the District of Chitaldrug.

23. *Country and Foreign draught beer shops.*—One shop of each kind was sold in the Kolar Gold Fields for Rs. 7,320 and Rs. 1,740, respectively, as against the same number for Rs. 7,860 and Rs. 4,200 in 1912-13, showing a decrease of Rs. 540 and Rs. 2,460 or 6·8 and 58 per cent.

24. *General.*—In all 4,408 excise shops of all description were sold for an aggregate rental of Rs. 22,57,272-8-0 as against 4,428 shops for Rs. 20,54,560-12-8 in 1912-13, showing a net decrease of 20 shops against an increase in revenue of Rs. 2,02,711-11-4.

25. The following table gives the comparative result under each item of excise revenue for the State :—

Items	1912-13		1913-14		Plus or minus + or —		
	Number of shops	Rental	Number of shops	Rental	Amount	Per-centage	Number of shops

* Disposed of on fixed license fees at an aggregate sum of Rs 1,237.

26. On the whole the result achieved for the current year stands highest on record. My thanks are due to the Deputy Commissioners of Districts for their prompt and earnest endeavour in seeing that the steady rise of revenue of the department is well maintained.

27. As in the last year I submit herewith a duplicate copy of the talukwar result of sales for forwardal to the Superintendent of the Government Press.

MYSORE EXCISE DEPARTMENT.

Comparative statement showing the number of excise shops and the result of sales of excise privileges in the several taluks of the Province for the year 1913-14.

(*a*) Two Toddy shops Nos. 10 and 31, Halnur and Manchegenahalli in the Tumkur Taluk closed temporarily at the request of the bidders.
(*b*) Rochesla Arrack shop in the Pavagada Taluk opened from 1 7 1912 and the leased out at monthly rental of Rs 15 was closed on 10 J 11 *vide* this office No 6529 dated 8 2 1913, and the rental of this shop from 10 J 1913 at the rate of Rs 15—amounting to Rs 55—10—4 was therefore reduced from the total rental
(*c*) Due to the accounting of 4 shops granted as 2
(*d*) Due to Recherla shop having been included in the Provincial return but excluded in the district statement.

− Closure of the undermentioned bagani toddy shops in the Chikmagalur Taluk.
1. Vastaka, 2 Arenahalli, 3 Thondavali, 4 Sivardalu, 5 Thadakesi, 6 Harvalli, 7 Chikmagrahalli, 8 Bidasi, 9 Aniganaballi.
− Inclusion of Antarghatta Jatra shop rental amounting to Rs. 15 in the Kadur Taluk.
(*a*) If Jaggary arrack shop is added in the Chikmagalur Taluk the No. of shops will tally with the Provincial return.
(*b*) If Jaggary arrack shop is added in the Chikmagalur Taluk the one estate shop will tally with the Provincial return.
(*c*) If two Bagani shops which were clubbed and sold together were accounted for separately the number will tally with the Provincial return as the District return shows less by two.
(*d*) Due to having accounted for 2 ganja and 2 opium shops in the Chikmagalur Taluk as 4 shops each though 2 shops of each kind were closed.

(1) 4 shops closed during the previous year were opened during the year.
− Due to the inclusive of 2 shops in 1912-13
(2) No. 6 Habti shop closed.
(3)§ Due to the inclusive of 2 estate shops rental amounting to Rs. 24.
(5)− Due to the exclusive of Jatra shop rental.
(6)− Due to the inclusive of 2 estate shops.

Proceedings of the Government of His Highness the Maharaja of Mysore, Financial (Salaries and Allowances), dated 13th February 1914.

READ AGAIN—

Government Order No. G. 4311-58—G. M. 322-10-1, dated 27th January 1911, directing that reports of transfers of charges by Gazetted and other officers be submitted direct to Government, the Comptroller and other officers concerned, immediately after the transfer of charge.

No. Fl. 3652-700—S. & A. 330-13-1, DATED BANGALORE, 13TH FEBRUARY 1914.

ORDER THEREON.—Government understand that in cases of leave of officers, the Comptroller calculates the actual period of leave availed of by an officer from the reports referred to above and notes it in the history of services. The issue of separate notifications cancelling the unused portions of leave as is done at present is therefore superfluous. They therefore direct that the present practice of issuing such notifications be discontinued.

J. S. CHAKRAVARTI,
Financial Secretary.

To—The Comptroller.
The other Heads of Departments.
The Deputy Commissioners of Districts.

Exd.—C. R.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No 2087—207, dated the 5th December 1913, from the Inspector-General of Police in Mysore, submitting with his observations the seventh annual report on the working of the Mysore Mines Regulation, 1906, during the official year 1912-13 —

I have the honor to forward herewith copy of Report on the working of the Mysore Mines Regulation during the year 1912-13, received from the District Magistrate, Kolar

2. *Cases*.—During the year under review there were 157 cases or 60 more than in the preceding year The increase was chiefly under Section 6 "unlawful possession of mining materials," Section 18, Clandestine hawking and "breaches of the Sanitary Rules framed under Section 34" and partly to combined closer supervision on the part of the Regular and Detective Police and Watch Establishments

Of the 157 cases, 125 ended in conviction and 32 in acquittal or discharge against 80 and 17 respectively in the previous year

3 *Persons*.—One hundred and eighty two persons were involved in these cases, of whom 139 persons were convicted and 43 were acquitted or discharged against 109, 87 and 22 respectively in the previous year

4. There were no instances of the violations of the provisions of Sections 5 and 10 during the year.

5. Section 16 "Liability of tenant or occupier of premises where mining materials are found" has not been found to be of any avail in spite of all care exercised in investigating crime thereunder Three cases prosecuted during the year have also failed

6 The work under the Regulation during the year has been satisfactory

Letter No C 29, dated 17th August 1913 from the Offg District Magistrate, Kolar, to the Inspector-General of Police in Mysore

I have the honor to forward herewith the 7th Annual Report on the working of the Mysore Mines Regulation, IV of 1906, for the official year ending 30th June 1913

2. The total number of cases filed was 157, involving 182 persons, of which 125 involving 139 persons ended in conviction and 32 involving 43 persons in acquittal or discharge, against 97 cases concerning 109 persons in the previous year, of which 80 ended in conviction of 87 persons and the rest in acquittal or discharge

The net increase of 60 cases was mainly under offences referring to unlawful possession of contraband mining materials, violation of Sanitary Rules framed under Section 34 of the Mysore Mines Regulation and in clandestine hawking.

3 During the year under report, 76 cases involving 88 persons were put up by the Police before the Courts under Sections 5 to 19 of the Regulation, as against 50 cases involving 57 persons for last year The figures for this and the preceding year are as follows.—

Sections of the Mysore Mines Regulation	1911-12				1912-13			
	Prosecuted		Convicted		Prosecuted		Convicted	
	Cases	Persons	Cases	Persons	Cases	Persons	Cases	Persons
5 and 13	1	1	1	1				
6 and 13	12	18	6	7	34	46	26	35
7 and 13	2	2	1	1	3	5	3	3
7, 12 and 13	2	3	2	3				
12 and 13	5	5	4	4	3	3	3	3
16 and 13	2	2			3	4		
17 and 19	23	23	23	23	20	20	19	19
18 and 19	3	3	3	3	13	13	12	12
Total	50	57	40	42	76	88	63	72

(i) There is an increase over last year's figures under Sections 6 and 13, and 18 and 19, the remainder being normal. No cases were put up under Section 5 or 10.

(ii) *Section 6, Unlawful possession of mining material*.—There is an increase of 22 cases over last year and I attribute this to several cases of a petty nature brought

to light by the Regular Police and Watch Establishment. The percentage of convictions secured is very much better than last year, being 76·4, as compared with 50·0. I notice, however, a decrease in the number of ordinary thefts of quartz which may possibly be due to the Police trying for bigger game and neglecting somewhat the smaller fry, or it may be due to increased vigilance on the part of the Watch Establishment. Four cases are worth mentioning under this section, *viz.*, a komati named Srinivasa Chetty being found in possession of sponge gold valued at Rs. 250—detected by the Watch Establishment; Rs. 890 worth of amalgam in possession of a woman named Nayagam, which was strongly suspected to have came from the house of a European Millman: also by the Watch Establishment; Rs. 438—worth of brass fittings detected by the Detective Department, accused a Marwari and Rs 120 of sponge gold in possession of a Komati also by the Detective Department.

(iii) *Section 7, Licenses required for gold dealers and goldsmiths.*—As in the previous year, no gold dealers' license was granted nor was any applied for. In all, 24 licenses were granted as against 25 in the year previous, to professional gold smiths and the license fees amounting to Rs. 120 were realized against Rs. 125 in the previous year.

Three cases under this section involving 3 persons were put up for trial and all ended in conviction, as compared with 2 cases involving two persons last year, in which only one conviction was secured.

(iv) *Section 10, Books to be maintained by licensed gold dealers and goldsmiths.*—No prosecutions were instituted during the year, as in the year previous, under this section for failing to maintained the required registers.

(v) *Section 12, Possession of unwrought gold.*—Three cases involving 3 persons were put up and all ended in conviction. Last year, 5 cases were put and 4 convictions resulted. The Special Magistrate on the Field opines that this section should be altered as none can escape if he is caught with unwrought gold. He has, however, like his predecessor Mr. Matthan, missed the point which is that they are not meant to escape and no loop hole was given by the framers of the Regulation for them to do so. It may seem hard, but it is quite necessary to have this restriction on the Gold Field area.

(vi) *Section 16, Liability of tennant or occupier of premises where mining materials are found.*—This section continues to keep up its reputation as being unable to obtain any convictions. Three cases were put up and all failed. In one case, 2 women occupied a hut in the Model Cooly Colony and one of them produced some quartz before the Police from the hut. They were both put up and discharged. They were leasing the hut from another woman and she was put up with the same result. I must repeat what I have said in previous reports, *viz*, that I consider the section quite useless for the purpose for which it was enacted.

(vii) Section 17, *Undesirables.*—Twenty cases involving 20 persons were put up and all but one ended in conviction. This case failed, because the undesirable produced witnesses to say, that he was caught on the main road close to the Masikam Cooly Colony and not in the Colony itself. The figures are on a par with those of last year. Thirty notices were served during the year, 18 by the Watch Establishment and 12 by the Police. The section is exceptionally useful and has done a lot of good in driving undesirable characters off the field. But, nevertheless, it has now become exceedingly necessary that punishment for this offence should be enhanced. As the law is at present the maximum punishment is three months and there are now to be found many rogues who have been convicted under these sections as many as 7 or 8 or 9 times and more. The profit to be derived by gold thieves is very well exemplified by this; three months imprisonment is nothing to them, they will do it on their heads, as the saying goes, and come back again on the chance of another good haul. I would suggest a maximum of a year's imprisonment at least.

(viii) *Section 18, Hawkers and Pedlars.*—During the year under report, 99 licenses fetching Rs. 195, were issued for selling fancy and other articles on the several Mines. Out of these 99 licenses, 44 appertain to hawking and the rest peddling. In all 14 cases involving 15 persons were brought to trial under Sections 18 and 19, as against 3 cases with 3 persons in the previous year. Of these cases, 13 ended in conviction and the other in acquittal. The increase is attributable to more supervision by the Regular and Detective Police.

Judicial and Legislative (Legislation) dated 7th February 1914.

4. *Sections 21 to 33—Safety and discipline of mining employees.*—Three cases involving 3 persons were put up for trial during the year, against 12 cases involving 13 persons by the Geological Department, for breaches of Mining Rules endangering the safety of human life, no prosecutions being undertaken by the Police or the Mining Companies direct. Of the 3 cases alluded to, 2 ended in conviction, and the other with one person was acquitted.

5. *Mining accidents.*—The total number of mining accidents that occurred during the year was 69 concerning 89 persons, as against 83 in the previous year. Of the 89 persons, 80 persons succumbed to the accidents underground and rest in the Companies' Hospital, as a result of several complications resulting from the injuries sustained.

6. *Prosecutions under the Sanitary Rules.*—During the year under report, 77 cases with 89 persons were brought to trial for breaches of the Sanitary bye-laws framed under Section 34 of the Regulation, the corresponding figures of the previous year being 35 cases involving 40 persons. Of the cases put up, 59 cases involving 64 persons ended in conviction and the rest in acquittal.

7. *General.*—With the exception of Section 16, the work under the Regulation during the year has been very satisfactory. I would like, however, to draw attention to rules 192-193 of the rules under the Regulation. These rules are somewhat clumsily worded, and I am of opinion if they were made simpler, a greater use would be made of them, which I am sorry to say, appears to be rather desirable.

I attach three tables which may be of interest, showing (1) by whom the cases were detected, (2) nature of property, (3) approximate value of the same.

Statement showing the number of cases under sections of the Regulation, by whom detected and value—1912-13.

Sections	Regular Police	Detective Police	Watch Establishment	Sanitary Department	Total	Value

Proceedings of the Government of His Highness the Maharaja of Mysore, Judicial and Legislative (Police), dated 7th February 1914.

READ—

Letter No. C. 166, dated the 25th—31st October 1913, from the Inspector-General of Police in Mysore, forwarding the Administration Report of the Police Department for the year 1912-13.

NO. J. 2263-70—POL. 97-13-2, DATED BANGALORE, 7TH FEBRUARY 1914.

ORDER THEREON.—The report, which, under Government Order No. G. 684-723—G. R. 10-15, dated the 4th August 1905, was due in the Secretariat on the 1st October 1913, was actually received on the 2nd November 1913, or nearly a month later. It is hoped that the Inspector-General of Police will take the necessary steps to submit his report on due dates in future.

2. The number of cognizable offences reported to the Police during the year was 5,930, being nearly the same as that of the previous year. The various classes of offences do not show any marked variation. Offences against persons, serious and ordinary increased by 100; and serious offences against property showed a slight decline. Including the number of cases pending from the previous year, the Police dealt with 10,645 cases as against 10,494 during the previous year. Of this number, 3,419 cases were reported on "B" form, 838 on "C" form and 4,128 cases were charge-sheeted before Magistrates, 180 cases being disposad of otherwise.

3. Of the number of cases placed before Magistrates on "A" form, 2,328 cases ended in conviction and 771 in acquittal or discharge, the percentage of convictions to cases decided being 75·1 as against 74 in the previous year.

4. The fall in the percentage of the recovery of stolen property from 47 to 34·6 in the year under review cannot be lightly passed over. The explanation offered for this decline in para 19 of the report does not appear to Government to be satisfactory.

5. The Village Police arrested 67 persons concerned in 56 cases, of whom 62 persons were convicted, 2 were acquitted or discharged and the rest were under trial.

6. The Criminal Investigation Department was made permanent during the year. Government are glad to note the testimony borne by the Inspector-General of Police to the good work done by the staff.

7. In para 35 of his report, the Inspector-General of Police brings to notice once again that the work of the department is, to some extent, handicapped by the difficulty experienced in getting proper men to fill the several vacancies in the constabulary. To obviate this and other difficulties, Government have recently sanctioned a scheme of reorganization of the department which provides for an increase of pay to the constable by one rupee all round and also for the better training of recruits. Government trust that these measures will go some way to enable the Inspector-General to raise the level of efficiency of the department.

K. R. SRINIVASIENGAR,

Letter No. 4—C 1, dated the 8th January 1914, from the Chairman of the City Improvement Committee, Bangalore, requesting sanction to the proposals of the Committee concerning the rules for the conduct of business and the appointment of co-opted members

---

No 8105—Ml 10-13-14, DATED BANGALORE, 25TH FEBRUARY 1914.

ORDER THEREON.—Government are pleased to accord sanction to the rules of business proposed by the Committee as well as to their proposal to appoint co-opted members, not exceeding two at any given time, for the consideration of any special subject.

2. A copy of the rules approved by Government is appended.

K. R. SRINIVASIENGAR.
Secy. to Govt., Gen. & Rev. Depts.

To—The Chairman of the City Improvement Committee, Bangalore

Exd.—C. R.

Rules regarding conduct of business of the City Improvement Committee of 1914, Bangalore.

1 In the absence of the *ex-officio* Chairman, the Committee shall appoint one from amongst the members for presiding at the day's meeting.

2. The Committee shall meet at least once in a month, but for the present they shall meet twice, *i.e*, on the 1st and 3rd Wednesdays of every month.

3. The meeting shall be convened by the Secretary under the orders of the Chairman.

4. Three clear days' notice shall be given of a proposed meeting and every member shall be furnished with a copy of the agenda to be placed before the Committee

5 In emergent cases the Chairman may obtain the Committee's opinion by circulation of papers

6. The quorum shall consist of not less than half the members and when there is an equal division of votes, the Chairman shall have the casting vote.

7. A meeting adjourned for want of quorum may proceed with its business on the adjourned day without a quorum.

8. The minutes of the Committee shall be recorded in a special book and copies thereof shall be submitted to Government not later than a week

9. A separate file shall be maintained of all plans, proposals and schemes considered by the Committee and submitted to Government.

10. Any member absent for three consecutive ordinary meetings of the Committee, without giving previous intimation to Chairman, is liable to forfeit his seat on the Committee.

1. Inspection Notes* of the Dewan's tour in the Malnad during March 1913.

2. Notes* on the question of the decimation of population in the Malnad furnished by the following gentlemen:—

(i) Mr. V. R. Thyagaraja Iyer, M.A., Census Superintendent in Mysore.

(ii) Mr. S. Hiriyannaiya, M.A., B.L., Private Secretary to the Dewan.

(iii) Mr. V. S. Sambasiva Iyer, B.Sc. L.C.E., Officer in charge of Industrial Surveys in Mysore.

(iv) Dr. M. Srinivasa Rao, M.A., M.D., B.Sc., D.P.H. & F.C.S., Director of the Public Health Institute, and Deputy Sanitary Commissioner to Government.

(v) Mr. R. Subba Rao, M.B.C.M. & L.S.Sc., District Sanitary Officer, Kadur District.

(vi) Mr. D. Srinivasiengar, B.A., Assistant Commissioner, Shimoga District (with reference to the Nagar Taluk only).

(vii) Mr. K. Srinivasa Rao, Deputy Commissioner, Shimoga District.

(viii) Mr. S. R. Balakrishna Rao, B.A., LL.B., Advocate, Shimoga.

(ix) Mr. A. Mrityunjaya Iyer, B.A., Assistant Commissioner.

3. Extract* from the Proceedings of the June Session of the Mysore Economic Conference of 1912 on the 'Decrease of population in the Malnad.'

4. Correspondence* ending with letter No. 4405, dated 6th May 1913 from the Sanitary Commissioner in Mysore submitting a report on the causes for the decline of population in the Malnad District of Kadur and the measures needed for removing such causes.

5. Government Proceedings* No. C. 277-84—Med. 234-12-1, dated 18th June 1913, appointing Mr. K. Matthan, B.A., as Officer on Special Duty to study all records and previous Notes and to draw up a scheme in consultation with the Sanitary Commissioner and Lieut.-Col. Foulkes detailing the measures necessary for the improvement of the Malnad for the orders of Government.

6. Letter* No. 31, dated 2nd July 1913 from the Sanitary Commissioner in Mysore forwarding a letter from the Deputy Sanitary Commissioner dwelling on the same question with special reference to the Shimoga District and malaria.

7. Letter* No. 56—31, dated 4th August 1913 from Mr. K. Matthan, B.A., Officiating Deputy Commissioner, Shimoga District, submitting a Memorandum containing proposals for the improvement of the Malnad.

(* NOTE.—1 to 7 printed as annexures.)

No. 8036-84—MED. 24-13-13, DATED BANGALORE, 24TH FEBRUARY 1914.

ORDER THEREON.—The decrease of population in some parts of the Malnad first attracted attention from the results of the Census of 1901 and the question of appointing a Committee to enquire into the causes of the decline was mooted in the Representative Assembly of 1907. As a preliminary step the Sanitary Commissioner was requested in February 1908 to collect all available statistics bearing upon the question through the ordinary official channels. Subsequently in August 1910, a small temporary clerical establishment was sanctioned for the purpose under the Health Officer of the Shimoga District.

2. The publication of the results of the recent Census about July 1912 only served to emphasise the urgency of a thorough examination of the problem and some substantial progress was made in that direction in 1912. The subject was discussed by the Economic Conference in its Session in the same year.

3. In the early part of 1913, the Dewan toured through the principal parts of the Malnad with the object, among others, of ascertaining the views of the leading local people on the causes of decline in the population. The subject was discussed at the meetings held during the tour at Shimoga, Sagar, Tirthahalli and Koppa on the 4th, 6th, 9th and 11th March 1913 respectively with a view to

determine the main directions in which practical action should be taken. The various notes printed as annexures to this order contain the views of both official and non-official gentlemen of standing consulted in regard to the question of Malnad improvement.

4. As a result of these preliminary investigations, a provision of 3 lakhs of rupees for Malnad improvement for the next 3 years was made in the triennial financial forecast and Mr. Matthan was placed on special duty to further discuss the question with the Deputy Commissioners of the three Malnad districts and also with the Sanitary Commissioner and Lt.-Col. Foulkes, I. M. S., on the materials already collected and to draw up a comprehensive scheme for the improvement of the Malnad.

5. Mr. Matthan's report which contains a very careful summary of the various proposals put forward as well as the results of his own enquiries and investigations is also printed as an annexure to this order.

The tract known as Malnad comprises areas in three districts of the State as under:—

SHIMOGA DISTRICT.

The whole of the Sagar, Nagar and Tirthahalli Taluks, whole of the Kumsi Sub-Taluk except the portions of the Harnahalli hobli lying to the right of the Bangalore-Honnavar road, the Kasaba and Belandur hoblis of the Shikarpur Taluk and the Kasaba, Chandragutti and Ulivi hoblis of the Sorab taluk.

KADUR DISTRICT.

The whole of the Mudgere and Koppa Taluks and of the Yedahalli Sub-Taluk, the Lingadahalli and Lakkuvalli hoblies of the Tarikere Taluk and the whole of the Chikmagalur Taluk with the exception of the Kalasapur, Mirle and Lakya hoblies.

HASSAN DISTRICT.

The whole of the Manjarabad Taluk and of the Alur Sub-Taluk, and the Madihalli, Bikkodu, Arehalli and kasaba hoblis of the Belur Taluk.

Measures to be taken immediately.

6. Attention should be primarily directed to the measures necessary for the removal of the most deleterious influences and the most patent evils which have hitherto been contributing towards the increase of diseases and deaths in the Malnad. These are:—

(1) To clear rank vegetation and remove small trees and scrub jungle as far as possible within half a mile round every inhabited area and to encourage the people by suitable means to undertake the work of such clearance themselves in a systematic manner.

(2) To sink wells for the supply of good drinking water and to keep them pure.

(3) To afford reasonable facilities to cultivators to obtain timber for building within a reasonable distance from their villages and to frame rules for this purpose in consultation with the Revenue and Forest Departments.

(4) To improve drainage and keep paddy fields away at some distance from villages and other residential areas.

(5) To keep cattle out of human dwellings by providing separate sheds for them.

(6) To spread sound ideas among the people about sanitation in and around dwelling houses, food, clothing, personal hygiene, precautions to be taken during child-birth, medical help, use of quinine, utility of vaccination, etc. To this end, simple rules should be printed and circulated broad-cast in the shape of leaflets.

Local Fund and Sanitary (Medical), dated 24th February 1914.

A record of progress made under each of these heads should be maintained and a quarterly report of such progress submitted to Government.

Agency.

7. A Committee should be constituted in each of the districts of Shimoga, Kadur and Hassan by the Deputy Commissioners concerned for giving practical effect at once to the improvements indicated in paragraph 6 and for developing other schemes of permanent improvement for the tract. It should consist of selected non-official members not exceeding three for each district and the total strength of each Committee should not exceed nine members. The Committees should ordinarily meet not less than once a month for transacting business and they should utilize the services of the District Medical and Sanitary Officer or Officers to the utmost extent possible for developing their work.

The Deputy Commissioner of each district will be the Chairman of the Committee concerned and the decision of the majority of the Committee shall be deemed to be the opinion of the Committee. It will be open to the Committees to invite expert advice on the technical aspects of any contemplated measures and to consult the Sanitary Board as often as may be necessary.

Funds.

8. The sum of rupees one lakh provided in the Budget for 1913-14 may be utilized by the three District Committees as follows:—

	Rs.
Shimoga	50,000
Kadur	30,000
Hassan	20,000

These amounts include charges for the special establishment employed.

Establishment.

9. For the present, one Revenue Officer, assisted by an Officer of the Sanitary Department, will be placed in charge of the Malnad improvement operations under the direction of the Committees. The headquarters of these officers will be at Shimoga. Mr. Ananda Rao Sirsi, B.A., LL.B., will be the Revenue Officer and he will act as Secretary to each of the three Committees. The Sanitary Commissioner is requested to recommend the name of a competent officer of the Sanitary Department for duty under the Special Officer.

In order to ensure proper co-ordination of work and uniformity of operations in the three districts, the three Committees should meet at a central place, once every quarter, for discussing all important questions connected with the several schemes. The Senior Deputy Commissioner present will preside over such a meeting. Lt.-Col. T. H. Foulkes, I.M.S., F.R.C.S., M.R.C.P., Durbar Physician and Surgeon, may be requested to be present at such meetings, if he can conveniently do so and to assist the Commitees with his advice and suggestions.

The Committees should forthwith bring into existence the organization needed for immediately starting these works and should complete the execution of as many of the urgent works as possible before the end of June next. The staff required for direction and execution of approved works together with the ministerial and menial establishments needed will be temporary and as shown in the proposition statement annexed. All the funds allotted to the Committees may be utilized, if they can be usefully spent on local works of improvement referred to in paragraph 6 above before the end of the current official year.

The Proceedings of each Committee should be recorded in a journal and a copy of such proceedings submitted to Government as well as to the Revenue Commissioner and the Sanitary Commissioner. The Sanitary Commissioner should attend the meetings whenever his presence is necessary and he can conveniently do so.

General Schemes to be formulated and executed by the Committee.

10. The general schemes to be formulated by the respective Committees in consultation with the Departments concerned and to be executed by the Committees after they are sanctioned by Government, relate to the formation of travelling dispensaries, promotion of vaccination, increased aid by

midwives and nurses, expansion of communications (*i.e.*, railways and roads), attraction of settlers to the Malnad, improvement of registration of vital statistics, relief of agriculturists from avoidable indebtedness, establishment of model villages, greater facilities for cattle grazing and supply of fuel and timber, abatement of intemperance, and employment of itinerant lecturers for preaching to the people the evils of drinking and early marriages, the advantages of education and good sanitation. The more important of these schemes at least should, if possible, be completed and sanction obtained before the end of the current official year so that they might be ready for execution in 1914-15.

Points for investigation by the Committees.

11. Government consider that there are several important matters requiring close and careful investigation by the Committees, such as increase of population in some villages in the Malnad notwithstanding its general decline in the entire tract; the period of the year in which deaths are most numerous and the reasons therefor: the alleged suitability of *Bagani* toddy as a drink in the Malnad; the susceptibility of special classes of people to premature loss of vitality with reference to religion, age, migration, profession, habits of life, etc; the effects of expansion of forest area; the necessity of taking a census of the population in this tract at frequent intervals and the desirability of adapting the *khaneshmari* accounts of the Malnad villages to indicate the increase or diminution of population.

Departmental Schemes.

12. There are several matters in regard to which the departments of Government have to take the initiative and formulate suitable schemes for improving the Malnad.

The Sanitary Department should, in consultation with experts, draw up a scheme for conducting such sanitary survey and laboratory investigation as may be needed for identifying the species of mosquitoes which spread malaria. It may be found desirable to consult outside experts in connection with the research work. After a preliminary study of the conditions of malaria in the tract, the Sanitary Commissioner may apply to Government for such consultation with experts on malaria.

The Department of Education, should, out of the funds ordinarily placed at its disposal, provide for a due increase of Primary Schools in the Malnad tracts and for encouragement of private effort in this direction by suitable grants-in-aid; for a simpler and easier book of health lessons for use in the highest classes of elementary schools; for industrial schools having special reference to the indigenous and particularly forest industries; for systematic medical inspection of school-going population and better regulation of physical exercise in all schools of instruction and for scholarships to students that go to the Maidan parts for receiving secondary, higher and professional education.

A suitable scheme for the encouragement and development of industries indigenous to the Malnad, particularly industries connected with the utilization of the forest products, should be drawn up by the Department of Industries and Commerce in consultation with the Conservator of Forests.

The Registrar of Co-operative Societies should study the economic conditions in the Malnad with a view to encourage co-operative enterprise, particularly co-operative stores and co-operative societies for transporting produce.

The Committees may be consulted by the departmental heads wherever necessary and detailed proposals for schemes referred to above should be submitted as early as practicable for the orders of Government.

13. The Deputy Commissioner and Chairman of each Committee is requested to see that all Government Officers serving in the area concerned are given specific duties in connection with the Committee's work as far as they may be able to perform them without prejudice to their normal duties. It is particularly requested that written instructions may be issued by each Deputy Commissioner and Chairman, defining the extent and nature of the work to be done by every local officer to facilitate the work of the Committee and to co-operate with the officer in charge of the Malnad operations. Government will appreciate every endeavour on the

Local Fund and Sanitary (Medical), dated 24th February 1914.

part of the Deputy Commissioners to ensure, for the sake of the furtherance of the main object of the order, namely the improvement of the Malnad, that the people, the officers and the special staff work without friction and that there is no overlapping of functions in any sphere of work.

14. Government desire to place on record their appreciation of the industry and thoroughness with which Mr. Matthan has drawn up his report.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No. 7367—385, dated the 15th December 1913, from the Inspector-General of Education in Mysore, submitting proposals for opening new schools and for strengthening the establishment of existing schools at a total cost of Rs. 41,685 per annum.

No. 7718-9—EDN. 223-13-2, DATED BANGALORE, 9TH FEBRUARY 1914.

ORDER THEREON.—A special grant of one lakh of rupees has been allotted in the current year's State Fund budget for the expansion of primary education. The Inspector-General of Education has now submitted carefully considered and detailed proposals for opening 158 new schools at a cost of Rs. 27,372 per annum, and proposes to expend Rs. 14,313 per annum in entertaining additional hands in existing schools, increasing the pay of the establishment and in house-rent and contingencies. These proposals are sanctioned. An abstract of the proposed expenditure is given below :—

New schools.

No.	Kind of school	Number of schools to be opened	Cost per mensem
	State Fund Schools.		Rs
1	Taluk Kannada Boys' Schools	9	232
2	Do Girls' Schools	4	193
3	Taluk Panchama Schools	3	38
4	Taluk Hindustani Boys' School...	1	27
5	Do Girls' Schools	2	62
	Total of State Fund Schools	19	Rs. 552 per mensem or „ 6,621 per annum.
	Village School Fund.		
1	Village Elementary Kannada Boys' Schools ...	82	860
2	Do do do Girls' Schools ...	28	546
3	Do do Panchama Schools	17	195
4	Do do Hindustani Boys' Schools ...	10	106
5	Do do do Girls' Schools ...	2	22
	Total of Village Fund Schools ...	139	Rs. 1,729 per mensem or Rs. 20,718 per annum.
	Grand Total of New State Fund and Village Fund Schools	158	Rs. 2,281 per mensem or Rs. 27,372 per annum.

Additional hands, etc., for existing schools.

Kind of schools	Cost of additional hands sanctioned including allowances	Cost of increases of pay to existing establishment	Cost for house rent	Contingencies	Total
1	2	3	4	5	6
State Fund Schools.	Rs.	Rs.	Rs.	Rs.	Rs.

Total cost of new schools, additional hands, increases of pay to existing hands, house rent and contingencies Rs. 3,473¾ per mensem or Rs. 41,685 per annum.

2. The total cost of Rs. 41,685 per annum sanctioned above will be met from the special grant of Rs. 1,00,000 referred to. The cost on account of State Fund Schools, *viz.*, Rs. 15,213 per annum will be included in the Education State Fund budget. The cost on account of the Village Fund Schools, *viz.*, Rs. 26,472 per annum will be treated as a grant-in-aid from the State Funds to the Village School Fund and included in the State and the Village School Fund budget under the heads concerned.

3. A lump sum grant of Rs. 15,000 is also sanctioned, for furniture and appliances to the new schools, the charge being met from the savings out of the special grant of Rs. 100,000.

C. S. BALASUNDARAM IYER,
Secy. to Govt., Depts. of Education & Agriculture.

To—The Inspector-General of Education in Mysore.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No. 9136—466, dated the 20th January 1914, from the Inspector-General of Education in Mysore, submitting proposals for holding a public examination for the purpose of granting certificates to pupils that have successfully gone through the Elementary Commercial Course.

No. 9136—466, dated Bangalore, 20th January 1914, from Rao Bahadur M. Shama Rao, M.A., Inspector-General of Education in Mysore, to C. S. Balasundaram Iyer, Esq., B.A., Secretary to the Government of His Highness the Maharaja of Mysore, Departments of Education and Agriculture, Bangalore.

I have the honour to forward herewith a copy of the Proceedings of the meeting of the Committee for the Management of the Commercial School, Bangalore, held on the 11th December 1913, and to request permission to hold a public examination for the purpose of granting certificates to pupils that have successfully gone through the Elementary Commercial Course. The subjects for the examination and other particulars about it will be found in the enclosed copy of the notification which is to be published in the *Mysore Gazette*, after the approval of Government is received for the same.

The probable receipts and expenditure on account of the examination of 1914 will be as follow:—

		Rs.
Receipts—		
Application fees from about 150 candidates at Rs. 3 ...	...	about 450
Expenditure—		
1. Remuneration for setting the papers as per scale given in para 8 of the Proceedings (to be approved) ...	...	about 100
2. Remuneration for valuing the papers and for conducting the Practical Examination; and other expenses (to be approved)	...	about 250
	Total about	350

Thus it will be seen that there will be no additional cost to Government for conducting the examination.

The expenditure during the current year will be met from savings in the provision of Rs. 4,000 in the Commercial School budget for "Honoraria for special courses of instruction" and I request that Government may be pleased to make a lump sum provision of Rs. 1,000 in the next year's budget on account of this examination, as well as of the examination for the Secondary Course, which also will have to be held then.

As the applications for the examinations are to be sent up before the 1st March 1914, I request that you will be so good as to obtain very early orders of Government in the matter.

Proceedings of the third meeting of the Committee for the Management of the Government Commercial School, Bangalore, held on Thursday the 11th December 1913 at 5-15 P.M. in the Government High School Hall, Bangalore.

Present.

M. Shama Rao, Esq., M.A. (President).
V. Subramanya Iyer, Esq., B.A. (Secretary).
J. S. Chakravarti, Esq., M.A., F.R.A.S., etc.
S. V. Setty, Esq., B.A.
B. K. Garudachar, Esq.

The Proceedings of the second meeting were read and confirmed.

The following resolutions were unanimously passed:—

1. That for purposes of granting certificates to pupils that have successfully gone through the Elementary Commercial Course, a public examination be annually held about the 15th of April in all the subjects prescribed for that course. The exact dates of the examination may be notified by the Secretary.

2. That the examination of 1914 be confined to the four following subjects, as there is no likelihood of candidates appearing for the rest :—

1. Correspondence and Office routine.
2. Book-keeping.
3. Shorthand.
4. Typewriting.

3. That an examination fee of Rs. 3 for each subject brought up be levied from each candidate

4. That the Manager, Mysore Local Examinations, be asked to make the requisite arrangements for receiving and registering the applications, printing the question papers, conducting the examination, and receiving and tabulating the results, which shall be published by the Committee.

5. That the applications together with the Treasury receipts for the fees paid should reach the Manager, Mysore Local Examinations, not later than the 1st March immediately preceding the examination.

6. That only pupils of Technical Schools recognised by the Government of Mysore be allowed to appear, provided that such pupils are certified, by the Principals or Headmasters, to have attended the school for at least 60 per cent of the number of working days during the year.

7. That for the examination of 1914 the following scheme be adopted :—

Subject	Number of question papers	Time	Max. marks	Pass minimum
1. Correspondence ...	1. Letter writing ...	2 hours	75	45 per cent for 2nd class
	2. Principles ...	2 hours	75	60 per cent for 1st class
2. Book-keeping ...	1. Principles ...	1 hour	50	Special attention will
	2. Practical paper ...	3 hours	100	be paid to handwriting.
3. Shorthand ...	1. Dictation ...	¼ hour	75	6 per cent mistakes
	2. Principles ...	1 hour	75	allowed.
4. Typewriting ...	1. Speed test ...	½ hour	60	Do
	2. Statement ...	1½ hours	60	
	3. Practical ...	...	30	

8. That the following scale of remuneration to examiners be adopted :—

Subject	For setting each paper	For valuing each paper	For practical examination
	Rs.	As.	
1. Correspondence—			
(*a*) Letter writing	15	4	
(*b*) Principles	15	4	
2. Book-keeping—			
(*a*) Principles	15	4	
(*b*) Practical	15	4	
3. Shorthand—			
(*a*) Dictation and Transcription ...	10	8	
(*b*) Principles	10	4	
4. Typewriting—			
(*a*) Speed paper and statement ...	15	8	
(*b*) Practical	.....	.....	8 annas a pupil.

9. Resolution about the Examiners.

10. That Mr. T. Lakshminarasimha Rao and the Secretary form a Board for moderating the question papers.

11. That the question papers be sent by the Examiners to the Secretary before the 15th of March.

Local Fund and Sanitary (Examination), dated 12th February 1914.

No. 7792-3—EXMN. 9-13-2, DATED BANGALORE, 12TH FEBRUARY 1914.

ORDER THEREON.—The scheme for holding an examination of the Elementary Grade in Commercial Subjects is approved.

2. The receipts and expenditure of the examination of 1914 are estimated by the Inspector-General of Education at Rs. 450 and 350 respectively. The estimates are accepted. The expenditure of Rs. 350 will be met from savings in the provision of Rs. 4,000 in the budget of the Commercial School, Bangalore, for "Honoraria for Special Courses of Instruction".

3. A provision of Rs. 1,000 will be included in the next year's Education Budget under a new head "Government Technical Examinations" for the charges of this examination and for the examination of the Secondary Course in Commercial Subjects which is expected to be held in 1915. The Inspector-General of Education is requested to include the anticipated receipts from the examinations of 1915, in the Budget for 1914-15.

Proceedings of the Government of His Highness the Maharaja of Mysore, General (Miscellaneous), dated 7th February 1914.

READ—

Government Order No. G. 7388-436—G. M. 326-12-1, dated the 22nd May 1913, sanctioning the opening of a class in the Commercial School to teach printing.

2. Correspondence ending with letter No. 2695—156, dated the 27th August 1913, from the Inspector-General of Education submitting detailed proposals in consultation with the Superintendent, Government Press, for the opening of a printing class.

No. G. 6091-3—G. M. 326-12-5, DATED BANGALORE, 7TH FEBRUARY 1914.

ORDER THEREON.—Government consider it sufficient for the present to open a printing class tentatively for a year as an annexe to the Government Press.

Mr. Yates, who has kindly consented to conduct the class, is requested to make arrangements for holding it in a wing of the Government Press building, and imparting instruction in composing, proof-reading and printing.

3. The number of pupils that may be admitted to the class will be limited to 30 to start with and the class will meet during the usual office hours.

4. Sanction is given to the purchase of the marginally noted type, materials and plant at an estimated cost of Rs. 3,500 for the use of this class. The source from which the cost has to be met will be pointed out later on.

The Comptroller, Mysore Government.

Exd.—C. R.

No. G. 5924-72—G. M. 259-13-1, DATED BANGALORE, 3RD FEBRUARY 1914.

ORDER.—In discussing a triennial forecast of the Finances of the State in Government Order No. 7281-326—G. F. 183-12-1, dated the 17th June 1913, mention was made of the necessity for making special provision for the "Efficiency Audit" of Government departments corresponding to some extent to the account audit already in existence; and provision was accordingly made for an expenditure of Rs. 24,000 per annum for the purpose for the next three years.

2. In the last Address to the Dasara Representative Assembly, the objects of "Efficiency Audit" were declared to be "to provide for more frequent and systematic inspections, to improve the office manuals and standing orders and to ensure that the rules and orders in force are properly worked, or, if not workable, promptly modified, that beneficent activities of every kind receive stimulus, that serious irregularities receive prompt attention, that in short, waste of power and slackness of execution in the different departments of Government are controlled and minimised."

3. There are 20 major and about 15 minor departments and some of the heads of departments are also Secretaries to Government in their respective departments.

A greater degree of co-ordination and uniformity of work and procedure than exists at present seems necessary to ensure that the individual activities and operations of the several departments are in consonance with the general aims and objects of the Government, that the expenditure on them bears a reasonable proportion to the results achieved or expected, and that the departments themselves are maintained according to the latest standards of progressive administration.

It is also considered necessary to provide heads of departments with some assistance in enunciating principles, revising rules and standing orders and rendering the work of every department more systematic and efficient.

4. To secure these objects, Government have decided to constitute, temporarily for three years, a separate branch of the General and Revenue Secretariat designated the "Efficiency Audit Branch."

5. The work of the Efficiency Audit Branch may, for the present, be organised under the following heads :—

(*i*) *Manuals, Standing Orders, etc.*

To ensure that manuals and standing orders are regularly compiled and maintained in the Secretariats and the various departments of Government, and that in all departments the sanctioned orders and rules and the general objects and policy of Government are closely followed.

(*ii*) *System of recruitment and the maintenance of the efficiency of services.*

To systematise orders and practices pertaining to recruitment and to ensure that reports of character and qualification of officers and subordinate members of every department are fully and correctly maintained and that promotions are regulated in accordance therewith.

(*iii*) *Proper maintenance of records.*

The preservation of records on an efficient and up-to-date system in every department and office.

(*iv*) *Periodical examination of departments.*

To assist the Members of Government in the periodical inspections and examination of individual offices and departments with a view to ensure economy in

respect of establishment and expenditure and to prevent slackness of execution in the different grades of the public service.

(v) Bureau of information—Emergency work.

To serve as a Bureau of information. The Officers and the establishment employed will also serve as a special reserve or emergency staff for investigation of irregularities in any department or of grievances in any part, of the State.

(vi) Assisting the account audit of departments.

To help the Account Offices with administrative audit, whenever needed to effectively complete the financial audit.

6. The Efficiency Audit Officer will be *ex-officio* Secretary to the Retrenchment Committee in addition to his other duties. The Comptroller, who is now a Secretary, will be a member of the Committee in the future.

7. A provision of Rs. 4,800 a year is made for expenditure on "Special Assistants or experts." It is not intended to maintain a permanent officer for this purpose. The provision will enable the Officer in charge of the Branch to obtain the services of an outside expert or of an officer of any department, for short periods at a time, to help whenever necessary in the technical work of investigation.

8. In addition to the above, it is considered necessary to place at the disposal of the Deputy Commissioners a sum averaging Rs. 60 per mensem per district to be utilized for special establishment needed in connection with investigations into the grievances of the local ryots and irregularities on the part of the minor officials. The expenditure under this head should be incurred only after the previous approval of the Government has been obtained in each case.

A separate order will issue explaining in detail the occasions on which, and the manner in which, such expenditure may be incurred.

9. The following establishment is sanctioned for starting and working the Efficiency Audit Branch :—

(i) A Gazetted Officer on a salary not exceeding Rs. 800 per mensem.

(ii) Provision of Rs. 4,800 a year for expenditure on experts or for the appointment of officers on special duty. Average monthly cost Rs. 400.

(iii) Ministerial staff consisting of one Manager, three clerks, etc., costing about Rs. 400 per mensem.

(iv) Provision averaging Rs. 60 per mensem per district for expenditure on enquiries into minor grievances or petty irregularities. Average monthly cost Rs. 480.

Details are given in the statement attached.

The total expenditure will amount to Rs. 24,978, for the present against Rs. 24,000, for which provision has been made in the Triennial Financial Forecast.

10. The ministerial staff required will be appointed at once, and a beginning made by appointing one of the officers already employed in the General and Revenue Secretariat to the charge of the new Branch, by redistributing his present work among the other officers of the Secretariat.

The actual expenditure for the current year will be met from the provision of 5 lakhs under "26 Miscellaneous" in this year's Budget.

K. R. SRINIVASAIENGAR,

Secretary to Government,
General and Revenue Departments.

To—The Heads of Departments and the Deputy Commissioners of Districts.

General (Miscellaneous), dated 3rd February 1914.

Proceedings of the Government of His Highness the Maharaja of Mysore, General (Miscellaneous), dated 25th February 1914.

READ—

Letter No. 1061, dated 16th December 1913, from the Director of Industries and Commerce in Mysore, suggesting the procedure to be adopted in regard to the disbursement of money by the Comptroller for the grant of loans and the purchase of machinery on the hire-purchase system in accordance with the rules for the grant of loans for agricultural and industrial purposes issued with Government Order No. G. 2097-145—G. M. 55-12-239, dated the 2nd September 1913.

No. G. 6770-1—G. M. 166-13-44, DATED BANGALORE, 25TH FEBRUARY 1914.

ORDER THEREON.—The Director proposes that directly after the sanction of a loan under the above rules, the money should be drawn by himself from the Treasury in a lump sum and disbursed to the borrower in instalments as per condition II (2) of Form 3 referred to in the rules. If, however, the borrower prefers to accept condition II (1) of Form 3, and entrusts the setting up of the machinery to the Department of Industries and Commerce, the money drawn is to be deposited in the Director's name in the Mysore Bank, proper accounts of the expenses incurred being rendered to the borrower with the necessary vouchers when the said machinery is handed over to him in good working order. The Director adds that as the Comptroller would only be concerned with the due repayment of instalments, his audit of the expenditure would be unnecessary.

2. The procedure proposed as regards payment for machinery bought on the hire-purchase system is similar, the Director being required to furnish accounts to the parties concerned and not to the Comptroller.

3. Government generally approve of the procedure suggested and are pleased to direct as follows—

(i) All amounts sanctioned as loans or hire-purchase advances will be paid to the parties in suitable instalments or to the Director in a lump sum, if authorized by them to receive and expend such amounts on their behalf.

(ii) The Director will render detailed accounts to the parties concerned and furnish to Government a clear acquittance from each borrower.

(iii) All recoveries will be accounted for in the usual manner.

(iv) In cases, however, in which the party does not ultimately purchase the machinery ordered and the same has to be taken over to Government in adjustment of the advance, the Director will furnish the Comptroller with a complete account *with vouchers from the firms concerned* for audit.

4. As suggested by the Director, it is necessary and desirable to make it clear to all people concerned that while Government in their desire to improve the Economic and Industrial progress of the State, have created a Department of Industries and Commerce and placed at its head an officer whose duty it is to give (or procure where necessary) expert advice or assistance to those who seek such help. Government give no guarantee and accept no financial or other liability for the soundness of such advice. The Director is accordingly requested to give this order as wide as publicity as possible.

5. A condition to this effect may be inserted in every agreement for purchase of machinery through the Director.

C. S. BALASUNDARAM IYER,
Secy. to Govt., Depts. of Edn. & Agri.

To—The Director of Industries and Commerce in Mysore.
The Comptroller, Mysore Government, through Branch II.

Government Order No. 1527—M. F. 395-09-8, dated the 7th December 1910, setting aside, with certain observations, the order of the Deputy Commissioner, Shimoga District, directing the recovery, from Subbabhatta and Bhistabhatta, of the proceeds for the year 1908-09 collected by them and relating to the inam lands endowed to the Sri Gopalakrishnadevaru and Sri Rameswaradevaru temples at Gopalapur Agrahar in the Tirthahalli Taluk.

2. Correspondence ending with letter No. 352—Muz. 82, dated the 19th May 1913, from the Deputy Commissioner, Shimoga District, reporting on the management of the above temples.

No. 2024-6—MUZ. 206-12-4, DATED BANGALORE, 7TH FEBRUARY 1914.

ORDER THEREON.—The temples of Sri Gopalakrishnadevaru and Sri Rameswaradevaru at Gopalapur Agrahar, a hamlet of Nambala village in the Muthur hobli of the Tirthahalli Taluk, are endowed with the marginally noted inam lands which form part of a mixed inam also comprising certain Brahmadaya lands. During the inam settlement of 1871, Krishnabhatta and Srinivasabhatta of Gopalapur Agrahar were recognized as managers of the Sri Gopalakrishnadevaru and Sri Rameswaradevaru temples respectively. Subbabhatta, son of Krishnabhatta, and Bhistabhatta on behalf of the minors Narayanabhatta and Srinivasabhatta, grandsons of Srinivasbhatta, have been in possession and enjoyment of the temple lands since then.

Survey No. 67 at Dasanakodagi maje of Malage village, 9 acres and 3 guntas assessed at Rs 129-0-0.
Survey No 42 Nambala village, 6 acres 9 guntas and assessed at Rs 20-0-0.

2. Complaints having been frequently received that puja in the temples was not being conducted regularly and the temple buildings were in disrepair which were confirmed by local enquiry, the Deputy Commissioner, Mr. M. S. Narayana Rao, ordered in May 1908 that the temples with their inam lands should be taken under Government management and that proper arrangements should be made for the conduct of worship and for the repairs of buildings. Subbabhatta and Bhishtabhatta having subsequently recovered the produce of the lands for 1908-09 from the cultivators, the Deputy Commissioner ordered the payment by the vahivatdars to the temple account of the amount so collected on pain of coercive process being taken for its recovery. On an appeal made to Government, it was ordered that the management of the temples and their inams should continue tentatively with Government but that the Deputy Commissioner should hold a further enquiry into the case and pass a regular order.

3. The Deputy Commissioner now reports that Bhistabhatta on behalf of Subbabhatta and the minor heirs of Srinivasabhatta has since bound himself to conduct the services in the temples according to the scale which may be fixed, to credit Rs. 100 each year for the benefit of the temples and to keep regular accounts of income and expenditure and that consequently the temples and their properties have been handed over to him. It is also reported that a sum of Rs. 388 was paid to him towards the temple expenses for the years 1910-11 and 1911-12.

4. The Deputy Commissioner's action in the matter is approved. The scale of expenditure proposed by the Deputy Commissioner and appended hereto is also sanctioned. A separate notification will issue appointing the Dharmadarsis for the temples.

K. R. SRINIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

Para 5 of Government Proceedings No. 2085-7—Muz. 382-07-6, dated 5th March 1912, directing the submission of proposals for the leasing of the lands belonging to Sri Prasanna Ramalingeswaraswami temple at Avani in the Mulbagal Taluk and for a scale of expenditure in the institution.

Letter No. 150, dated 5th December 1913, from the Deputy Commissioner, Kolar District, reporting that the temple lands have been leased out to the present tenants on full assessment for three years from 1st July 1912 and submitting a scale for establishment, Nityakatle and Hechukatle charges in the temple amounting to Rs. 766-4-3 against an estimated annual income of Rs. 1,575-9-0 and adding that the temple servants have to be remunerated with effect from 1st July 1912.

No. 2132-4—Muz. 318-13-2, dated Bangalore, 16th February 1914.

ORDER THEREON.—The Deputy Commissioner's action as regards the leasing out of the temple lands is approved.

2. The scale of expenditure amounting to Rs. 766-4-3 submitted by the Deputy Commissioner and appended to the order appears to be suitable, and is accordingly sanctioned.

3. The Deputy Commissioner is requested to submit for sanction of Government a separate bill for charges actually incurred from 1st July 1912 up to date of this order.

(2) No. 1286 dated the 22nd September 1913, forwarding printed copies of same

---

No. 230-41--1259-70 DATED BANGALORE, 5TH FEBRUARY 1914.

ORDER THEREON.—Recorded.

2. These accounts were prepared for the first time for the year 1910-11. The return now received is the second of its kind and Government are pleased to note that some useful summaries and statements have been added thereto.

3. In the Note and Tables prefixed to the Accounts, the Comptroller summarises the financial results and makes out that the maintenance charges are excessive.

The Superintending and Executive Engineers are requested to exercise stricter scrutiny and endeavour to reduce estimates for repairs so that the cost may, as far as practicable, be kept within the limits fixed, *viz.*, half per cent for ordinary repairs and one per cent for special repairs, of capital cost.

It would be interesting to know the percentage of maintenance charges ruling in the neighbouring British Provinces, if the Comptroller could ascertain the same.

4. It should be pointed out to the Executive Engineers that they are not at liberty to transfer buildings from one class to another without the sanction of Government.

K. KRISHNAIENGAR,
Offg. Secy. to Govt., Public Works Dept.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

(1) Public Works Secretary's Note dated the 24th April 1913 submitting, for orders, estimates aggregating Rs. 66,119 for improving, by recoating with metal, portions of Provincial roads, 15 miles round Bangalore and 10 miles round Mysore, as noted below:—

		Rs.
Bangalore—		
(1) Salem-Bellary road		13,893
(2) Madras-Cannanore road		11,139
(3) Bangalore-Hindupur road		1,375
(4) Bangalore-Bellary road		4,335
	Total	30,742
Mysore—		
(1) Mysore-Yelwal road		5,974
(2) Bangalore-Nilgiri road		17,760
(3) Madras-Cannanore road		11,643
	Total	35,377
	Grand Total	66,119

(2) Public Works Secretary's No. 572—3653, dated the 9th May 1913 according sanction to the estimates referred to above.

(3) Note dated the 9th May 1913 by the Public Works Secretary submitting, for sanction, special estimates for improving the worst furlongs in the following three most important roads beyond 15 and 10 miles respectively of Bangalore and Mysore:—

	Rs.
(*a*) Madras-Cannanore road (excluding portion in Kolar) beyond 15 miles of Bangalore	19,760
(1) Madras-Cannanore road beyond 10 miles of Mysore	22,755
(*b*) Bangalore-Nilgiri road in the Mysore Division ...	40,009
(*c*) Bangalore-Mangalore road in the Mysore Division ...	15,132
Total	97,656

(4) Note dated 22nd May 1913 by the same officer:—

Defective condition.—In your Note dated 15th April 1913, you have called attention to the defective condition of certain important roads in the Province and directed that the necessary estimates for improving the same may be submitted to Government for consideration.

2. *Five groups.*—The roads referred to therein may be grouped under five heads as noted below:—

I Roads round Bangalore and Mysore.
II Bangalore-Nilgiri road *via* Mysore.
III Coorg roads.
IV Mysore-Karapur road
V Hassan and Kadur roads.

Group I.—Roads round Bangalore and Mysore have now been included in the list according to your personal instructions.

Group II.—Portion from Bangalore to Paschimavahini is included under the Bangalore-Cannanore road; but the whole road from Bangalore to Nilgiris *via* Mysore is now included under this head.

Group III.—Two roads leading to Coorg, *viz.*, the Mercara road *via* Fraserpet and the Hunsur-Cannanore road, have been included under this group.

Group IV.—Portion of the Mysore-Manantody road up to Karapur is to be improved on account of the Viceroy's visit.

Group V.—All the Provincial roads about which complaints have been received from the Kadur and Hassan Coffee planters have been included in this group as per list obtained from the Executive Engineers. The Jagar Valley roads are also included in this group. I have attached a sketch map showing portions of the roads complained of by the planters; in this map the Provincial roads now proposed to be improved are shown in red, while the District Fund roads referred to by the planters have been shown in a different colour. These latter will be dealt with separately after consultation with the Deputy Commissioners concerned; and the same remarks apply to the District Fund roads round Bangalore and Mysore.

3. *Inspection notes.*—Each of the roads under the several groups has been carefully inspected by the Executive Engineers concerned. The Superintending Engineers have also scrutinised the provisions made in the estimates by careful inspection of most of the roads. I have also inspected the greater portion of the roads included in Groups I to IV above, with a view to check the provisions made in the several estimates; while the Superintending Engineer, Northern Circle, has, under special instructions, inspected the roads complained of by the planters now included in Group V.

4. *Abstract statement.*—The estimates thus framed together with previous expenditure have all been abstracted into a tabular statement attached. This speaks for itself; and the more important items under the several groups have been given below for ready reference:—

Group No.	Estimated amount	Grant		Period for		Recurring charges	
		Ordinary reserve	Special	Metal collection	Completion	Present	Proposed
I	66,119	24,119	42,000	July 1914	Dec. 1914	37,881	62,950
II	74,521	14,521	60,000	July 1915	Dec. 1915	27,912	14,000
III	23,132	9,132	14,000	July 1915	Dec. 1915	13,520	22,400
IV	30,705	11,705	19,000	Sept. 1913	Oct. 1913	23,632	22,400
V	45,636	15,136	30,500	July 1913	Dec. 1915	49,319	49,450
Total	2,40,116	74,616	1,65,500	....	.. ..	1,52,297	2,01,200

5. *From reserve grant.*—In all Rs. 2,40,116 would be necessary to bring all the roads mentioned in your note to a satisfactory condition. I have carefully calculated that Rs. 74,616 can be spared from the ordinary reserve grant for all this work; and the calculation has been so made that a proportionate amount of the ordinary reserve grant would be retained for the necessary repairs to the other roads not included in the five groups now dealt with.

6. *Ordinary grant not available.*—Here it may be noted that the ordinary annual grant allotted for maintenance of the several roads is not considered as available for meeting the expenditure on the present special estimates, as this will be required to maintain the several roads in the whole lengths under items and in portions not included in the present special estimates, the latter dealing with the single item of collection and consolidation of metal in portions requiring immediate attention.

7. *Special extra grant.*—In fact, these special estimates are framed to make up the accumulated defects in the surface of the several roads. Thus the total extra amount which cannot be met from the ordinary reserve grant that will be required to meet the present estimates, would be Rs. (2,40,116—74,616)=1,65,500 and this may be distributed during the several years as under:—

				Rs.
1912-13	...	...	...	... Nil
1913-14	...	...	...	... 58,500
1914-15	...	...	...	... 68,500
1915-16	...	..	...	... 38,500

8. *Estimates submitted.*—Nearly all of the estimates noted in the accompanying list have been actually sanctioned or ready to be sanctioned as noted in the remark column with the exception of only two items, *viz.*, 10 and 12, for which also lump sum amounts have been given by the Superintending Engineer, Northern Circle.

Thus items 1, 2a, 2d, 4a, 5 and 8 amounting to Rs. 91,114 have been sanctioned by Government and the metal collection work is also going on.

Items 2b, 2c, 2e, 3 and 4b amounting to Rs. 97,656 have now been submitted for sanction of Government and the estimates for the remaining items 6, 7, 9, 11, 13 to 16 are being dealt with in this office as the amount of each is less than Rs. 5,000. The two estimates, items 10 and 12, due from the Superintending Engineer, Northern Circle, are expected very soon.

9. *Future recurring charges.*—After these estimates are worked out and the roads properly improved by remedying the accumulated defects, it would be desirable to maintain them more or less in the same efficient condition. For this, evidently, the present limited grants would not be sufficient as this would mean a similar accumulation of defects from year to year and similar special estimates to remedy the accumulated defects. The present grants would therefore have to be somewhat increased and the mileage rates thus required have been shown in column 16 of the statement. This multiplied by the length of the road dealt

Public Works, dated 13th February 1914.

with as in column 9 gives the recurring charges shown in column 18 for each of the roads. Thus the total recurring charges required for all the roads to be maintained in an efficient condition comes to Rs. 2,01,200 every year.

10. *Previous recurring charges.*—But the present recurring charges have to be deducted from this amount to find out what extra liabilities are involved by the present proposals. For this purpose, the actual expenditure on each of the roads both from the ordinary maintenance grant and from the special reserve grant has been carefully found out and shown in columns 3 to 7 of the statement and the average actual charges per mile have been shown in column 8 being the quotient of column 7 divided by column 3 in each case. With this average actual expenditure per mile, the present cost for the particular length of the road to be dealt with as in column 9 has been calculated and shown in column 17 of the statement It will thus be seen that the total present actual recurring charges come to Rs. 1,52,297 against Rs 2,01,200 required in future years.

11. *Extra initial and recurring charges*—This gives an excess of Rs. (2,01,200-1,52,297)=48,903 for a total of 520½ miles (column 9) or an average of Rs 94 per mile. Thus in round figures an extra allotment of about Rs. 100 per mile or half a lakh on the whole would be necessary to maintain the roads dealt with in an efficient condition, while an initial extra expenditure of about Rs. 1¼ lakhs would be necessary to restore the worst portions of the roads in question as noted above (para 7).

12 *Works started*—It may be stated that metal collection has been started on the roads already sanctioned, *viz.*, Groups I and IV, and the work will be duly commenced on other roads from the next official year when the estimates have been sanctioned.

13. *Efficient inspection, Groups I to IV*—As regards the supervision and control of the works during execution, I may state that there will be no difficulty in connection with the works classed under Groups I to IV. The Bangalore and Mysore suburban roads can be effectively inspected both by the Executive Engineers and the Superintending Engineers and special care will be taken about them, as also about Coorg and Nilgiri roads. For the Mysore-Kanapur road, a special Assistant Engineer will be appointed till November next and after this, special instructions would be issued to the Executive Engineer to pay particular attention to this road.

14. *Group V*—There has been some difficulty in the past regarding the roads complained of by the planters. A good Sub-Divisional Officer was not available for the Koppa Sub-Division in the Kadur District, where most of these roads lie, a Sub-Overseer holding the charge till recently. Now a good Sub-Assistant Engineer has been selected and posted to this Sub-Division and he has been particularly warned to attend to all the roads carefully. A competent Sub-Divisional Officer will also be posted for the Saklespur Sub-Division in the Hassan District. The Executive Engineers of Hassan and Kadur and the Superintending Engineer will be duly instructed to make sure that all the planters' roads are duly attended to

15. *Personal precautions.*—Above all, the Deputy Chief Engineer and myself will make it a point to pay our special attention to all the roads now dealt with, to ensure that all the necessary works are carried out in a satisfactory manner With these precautions, it is hoped the roads in question will be improved and maintained in an efficient condition.

16. *Road Committee.*—The road Committee appointed to suggest proposals for securing better efficiency in maintaining the roads have submitted their report and this will be dealt with separately.

17. *Concluding request.*—In conclusion, I beg to request a general approval to the proposals embodied in the accompanying statement and the abstract thereof noted under para 4 above I also request that the estimates herewith submitted amounting to Rs. 97,656 may be kindly sanctioned at an early date. There will thus be only 2 estimates, items 10 and 12, to be shortly submitted to Government, all other estimates being sanctioned or submitted for sanction as shown in the remark column of the accompanying statement.

18. *Budget provisions.*—The necessary provision of funds both from the ordinary reserve grant and special additional grants will be duly made in the budget or in the reappropriation statement after the present proposals are duly approved and sanctioned by Government.

(5) Note dated 8th August 1913, by the same officer .—

Subject.—Additional allotment required for meeting the outlay on estimates sanctioned and to be sanctioned for the special repairs of certain roads in the Province and for increasing the annual repair grants on these roads to maintain them in an efficient condition after the special improvements are completed.

This office note dated the 22nd May 1913 clearly explains the reasons why additional expenditure under the above heads is necessary.

2. The consolidated statement accompanying that note gives details of the roads requiring urgent improvement and enhanced maintenance grants to meet the requirements

of traffic by bringing these roads into a better standard and to maintain them in a satisfactory condition thereafter. For a clear comprehension of the case, the outlay needed will be considered under two heads, *viz.*, (1) initial non-recurring charges, and (2) recurring charges. The ways and means of meeting the same will be suggested.

3. *Initial non-recurring charges.*—The total initial outlay needed, as per abstract under principal heads at the bottom of the statement, is Rs. 2,40,116. This is proposed to be distributed over four years as shown below :—

	Rs.
1912-13	32,000
1913-14	75,500
1914-15	84,116
1915-16	48,500
Total ...	2,40,116

4. *Ways and means.*—The funds required for expenditure during 1912-13 have been allotted out of the reserve grant under "Repairs, Communications" by enhancing the original grant under this head, both in the General and Supplemental Reappropriation Statements of 1912-13, but it will not be practicable to do so in the remaining three years as the amount required for each of these years is very large and the usual reserve grant cannot be wholly utilised for the special improvement of 520 miles of roads to the neglect of the requirements of the remaining 1,454 miles interspersed all over the Province. The money that can be set apart for the special repairs of these roads is only a fraction of the total reserve grant provided annually in the Public Works budgets which ranges from Rs. 60,000 to 80,000. This has accordingly been done and the balance required to meet the outlay proposed in the three remaining years has to be provided for by special additional grants as it cannot be met entirely from the amounts generally provided in the budget for ordinary and special repairs of Provincial roads. The money that can be spared from the reserve grant and that required to be specially allotted to meet the total initial outlay is noted below :—

Years	Out of reserve grant	Additional grant required
	Rs.	Rs.
1913-14	17,000	58,500
1914-15	15,616	68,500
1915-16	10,000	38,500
Total ...	42,616	1,65,500

Thus, out of the total outlay of Rs. 2,40,116, Rs. 74,616 (including Rs. 32,000 allotted during 1912-13) are proposed to be met from reserve grants and the balance of Rs. 1,65,500 will have to be made available by sanctioning special allotments in each year as shown above.

5. *Recurring outlay.*—Once these roads are improved, enhanced mileage grants will be required to maintain them in the standard condition. The existing grant for the 520 miles of roads now dealt with is Rs. 1,52,297, while the total outlay resulting from the proposed enhanced grants for the same will be Rs. 2,01,200, *vide* columns 17 and 18 of the statement. The increased annual maintenance grant for these roads will thus be Rs. 48,903 or say half a lakh in round figures. This additional allotment will be needed from 1916-17 as the special repair work is anticipated to be completed by 1916. For the better maintenance of the remaining 1,454 miles of Provincial roads, a similar sum is required *immediately* so that, from the year 1913-14, the total additional grant to be provided each year will stand as under:—

Years	Special repair	Maintenance	Total
	Rs.	Rs.	Rs.
1913-14	58,500	50,000	1,08,500
1914-15	68,500	50,000	1,18,500
1915-16	38,500	50,000	88,500
1916-17 and thereafter	Nil	1,00,000	1,00,000

Public Works, dated 13th February 1914.

Sanction is solicited to the above, *viz.*,

(1) Enhancement of the allotment under "Repairs, Communications" by Rs. 1,08,500 1,18,500 and 88,500 respectively, in the three years over which the improvement works are proposed to be spread.

(2) Enhancement of the annual grant by one lakh from 1916-17 and onwards.

6. Very early sanction is requested as the works ordered to be started in the Dewan's orders dated the 23rd June 1913, require the early provision of funds as most of the balance of the reserve grant after making provision for the incomplete works of previous year will be required for meeting the outlay on urgent works to be undertaken during the current year (1913-14).

No. 292-5—1579-82, dated Bangalore, 13th February 1914.

Order thereon.—The proposals put forward for orders deal with the measures necessary to maintain in an efficient condition, the trunk roads round Bangalore and Mysore and certain other important roads about which complaints are frequently received. Special estimates aggregating Rs. 66,119 in cost, have already been sanctioned for improving portions of roads round Bangalore and Mysore within a radius of 15 and 10 miles respectively, and these are referred to in the note dated the 24th April 1913.

A further sum of Rs. 76,341 has also been sanctioned for the special repairs of the roads noted below, from time to time, as there were complaints about their condition:—

		Rs.
1.	Mysore-Karapur road	30,705
2.	Bangalore-Honnawar road	2,938
3.	Kadur-Mangalore road...	10,000
4.	Tarikere-Mangalore road	4,559
5.	Bangalore-Mangalore road	10,000
6.	Banawar-Belur-Mudgere road	8,000
7.	Balehonnur-Magundi-Belur road	2,425
8.	Kotegehar-Kalasa road	3,608
9.	Chikmagalur-Tarikere road	4,106
	Total	76,341

Effective measures are equally necessary for putting into order the worst furlongs beyond the 15th and 10th mile limits in the following important roads, for which estimates have been received:—

		Estimated amount Rs.
(*a*)	Madras-Cannanore road (excluding portion in Kolar) beyond 15 miles of Bangalore	19,760
(*b*)	Madras-Cannanore road beyond 10 miles of Mysore ...	22,755
(*c*)	Bangalore-Nilgiri road in the Mysore Division	40,009
(*d*)	Bangalore-Mangalore road in the Mysore Division ..	15,132
	Total ...	97,656

2. As it is very desirable that the defective condition of the important trunk roads should be rectified at as early a date as possible, Government have been pleased to sanction all the four estimates for the amounts noted against each.

3. Thus far, the length selected for special attention is about 520½ miles out of a total length of 1,974 miles of Provincial roads and the aggregate cost is Rs. 2,40,116. *Vide statement A.*

	Rs.
1912-13	32,000
1913-14	75,500
1914-15	84,116
1915-16	48,500
Total ...	2,40,116

This outlay is proposed to be distributed over four years as shown in the margin. Out of this amount, Rs. 74,616 (including Rs. 32,000 allotted during 1912-13) will be made available from the reserve grant under "Repairs, Communications" in the Public Works budget and the additional grant actually required is Rs. 1,65,500 which will be spread over three years.

Proceedings of the Government of His Highness the Maharaja of Mysore,

The allocation of grants needed for the works is shown below :—

Year	Out of reserve grant	Additional grant
	Rs.	Rs.
1912-13	32,000	.....
1913-14	17,000	58,500
1914-15	15,616	68,500
1915-16	10,000	38,500
Total ...	74,616	1,65,500

4. In order to maintain these roads in an improved and satisfactory condition after the special repairs will have been carried out, the maintenance grant for the 520½ miles should be raised from Rs. 1,52,297 to Rs. 2,01,200 or by half a lakh of rupees in round figures. A similar increased grant would be necessary for the better maintenance of the remaining 1,454 miles of Provincial roads.

5. Government are satisfied that the additional allotments applied for are necessary if the roads round Bangalore and Mysore as well as others frequently used by high class and valuable vehicles, are to be maintained in a proper condition and are accordingly pleased to sanction :—

(1) An allotment of Rs. 1,65,500 for expenditure during the three years ending 1915-16 for improving the condition of 520½ miles of roads referred to above, in addition to the amount of Rs. 74,616 available from the ordinary reserve grant.

(2) An increase of Rs. 50,000 per annum in the ordinary maintenance grant of these roads. (This expenditure to be recurring and to commence from 1916-17. *Vide statement A*).

(3) A grant of Rs. 50,000 for increasing the annual provision for the maintenance of the remaining 1,454 miles of the Provincial roads to commence from 1916-17. *Vide statement B.*

6. The question whether the above sums should be treated as additions to the ordinary Public Works grant of Rs. 30 lakhs will be dealt with separately.

7. The Superintending Engineers of Circles will be responsible that the grants now allotted are used to the best advantage, that every item of expenditure connected with road maintenance is thoroughly checked and that no cause is given for complaint as to the condition of these roads in future.

K. KRISHNAIENGAR,
Offg. Secy. to Govt., P. W. Dept.

To—The Superintending Engineer, Southern Circle, with the sanctioned estimates
The Superintending Engineer, Northern Circle.
The Comptroller, Public Works Branch.
The Financial Secretary to Government.

READ—

Note No. 159, dated 21st November 1913, from the Secretary for Railways, submitting for sanction detailed Budget Estimates of capital expenditure on the Bowringpet-Kolar Railway for the year 1913-14.

No. 951-53—Ry. F. 150-13-14, DATED BANGALORE, 2ND—3RD FEBRUARY 1914.

ORDER THEREON.—The Capital Budget Estimates of the Bowringpet-Kolar Railway providing for an expenditure of Rs. 2,00,000 during the current year, as shown in the accompanying statements, are sanctioned.

2. The establishment charges amounting to Rs. 13,000, as detailed in the statements, are also sanctioned in supersession of the scale sanctioned in Government Order No. 851-54—Ry. F. 21-12-13, dated the 1st February 1913, as modified by Order No. 977-82—Ry. F. 21-12-13, dated the 28th February 1913.

3. Necessary provision on this account has been made in the General Budget Estimates of the Department for the current year.

E. A. S. BELL,
Secretary for Railways,
Government of Mysore.

To—The Financial Secretary to the Government of Mysore.
The Comptroller, Public Works and Railway Branch.
The Engineer-in-Chief, State Railway Construction Department.

10	R 5960-70—L R 249-13-6	3	Rev. Comr., Dy. Comrs. of Dts., Comptr. and Mr. K. Srinivasa Rao, Retired Dy. Comr.	Entrusts the work of compiling the Village and Taluk Manuals to Mr. K. Srinivasa Rao, Retired Deputy Commissioner; orders the deputation of Mr. M. S. Hayagriva Rao, Amildar of the Shimoga Taluk, for special duty in connection with the above works; sanctions certain clerical

Serial No.	Proceedings: Number	Proceedings: Date	Proceedings: To whom sent	Subject and Order
				and menial establishment for the purpose; and lays down certain general instructions for the preparation of the Manuals.
11	R 5983-4—L R 35-13-8 ...	4	Rev. Comr. and Comptr.	Accords sanction to the conveyance of the Revenue Commissioner's motor car by rail from Bangalore to Holalkere, in connection with his tour in the Chitaldrug and Tumkur Districts.
12	R 5985—L R 17-13-23 ...	5	Rev. Commissioner ...	States that the claim for compensation, of the owners of the portions of occupied Survey No. 41 in the Marenahalli village, Bangalore Taluk, taken up for a new village site, may be disposed of in an equitable manner by paying them a fair valuation of the lands taken up; and that formal acquisition of the lands may be resorted to only when the claim cannot be settled as above
13	R 5986—L R 17-13-23 ...	5	Gujjappa and others of Marenahalli	Informs them that orders have been issued for an early settlement of their claim for compensation.
14	R 5987-8—L R 389-12-6...	5	Rev. Comr. and Chief Engineer	Directs that the weir of the Ooragum-Tubinakere tank, in the Bowringpet Taluk, be lowered to the level of its bed tentatively for a period of two years, at the cost of the Nandidrug Gold Mines, who applied for it.
15	R 5989-91—L R 195-10-6	5	Rev. Comr., Dy. Comr., Bangalore, and Survey Superintendent	Remits the fine of Rs. 229-8-0, imposed by the Deputy Commissioner, Bangalore District, in accordance with Government Order No. R. 7722—L. R. 351-09-2, dated 7th May 1910, on Matribai Kandappa for having built a chattram on Resurvey No. 35 of Barigemuddenahalli, Bangalore Taluk.
16	R 5992-7—L R 414-13-1...	5	Rev. Comr., Supdt. of Inam Settlts., Dy. Comrs. of Bangalore, Tumkur and Mysore and Palace Controller	Directs that the Inam tenure of Sogala, Garakhalli and Honnamachinahalli villages, which have reverted to the Palace, after the death of Chamammanni, and other inam lands in the enjoyment of the Palace, be extinguished and all such estates regarded as Palace properties, the net income therefrom being credited to the Palace
17	R 5999—L R 10-13-87 ...	5	Rev. Commissioner ...	Records the letter reporting on the occurrence of an accidental fire at Surapanahalli village Chikmagalur Taluk.
18	R 6000—L R 10-13-88 ...	5	Do ...	Records his letter reporting the occurrence of an accidental fire at Myakanahatti, Majre village of Arasanghatta, Holalkere Taluk, on 25th December 1913, which resulted in the destruction of a house with grains valued at Rs. 180, and in the death of a child aged four years.
19	R 6005—L R 246-13-3 ...	5	Do ...	Informs that, as under the revision of Taluk Establishments recently sanctioned, eleven peons and one dafadar at Davangere, will have their pay increased by one rupee each, there is no need to sanction any further allowances as proposed.
20	R 6008-17—L R 89-13-9...	5	Rev. Comr., Comptr., Dy. Comr., Bangalore, and Dy. Comrs. of other Districts	Observes with reference to the transfers of charges that took place at the Channapatna Taluk during July 1913:— (i) that Mr. Narayanaswamy Mudaliar, Amildar, under orders of transfer to that taluk should have sought instructions from the Deputy Commissioner, and not have prevailed upon the Taluk Sheristadar, to hand over charge to him, when he was reluctant to do so. (ii) that the Deputy Commissioner should not have delayed communication of the order of the transfer to the Amildar for about eight days.

Serial No.	Proceedings: Number	Proceedings: Date	Proceedings: To whom sent	Subject and Order
				(iii) that there is no rule that a subordinate officer transferred to a district is bound to report himself to the Deputy Commissioner, before he takes charge and that the Deputy Commissioner would have done well to have sought the instructions of Government before he censured the Amildar, etc., and directs the Deputy Commissioner to suitably modify the order of censure passed in the case, and forward a copy of the revised order to Government.
21	R 6052-3—L R 224-13-2...	6	Supdt. of Inam Settlts. and Rev. Comr.	Approves of the Inam Superintendent's apportionment of the Khalsat imposed on the mixed Devadaya and Brahmadaya Inams in the joint holding of the Mulbagal Matt and certain individuals in the Tirthahalli Taluk.
